Tolerance +.00000", -.00014"

An example of the mechanical precision in Bausch & Lomb optical instruments is found in the machining of a microscope objective cell. This cell holds just one of the lenses for a microscope objective. Made on an automatic screw machine with a diamond cutting tool, the outside shoulder of this part is held to a tolerance of +.00000", -.00014" to insure exact centration of the lens. Through such mechanical accuracies Bausch & Lomb creates optical instruments that are capable of taking full advantage of the lightwave precision to which many of the optical elements are made. Bausch & Lomb Optical Co., 642-5 St. Paul Street, Rochester 2, New York.

BAUSCH & LOMB
ESTABLISHED 1853
Bacto-Agar

Bacto-Agar is a purified Agar prepared from domestic material. In the manufacture of Bacto-Agar extraneous matter, pigmented portions, and salts are reduced to a minimum, so that the finished product in the form of fine granules will dissolve rapidly, giving clear solutions.

Bacto-Asparagine

Bacto-Asparagine is a purified amino acid widely used in synthetic culture media and in the preparation of tuberculin.

New (3d) Edition Just Ready

CLINICAL LABORATORY DIAGNOSIS

By SAMUEL A. LEVINSON,
M.S., M.D., Ph.D.,
Professor of Pathology,
and ROBERT P. MACFATE,
Ch.E., M.S., Ph.D.,
Assistant Professor of Pathology,
University of Illinois College of Medicine

Octavo, 971 pages, illustrated with 182 engravings and 15 plates, 7 in color.
Cloth $10.00.

The third edition of this unusually successful work is unique in its comprehensiveness without any sacrifice in the clearness of the subject matter. The clarity of its step by step descriptions of technical procedures makes it an ideal manual for technicians and clinical pathologists.

LEA & FEBIGER
WASHINGTON SQUARE, PHILADELPHIA 6, PA.
FUNDAMENTAL PRINCIPLES OF PHYSICAL CHEMISTRY

By Prutton & Maron
Case School of Applied Science

This text provides a thorough modern training in the essential principles of physical chemistry, their effective use, and their correct application. Its aim is to give the student the sound training in the fundamentals of physical chemistry which will enable him to understand the science both in a general and qualitative way and also in its more experimental and quantitative aspects. It is intended primarily for a full year's course in physical chemistry for students of chemistry and chemical engineering, but is readily adaptable to any one-semester course for students in other branches of science.

780 pages, $5.00

THE CHARACTERIZATION OF ORGANIC COMPOUNDS

By Samuel M. McElvain
University of Wisconsin

Prepared both for students and for research workers in organic chemistry, this book teaches the methods of identification and characterization of organic compounds and includes laboratory exercises. It contains extensive discussions of the chemistry involved in organic reactions used for the identification of organic compounds. It gives practical procedures for carrying out these reactions in the laboratory, and includes extensive tables of the physical properties of the various classes of organic compounds and their characteristic derivatives.

282 pages, $3.75

PRINCIPLES OF CHEMISTRY

By Joel H. Hildebrand
University of California

The student is here given a knowledge of the fundamental concepts of chemistry without being confused with any more related matter than is necessary for his grasp of the subject. The text forms a sound basis for laboratory work but does not duplicate information more easily acquired in the laboratory or lecture room.

4th edition, 359 pages, $2.75

INTRODUCTORY COLLEGE CHEMISTRY

By Harry N. Holmes
Oberlin College

The latest revision of this well-known college text brings all material up to date. It contains modern treatments of plastics, synthetic fibers, synthetic rubber, etc.; many new teaching aids; and numerous new drawings and photographs.

4th edition, 590 pages, $3.75
The modern equipment recently installed in our glass blowing department enables us to meet your specifications in "Custom Built" glassware by making anything from a tube to the "magnetic cow" shown in the picture.

Our experts will be pleased to assist you in planning new designs.

Use our repair service, experienced in all types of scientific glass.

Send in your sketches today.

POSITIONS WANTED

The California Medical Bureau, Agency for scientific and lay personnel in medicine, biology, chemistry, physics, and allied sciences, supplies teachers, research workers, laboratory diners, skilled office help. Prompt service. Registration free. Your patronage respectfully solicited. This CALIFORNIA MEDICAL BUREAU, Agency, Arcade Medical Center, 206 East Colorado Street, Pasadena 1, California.

Academic Position: Teaching, research, Ph.D., eight years' university experience in organic, inorganic, physical, biological chemistry, plus seven years war industrial experience with pharmaceutical, biological industries, nutrition, etc. Sixty publications. Connections. Married, dependents. Box 506, SCIENCE.

Director or Responsible Position: Ph.D., 20 years' wide experience organic and biochemical research and development, numerous publications, member of various scientific societies, at present director of research, married, desires position of more responsibility in supervisory and administrative capacity. Box 505, SCIENCE.

Physical Chemist, Ph.D., broad knowledge, varied experience, desires laboratory or library work, June 15 or earlier until September 15. Box 505, SCIENCE.

Electrical Engineer, M.S., desires permanent academic post in teaching and research. Four years varied teaching and research, two years war research, now associated with large university research group. Box 506, SCIENCE.

Physicians, Laboratory and X-Ray Technicians, Bacteriologists, Pharmacists, Physical Therapists let us help you secure a position. Our service, established 1886, is nationwide. Write us today. All information confidential. ANNESS-WOODWARD BUREAU, 30 North Michigan, Chicago 2.

BALANCE ILLUMINATOR

A newly designed fluorescent “cold-light” especially made for analytical balances. The construction makes for shadow free illumination of the interior of the balance. The illuminator can be used with the cord and plug either on the left or right hand side of the balance. On-off switch is on center top balance.

constructed of welded steel, finished in black crackle. Inside reflector, white enamel. Overall dimensions: Length 10”; width 5½”; height 4½”.

No. 1900 Balance Illuminator. Complete with lamp, cord, and plug, for use on 110-120 volts, A.C.

Each $15.00

The wide acceptance this textbook has enjoyed is well merited by its outstanding features. The treatment is definitely on the students' level. The data upon which discussions are based are selected from the original literature and presented here in the form of tables or graphs.

When different viewpoints are presented, the authors indicate which they favor. Representative lists of questions, mostly of the "problem" type, which appear at the end of each chapter are particularly valuable for class discussion.

The anatomical drawings of leaves and stems were made from living material to show the close relationship between structure and function, and much helpful supplementary material on underlying chemical-physical principles and plant anatomy is included.

Concise, comprehensive, well-organized, this text can be readily adapted to any course in Introductory Plant Physiology.

Second Edition LABORATORY PLANT PHYSIOLOGY
By THE SAME AUTHORS

The arrangement of the experiments in this book follows the text of "Plant Physiology," but can be changed to meet the needs of different courses. There is selection and sufficient material for both introductory and advanced courses. Some of the experiments are designed to be used as demonstrations by the instructor especially in an elementary course, but most of them may be performed by the student. The 177 experiments are accompanied by blank pages for the use of the student's laboratory notes. The brief appendix includes descriptions of the special reagents necessary for the performance of certain experiments. All experiments have been carefully selected to illustrate the basic facts and principles of plant physiology.

101 Pages 8½ x 11 Cloth Illustrated $2.35

D. VAN NOSTRAND COMPANY, Inc. 250 Fourth Avenue, New York 3, N. Y.
Dark-colored corpuscles, brilliant lines, and the subdued background of the Spencer Bright-Line Haemacytometer provide a strong contrast that makes cells easy to see and therefore easy to count accurately.

Only the Bright-Line counting chamber has a semi-transparent coating of metal to eliminate glare, increase visibility of the lines, and cause cells to be more evenly distributed.

An instructive booklet on the use of the Haemacytometer is enclosed with each chamber. If you do not have a copy, write dept. E5 for one.
