The Early Presidents of the American Association, III. (with plate): Dr. Marcus Benjamin... 705

The Classification of Botanical Publications: Professor William Trelease............. 713

On the Cause of the Dark Lightning Effect: Professor R. H. Woold............................ 717

Architectural Plans for the University of California: Professor William Carey Jones... 721

The Fossil Field's Expedition to Wyoming: Charles Schuchert............................. 725

Scientific Books:—

The 'Theta-Phi Diagram': Professor R. H. Thurston. Still's Alternating Currents of Electricity; Moffett's Alternate Currents in Practice: Professor W. S. Franklin. Lobb's Spporonz. Dr. Gary N. Calkins. Kükenthal's Leitfaden für das zoologische Praktikum: Henry N. Nachtier. Books Received............................. 728

Scientific Journals and Articles:— 734

Societies and Academies:—

The New York Academy of Sciences.—Section of Astronomy and Physics: Dr. W. S. Day. Section of Geology and Mineralogy: Dr. Alexis A. Julien. The Chemical Society of Washington: Dr. W. H. Keug. Onondaga Academy of Science: H. W. Britcher. 735

Discussion and Correspondence:—

Color Association with Numerals: Dr. Edward S. Holdex................................. 738

The Wagner Free Institute of Science and Professor Doll: Thomas L. Montgomery........ 738

The Carnegie Institute: Harlan I. Smith...... 739

Alcohol as Food........................................... 739

Scientific Notes and News........................................... 741

University and Educational News.......................... 743

THE EARLY PRESIDENTS OF THE AMERICAN ASSOCIATION.∗

III.

Gould.

Gould † was born in Boston in 1824, and was graduated with honors at Harvard twenty years later. He then went abroad and for four years studied under the most distinguished astronomers of Europe, but chiefly under the great Gauss, in Göttingen, where he received his doctor's degree.

In 1848 he returned to Boston, and there—a little more than half a century ago—began the publication of the Astronomical Journal, the first and still the only distinct periodical of that science devoted to original investigation in this country.

Then came his valuable connection with the Coast Survey, during which he had charge of the longitude determinations, and subsequent to the laying of the Atlantic cable in 1866, he connected the two continents by precise observations. These first determinations of transatlantic longitude by telegraph were the means of establishing a connected series of longitude measurements from the Ural Mountains to New

* Address of the Vice-President and Chairman of Section I of The American Association for the Advancement of Science, Columbus Meeting, August, 1890.
