Vannevar Bush, who outlined the functions of the Joint Research and Development Board before a group of engineers in Washington on January 14. Dr. Bush and 11 other key members of OSRD received the official thanks of the Government through President Truman at an informal ceremony in the Executive Offices on January 20. The event concluded the wartime activities of OSRD.

The Machine, the Worker, and the Engineer

Robert K. Morton
For PHYSIOLOGICAL and other LABORATORIES

1. **8-MM. Mounting Rod.** Solid or tubular; the latter is designed both for support and as a convenient conduit for electrical wiring.

2. **Right-Angle Rod.** A rigid and accurately formed support for universal adjustment of position.

3. **Swivel Clamp.** The swivel gives complete rotation and has a special hold-fast set screw. Made, like 1 and 2, of nickeled brass.

4. **Clamp with Binding-Post.** Our regular double clamp with binding screw added for quick wiring operations. Stainless steel, with nickeled brass fittings. The accurately machined jaws will take diameters of 14 mm. to 1 mm.

We also make a **Heavy Clamp** without swivel, ½ inch capacity; and a **Tunnel Clamp**, for control of infusion.

(Organized on a non-profit basis for the advancement of teaching and investigation in physiology and allied sciences)
The fundamental facts of biochemistry—and their application—are thoroughly covered in this stimulating and authoritative text. Long a leader in its field, the book tells the story of biochemistry in the form of closely knit chapters, written in simple and clear English—and vividly illustrated with 143 figures.

Dr. Harrow's extensive experience as a teacher and as a laboratory worker has enabled him to organize his subject so thoroughly that the student is led fully prepared into each succeeding discussion. For this Fourth Edition he has incorporated latest developments and revised a great many chapters.

Most significant is the inclusion throughout the book of the results of experimental work with radioactive isotopes, so-called tracer elements. The chapter on foods has been revised to cover the effects of food processing, war research and the European food problem. The vitamin chapter now includes a discussion of microbiological methods of vitamin assay. The material on the sulfonamides has been brought up-to-date and enlarged, and penicillin and other new antibiotics are covered.

By BENJAMIN HARROW, Ph.D., Professor of Chemistry, The City College, College of the City of New York. 592 pages, 6" x 9", illustrated. $4.25.

Harrow's Laboratory Manual of Biochemistry

This Laboratory Manual provides precise directions for experiments covering the preparation, the qualitative and quantitative chemical examination of a large number of substances of biochemical importance. Designed for use with any standard textbook. Adapted to courses of one or two semesters.

By BENJAMIN HARROW, Ph.D., and Associates, City College, College of the City of New York. 132 pages, 6" x 9", illustrated. Wire-O Binding. $1.50.

Science: A Weekly Journal, since 1899 the official organ of the American Association for the Advancement of Science. Published by the American Association for the Advancement of Science every Friday at Baltimore, Maryland.

Communications relative to articles offered for publication should be addressed to Editor, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Communications relative to advertising and subscriptions should be addressed to Theo. J. Christensen, M. Royal and Guilford Avenues, Baltimore, and 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Communications relative to membership in the Association and to all matters of business of the Association should be addressed to the Administrative Secretary, AAAA, 1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Annual subscription, $7.50 Single copies, 25 cents Entered as second-class matter July 16, 1923 at the Post Office at Lancaster, Pa., under the Act of March 3, 1879.

(Application for re-entry to the second class of mail matter under the act of March 3, 1879, pending at Baltimore, Md.)
NEW! A progressive textbook for college students in biology taking lecture and laboratory courses in genetics. Special emphasis is given to the application of Mendelian principles to man and the roles played by heredity and environment to man. The effects of environment and training in correction of physical defects and the improvement of performance is given. A very teachable text. Many new problems are included.

22 Illus., 402 Pages. $3.50 (Dec. 1946)

STILES

Handbook of Microscopic Characteristics of Tissues and Organs—3rd Edition

By Karl A. Stiles, Ph.D., Michigan State College

NEW! This new book can be used as a supplementary guide with any textbook on histology. It may be used as a syllabus for lectures, also as a laboratory manual since the premedical or medical student has had some microscopic anatomy. The text is especially helpful to teachers for review and to students preparing for “spot” quizzes or for State and National Board examinations. Information of special value in identification studies has been set in italic giving the diagnostic features at a glance.

35 Illus., 214 Pages. $1.75 (Dec. 1946)
CHEMISTRY FOR THE EXECUTIVE
By RALPH K. STRONG, Head, Dept. of Chemistry, Rose Polytechnic Institute, Terre Haute, Indiana

Here is a book which explains the elements of chemistry to business men and others having no previous scientific knowledge in a way which is simple and readable enough to spend a pleasant evening with. Chemistry For the Executive covers in dialogue form the most essential facts both in organic and inorganic chemistry. Care has been taken to present the material in such a way that anyone who will devote a reasonable amount of time and thought to it will acquire a bowing acquaintance with chemistry.

440 Pages Illustrated $6.00

GALVANIZING HANDBOOK
By JOHN R. DAESEN, Consulting Metallurgical Engineer, Chicago, Ill.

This volume presents graphically the basic principles involved in galvanizing and demonstrates with unusually striking photographic examples the nature and cause of many defects encountered in a consulting practice in a varied field. Many of the examples chosen were articles deliberately spoiled to indicate in an extreme manner conditions which are difficult to illustrate in the degree usually encountered in practice. Designed specifically for practical plant use, this valuable handbook is certain to fill a great need.

166 Pages Illustrated $5.25

THE METALLURGY OF QUALITY STEELS
By CHARLES M. PARKER, Secretary, General Technical Committee, American Iron and Steel Institute

A down-to-earth review of the practical fundamentals of steel metallurgy, written in a clear, concise and interesting manner. Emphasis is placed on steel quality, and the production, treatment, fabrication and use factors that control or are affected by it. A wide range of related topics is also covered, including the general nature of steel; different classes of steel, according to manufacture; typical production practice for open hearth; Bessemer and electric furnace steel; ingot and rolling mill practices; the effects of alloys; the metallurgy of steel treating; the new concept of hardenability and its practical significance; standard steel grades and their properties and uses, etc.

McGraw-Hill Books of Timely Importance

Science and Life in the World

The George Westinghouse Centennial Forum. Three Volumes. Per set, boxed, $7.50

Vol. II. Transportation—A Measurement of Civilization. Light, Life, and man. 236 pages, $2.50
Vol. III. A Challenge to the World. 198 pages, $2.50

These three volumes contain a collection of ten addresses by leading scientists and educators, as they were delivered at the George Westinghouse Centennial Forum held in Pittsburgh in May, 1946. These significant papers collected here in permanent form represent the opinion and thought of the country’s outstanding scholars on many of the serious problems which face the world today as a result of our tremendous advance in scientific research and technology.

Functional Anatomy of the Mammal

Although based on a dissection of the cat, with descriptions of that form, this elementary text places considerable emphasis upon structural similarities and differences between the cat and man. Many comparative features are illustrated by figures. Functional aspects of anatomy are stressed.

College Technical Physics

A concise textbook in general physics at the college level for students of science and engineering. Topics selected as essential for a first year course are carefully developed. An unusually large number of solved problems aid in clarifying principles; and extensive lists of discussion questions follow the chapters.

As before, this textbook presents in logical sequence the principles of plant taxonomy and nomenclature and discusses representative families of plants. The book is applicable to all parts of the country. Most of the chapters have been thoroughly revised and amplified, some have been almost entirely rewritten, and a new one has been added on methods of identification.

Human Factors in Air Transport Design

By Ross A. McFarland, Harvard Graduate School of Business Administration. 670 pages, $6.00

Analyzes those factors in the design of air transport planes which influence the human organism in flight. The book represents an unusually complete compilation and interpretation of biological data which the aeronautical sciences can use to improve the efficiency of air crews and the safety and comfort of air travelers.

Phenoplasts—
Their Structure, Properties, and Chemical Technology
(High Polymers—Volume VII)

by T. S. Carswell
Commercial Solvents Corporation
Terre Haute, Indiana

CONTENTS (abbreviated)
1. History of the Development of Phenoplasts
2. Chemical Structure of the Phenoplasts
3. Phenoplasts from Higher Aldehydes
4. Phenoplasts from Polyhydric Phenols
5. Physical Structure of the Phenoplasts
6. Fillers for Phenoplast Molding Powder
7. Fillers and Resins for Phenoplast Laminates
8. Mechanical Properties of Molded Phenoplasts
9. Mechanical Properties of Laminated Phenoplasts
10. Electrical Properties of Phenoplasts
11. Thermal Properties of Phenoplasts
12. Chemical Resistance of Phenoplasts
13. Oil-Soluble Phenoplasts
14. Phenoplasts as Ion-Exchange Resins by DONALD S. HERR
15. Technical Manufacture of Phenoplasts
16. Molding Technique for Phenoplasts by CARL H. WHITLOCK
17. Miscellaneous Technical Applications of Phenoplasts

Cellulose and Cellulose Derivatives
(High Polymers—Volume V)

edited by Emil Ott
Director of Research, Hercules Powder Company
Wilmington, Delaware

Scientific Progress in the Field of
Rubber and Synthetic Elastomers
(Advances in Colloid Science—Volume II)

edited by H. Mark and G. S. Whitby
1946  494 pages  104 illustrations  $7.00

Advances in Colloid Science—Volume I.

edited by E. O. Kraemer
in collaboration with F. E. Bartell and S. S. Kistler
1942  446 pages  161 illustrations  $6.50

INTERSCIENCE PUBLISHERS, INC.
215 FOURTH AVENUE
NEW YORK 3, N. Y.
for Built-in Accuracy, Speed and Simplicity in Micro-Projection

VISUAL demonstrations of microscopic specimens are presented with exceptional speed and effectiveness by the Bausch & Lomb Model AA Micro-Projector. This complete unit offers utmost simplicity and convenience of operation. All optical parts are accurately aligned at correct relative distances, and mounted on a sturdy one-piece base. It is necessary only to center the light source, set the projector, insert the specimen, and focus. A high intensity, clock-feed arc illuminator assures adequate brilliance for sharp, distinct screen images. Equipped to accommodate objectives ranging from a 72mm Micro Tessar to a 4mm microscope objective, the Model AA Micro-Projector will handle a wide variety of specimens. Details available in Catalog E-20. Bausch & Lomb Optical Co., 642-A St. Paul Street, Rochester 2, New York.
