SAUNDERS NEW BOOKS

MANUAL of CLINICAL MYCOLOGY

This new manual is of special interest to many different fields. The physician, the bacteriologist, students and others will find it a unique presentation of fungus infections. Many features distinguish it, but one of the most outstanding is the fashion in which heretofore involved and difficult subjects have been simplified and made easily understandable, even by those without special training in the field. The chapter on Contaminants is especially fine as are the 288 illustrations on 148 figures.

By NORMAN F. CONANT, PH.D., DONALD STOVER MARTIN, M.D., DAVID TILLERSON SMITH, M.D., ROGER DENIS BAKER, M.D., and JASPER LAMAR CALLAWAY, M.D., Duke University School of Medicine. 348 pages, 5¼" x 7¾", with 288 illustrations on 148 figures. $3.50

Wohl's Dietotherapy

New Book—58 American Authorities here deal with diet and nutrition in both health and disease, with, however, greatest emphasis on clinical application.

By 58 Authorities, Edited by MICHAEL G. WOHL, M.D., Associate Professor of Medicine, Temple University School of Medicine, Philadelphia. 1029 pages, 6" x 9", 93 illustrations. $10.00

Manual of Tropical Medicine

New—a comprehensive, yet concise, coverage of what is known today of tropical diseases and their diagnosis and treatment. Gives especially complete discussions of parasitology and medical entomology.

By COLONEL THOMAS T. MACKIE, M.C., MAJOR GEORGE W. HUNTER, III, S.C., and CAPTAIN C. BROOKE WORTH, M.C.; A.U.S. 727 pages, 6" x 9", with 224 illustrations, some in color. $6.00

Cantarow & Trumper's
Clinical Biochemistry

By ABRAHAM CANTAROW, M.D., Professor of Physiological Chemistry, Jefferson Medical College; and MAX TRUMPER, Lt. Comdr., H(S), USNR, Naval Medical Research Institute, National Naval Medical Center, Bethesda, Md. 647 pages, 6" x 9", with 29 illustrations. $6.50

Felsen's Bacillary Dysentery
Colitis & Enteritis

New—By an international authority on the subject. The first complete American monograph on the dysenteries. Of wide and timely interest.

By JOSEPH FELSEN, B.A., M.D., Director of Medical Research, Bronx Hospital, New York, Director of International and Pan-American Dysentery Registry. 618 pages, 5¼" x 7¾", with 145 illustrations. $6.00

W. B. SAUNDERS COMPANY
West Washington Square Philadelphia 5

Published weekly by the American Association for the Advancement of Science at Lancaster, Pa.
Entered as second-class matter July 18, 1923 at the Post Office at Lancaster, Pa., under the Act of March 3, 1879.
Determining Nutrients in Plant Tissue

While the soil may contain an adequate nutrient supply, yet at times the plant may not be capable of assimilating it. This condition can be detected quickly by a tissue test. For practical purposes tissue tests for determining the presence of nitrogen, phosphorus and potash are sufficient. With the Standard LaMotte Combination Soil Testing Outfit illustrated above, (for pH, phosphorus, potash and nitrates in soil,) the relative concentration of the above elements can be determined. The outfit contains all necessary equipment, with exception of the knife for preparing tissue section. Price $35.00 F.o.b. Towson 4, Maryland.

LaMotte Chemical Products Co.
Dept. "H" Towson 4, Baltimore, Md.
a steel microslide filing cabinet offering 45% greater capacity at amazingly low cost!

This new "LAB-AID" cabinet is the ultimate solution to the filing problems encountered in the laboratory. It is of welded-steel, fire-resistant construction throughout. Files 3"x1" or 3"x2" microslides, 2"x2" transparencies, large lantern slides, index cards, even paraffin blocks . . . in single-row drawers, all fitting interchangeably into a smooth-tracking master drawer-rail system. Unit-sections, assembled in any combination, can be used singly, or stacked to any convenient height. With all these advantages, the cost-per-slide capacity in the "LAB-AID" cabinet is the lowest ever. Investigate this remarkable equipment . . . the coupon will bring details.

The new steel Lab-aid laboratory filing cabinet

A single "LAB-AID" unit-section. Any combination of drawers can be supplied.

By merely dropping in a patented "LAB-AID" slotted liner, any drawer is converted from storage filing to individual slide filing, or vice-versa.

New (3d) Edition  Just Ready
AN INTRODUCTION TO
MEDICAL SCIENCE
BY WILLIAM BOYD
M.D., M.R.C.P. (Edin.), F.R.C.P. (Lond.).
Professor of Pathology and Bacteriology in the
University of Toronto, Toronto; etc.
Octavo, 366 pages,
iillustrated with 125 engravings.
Cloth, $3.50.

THE object of this work is to offer a general
introduction to the study of disease, to its
causes and the bodily changes which accompany it.
It is designed specifically for the nurse, the labora-
tory technician and the pre-medical student. With
this picture of disease as a whole they are far
better able to grasp the various subjects in the
curriculum, and to understand the place and pur-
pose of anatomy, bacteriology and materia medica.

POPULAR DOVER BOOKS ON MATHEMATICS
Equally Fascinating to Professional Mathematicians and Amateurs of Mathematics
MEN OF MATHEMATICS. The Lives and Achievements of the Great Mathematicians
By E. T. BELL. 5½ x 8½, XV + 592 pages, 29 full page portraits of famous mathematicians.
Originally published at $5.00.
This standard volume contains brilliant biographical studies of mathematicians of all ages who contributed
to the development of modern mathematics, including Zeno, Eudoxus, Archimedes, Descartes, Fermat,
Pascal, Newton, the Bernoullis, Euler, Laplace, Monge, Kronecker, Riemann, Kummer, Poincaré, Cantor,
etc.
Typical reviews follow:
"... a fascinating book ... amount of biographical details and of mathematics compressed into a volume
of 680 pages is extraordinary. ..."  Nature.
"... humanizes the subject and helps to a realization of the historical environment. ..."  Bertrand
Russell.
"... for frequent perusal in parts or as a whole, a book of reference. ..."  American Mathematical
Monthly.

ELEMENTARY MATHEMATICS FROM AN ADVANCED STANDPOINT:
Arithmetic, Algebra, Analysis
By F. KLEIN. Translated from the 3rd German edition by E. R. Hedrick and C. A. Noble.
5½ x 8½, IX + 374 pages, 125 illustrations.
$3.50
An invaluable work, serviceable alike to the university teacher and to the teacher in secondary schools.
There is nothing comparable to it, either with respect to the skilfully integrated material, or to the
fascinating way in which this material is discussed. Every teacher of mathematics should be acquainted
with it.
"The work as a whole is a remarkable example of the distinguished author's mastery of the art of clear
and stimulating exposition. We sincerely hope that it will have a wide influence in arousing an active interest
in a more serviceable preparation of our teachers."  Bulletin of the American Mathematical Society.

VITAMIN TEST CASEIN

In vitamin experimentation the type of protein used may well be the most important dietary factor. When Vitamin Test Casein GBI is the protein of choice in the deficiency diet, uniform and consistent depletion of test animals occurs well within the required time interval specified by the U.S.P. or other standard test methods.

Vitamin Test Casein GBI is prepared by a special hot alcohol extraction method, which removes not only the fat soluble but the water soluble vitamins as well. It is therefore free of vitamins A and D as well as the known factors of the B complex and vitamin K.

*Vitamin Test Casein GBI is supplied in: 1 lb. bottles, 5 lb., 25 lb., and 100 lb. fiber drums.*

**Positive CONTROL WITH Taylor LIQUITROL**

**THE MODERN METHOD TO CONTROL pH, CHLORINE AND PHOSPHATES**

You know at all times with Taylor Liquitrol on the job that you have everything under control. Determinations of pH in 60 seconds... phosphates in 2 minutes, in any part of the plant. You will know they are accurate, because all Taylor Liquid Color Standards are guaranteed unconditionally against fading.

Just off the press! New 88 page book "Modern pH and Chlorine Control." Gives solutions of problems in 34 industries, including yours. Also complete descriptions of methods, procedures and all portable outfits included in Taylor Liquitrol Method. See your dealer or write direct for your free copy.

**INTERNATIONAL MICRO CENTRIFUGE**

For Micro and Semi-Micro Analysis

- Quick starting — 1780 r.p.m. in 10 seconds. Smooth performance.
- Powerful brushless type motor for continuous operation.
- Four tube capacity 0.5, 1, 2, 3 and 5 ml. and ½" x 4" test tubes. Either horizontal or angle sedimentation.
- Mechanical brake for rapid stopping.
- Steel protective guard bowl—Sturdy base—Rubber suction feet. Attractively finished in baked brown wrinkle.

Selling Price $29.00

GAERTNER MICROMETER SLIDES

fitted with microscope or telescope, permit—

depth measurements

vertical measurements

horizontal measurements

micrometer focusing

A most desirable feature of these instruments is the diversity of applications possible. In addition to the uses indicated, displacements on small objects can be measured by mounting them directly on the slide. Two slides can be mounted to form a small coordinate comparator. Various types of microscopes and supports are available for other adaptations.

RANGES: up to 4 inches (100 mm) • READINGS: to .00005 inch (0.001 mm)

THE GAERTNER SCIENTIFIC CORPORATION

1204 Wrightwood Avenue Chicago 14, U. S. A.
For preliminary qualitative work, Bausch & Lomb Direct Vision Spectroscopes have proved themselves to be instruments of wide usefulness in chemistry and physics. They can be used with both emission and absorption spectra when a wave-length scale is not required. Two models are available, one with a fixed slit and one with adjustable slit and comparison prism. Preference rating desirable for prompt delivery. Bausch & Lomb Optical Co., Rochester 2, N. Y.

TERMINAL PROGRAMS IN THE GRADUATE SCHOOLS

By Dr. CARL E. SEASHORE

The State University of Iowa

A terminal program leading to the master's degree is a program of study designed specifically on a one- or two-year basis as distinguished from the master's degree program leading toward the doctorate, which is designed for the first year on a three-year basis.

The terminal program is tailor-made, designed to fit the individual needs of the student in relation to personal and professional objectives. It is sponsored by a professor who gives particular attention to the organization of terminal programs. It, therefore, becomes student-centered as opposed to subject-centered. It represents a vocational or semi-professional bent but should be distinguished from purely technological courses and be dominantly of a liberal character but with a vocational aim. The member of the staff who directs the work takes responsibility for the maintaining of standards and a happy balance between concentration in an area and reasonable spread of work within a chosen field, the securing of the privileges involved and personal direction of the thesis. The work on the thesis and the organized reading are designed to introduce the student to bona-fide graduate methods of study. The terminal program ensures adequate consultation between student and staff at the time of registration and personal guidance throughout toward a well-conceived objective.

The primary purpose of this type of organization is the standardization of two types of master's de-
