FRIDAY, MAY 31, 1895.

CONTENTS:

On the Electrification of Air; On the Thermal Conductivity of Rock at Different Temperatures: LORD KELVIN

A Dynamical Hypothesis of Inheritance: JOHN A. RYDER

Current Notes on Physiography (VII.): W. M. DAVIS

Annual Meeting of the Chemical Society (London): W. W. R.

Correspondence: —

Haeckel's Monism: DAVID STARR JORDAN.
The Genus Zaglossus: ELLIOTT COUES.

Scientific Literature: —

The Cambridge Natural History: W. H. DALL.
Benton's Laboratory Guide of Chemistry: W. R. O.

Notes and News: —

The Helmotz Memorial; The Geological Society of America; Nominations before the Royal Society; John A. Ryder; General.

Scientific Journals: —

New Books: —

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Prof. J. McKeen Cattell, Garrison on Hudson, N. Y.

Subscriptions and advertisements should be sent to SCIENCE, 41 N. Queen St., Lancaster, Pa., or 41 East 40th St., New York.

(1) 'ON THE ELECTRIFICATION OF AIR.'*

§ 1. Continuous observation of natural atmospheric electricity has given ample proof that cloudless air at moderate heights above the earth's surface, in all weathers,

* Two communications by Lord Kelvin, P.R.S., to the Philosophical Society of Glasgow, meeting in the Natural Philosophy lecture-room of the University of Glasgow, March 27, 'On the Electrification of Air'; 'On the Thermal Conductivity of Rock at Different Temperatures.' Printed from proof sheets for Nature contributed by the author.

** 'Electrostatics and Magnetism,' Sir William Thomson. xvi. §§ 251, 282.
Science 1 (22), 589-616.
