SCIENCE

FRIDAY, AUGUST 18, 1899.

CONTENTS:
Daniel G. Brinton, with Plate: W J M.............. 193
Presidential Address before the Society for the Promotion of Engineering Education: President T. C. Mendenhall.................. 196
Work of the U. S. Geological Survey: Bailey Willis.................................. 203
Scientific Books: —
Societies and Academies: —
  Section A, Mathematics and Astronomy, and Section G, Botany of the American Association for the Advancement of Science.............. 217
Discussion and Correspondence: —
  The Fohn Winds of Switzerland: Professor Charles Bundy Wilson. The opening of the Month as Expression: Hiram M. Stanley 218
Astronomical Notes:
  Observatory of Yale University; Flower Observatory of the University of Pennsylvania; Chamberlin Observatory of the University of Denver; Astronomical Objectives: Professor Winslow Upton........................................ 219
Notes on Physics: F. C. C.................................. 220
Notes on Inorganic Chemistry: J. L. H.............. 221
Scientific Notes and News........................................... 222
University and Educational News........................................ 224

MSS. intended for publication and books, etc., intended for review should be sent to the responsible editor, Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

DANIEL G. BRINTON.

In the death of Dr. Brinton American science has suffered a grievous loss. Notably brilliant and versatile, endowed with exceptional acumen, and an indefatigable worker, he investigated much of the broad field of anthropology with signal success; a fluent and forceful speaker and a clear and cogent writer, he was remarkably successful in putting the results of his work before general auditors and readers as well as students; exceptionally public-spirited and appreciative of the normal human demand for better knowledge, he strove constantly to extend and improve instrumentalities for the diffusion of science. Thus through rich natural endowment, coupled with wise and persistent effort, he materially advanced the Science of Man and placed himself in the front rank of the anthropologists of the world. His activity continued undiminished (despite the weight of well-guarded suffering consequent on military service) until checked by the illness which terminated with his life.

Born in Chester county, Pennsylvania, May 13, 1837, Daniel Garrison Brinton graduated from Yale (A.B.) in 1858, and from Jefferson Medical College (M.D.) in 1861, and assimilated his thorough training during a year in Europe, with special studies in Paris and Heidelberg. Stimulated by the martial spirit of the time, he then returned and entered the Federal army as
