New Wiley Books

**INTRODUCTION TO THE THEORY OF EQUATIONS**

*By Lois W. Griffiths, Associate Professor of Mathematics, Northwestern University.*

Designed for students with a background of elementary work in plane trigonometry, plane analytic geometry, and differential calculus, this book is an introduction to the theory of equations, determinants, and matrices. Definitions are clear and precise, and the exposition detailed and logical. *Ready in June.*

Second Edition; Approximately 272 pages; 5½ by 8½; Probable price $3.50

**ROCKS AND ROCK MINERALS**

*By the late Louis V. Pirsson and Adolph Knopf, Sterling Professor of Geology, Yale University.*

The revision of "Rocks and Rock Minerals" makes available an entirely up-to-date edition of this book, an extraordinarily good and well-presented source of information on petrology on the mesoscopic level. Among the important features are: an improved classification of igneous rocks, a completely new discussion of sedimentary rocks, and a modern treatment of metamorphic rocks. *Ready in July.*

Third Edition; Approximately 349 pages; 5½ by 8½; Probable price $3.75

**COLLEGE PHYSICS**

*By John A. Eldridge, Professor of Physics, The State University of Iowa.*

The third edition has been thoroughly revised both by rewriting and by rearranging material. Discussions of the laws of statics and of fluid mechanics have been expanded and clarified. The section on radioactivity and nuclear physics has been recast in the light of recent knowledge. Hydrostatics rather than statics is introduced first in the section on mechanics. *Published in May.*

Third Edition; 720 pages; 5½ by 8½; $4.50

**LUMBER**

*By Nelson C. Brown, Professor of Forest Utilization, New York State College of Forestry, Syracuse University.*

A new book about the oldest industry in America, which presents a comprehensive treatment of the manufacture, conditioning, grading, distribution, and use of lumber. It provides the material necessary for students to learn and understand the most efficient and economical production methods. *Ready in July.*

Approximately 342 pages; 5½ by 8½; Probable price $4.00

Reprints of German scientific and technical books and periodicals, previously announced for publication under license from the U.S. Office of Alien Property Custodian, are being completed as fast as paper restrictions and binding difficulties permit.

Our present book publication rate is about 5 titles per month.

Additional titles are continually being added to the book list.

EXPERIMENTAL ANIMALS
DEPENDABLE UNIFORMITY

ALBINO RATS
CF WISTAR STRAIN

Developed after many years of careful inbreeding. Part of this colony is maintained on an optimum diet for experimental research. Another part, for use in biological assays, is fed a Vitamin D deficient diet.

CF Wistar rats have been the animal of choice in a number of laboratories for many years. Increased production enables us to offer them to a larger number of customers.

COLOR ATLAS OF HEMATOLOGY

with Brief Clinical Descriptions of Various Diseases

by Roy R. Kracke, M.D.

Dean and Professor of Clinical Medicine, Medical College of Alabama

Thirty-two plates in full color are the outstanding feature of Kracke's Color Atlas of Hematology. Only in full color illustrations of the blood cells could minor variations in diseases be so clearly illuminated, and with such conclusive, time-saving clarity. It covers virtually every known blood disease, incorporating brief clinical descriptions of each in the text. An excellent chapter on blood parasites, including malarial parasites, and the newest material on the Rh factor are other outstanding features. Important, helpful chapters discuss the leukopenic syndromes, splenomegalic diseases and splenectomy. Technicians will find particularly useful a section detailing modern hematologic techniques and definitions of terms. Factual descriptions of the origin of blood cells and the blood pictures of laboratory animals are also given. This working manual provides a wealth of painstakingly culled, profusely illustrated, specialized information never before found in an American book on this subject.

204 Pages • 32 Plates in Full Color

HIGH SPEED GEIGER-MULLER
LABORATORY SET MODEL GL532C

Every desirable feature incorporated into one complete instrument:

1. Regulated high voltage power supply for counter tube continuously variable up to 1500 volts. Regulates to within 1%.

2. Scaling ratios of 2, 4, 8, 16, and 32 can be selected by ratio switch on front panel.

3. Bank of numbered neon indicator lamps on front panel show proper operation of scaling circuits and provide means of interpolation between scaler stages.

4. Five separate power supplies for extremely stable operations and perfect circuit isolation.

BACKED BY 12 YEARS CONTINUOUS EXPERIENCE IN THE DESIGN, DEVELOPMENT AND MANUFACTURE OF HIGH QUALITY COMMERCIAL GEIGER-MULLER COUNTER APPARATUS.

PRICE: Counter Set $475.00

1000 SAMPLES in 33 INCHES of SHELF SPACE...

Here's the answer to a Big Problem

CONVENIENT, COMPACT, SAMPLE STORAGE SETS

for indexing and storing reference samples—100 samples in 3½ inches shelf space; 1000 samples in 33 inches. MODEL “A” SET, shown here stores 100 samples (about 10 ml volume) in 3½” shelf space.

ONE THOUSAND SAMPLES within 33 inches of shelf space

Choice of 4 Models

Complete with vials, corks, or caps...gummed labels and large index cards.

A...Contains 100 4½” x ½” vials. $3.25 each. $30. dos.
A-SC...Same as “A,” but with screw-capped vial. $5. each, $45. dos.
B...Contains 50 2½” x ½” vials. $2.50 each, $24. dos.
C...Contains 50 2½” x ½” vials. $2.50 each, $38. dos.

LaMOTTE STANDARDIZED pH INDICATORS

LaMotte Indicators are of the highest purity and are unequalled in strength and uniformity. They are supplied in crystal-line form and are available for various pH ranges from 0.2 to 10.4. Write for prices.

LaMOTTE BLOCK COMPARATOR

This compact LaMotte Outfit greatly facilitates simple, accurate Hydrogen Ion Control. It is especially recommended for the use of individual operators on any step of a process where a definite pH value must be maintained. Even with highly colored or turbid solutions determinations can easily be made with accuracy.

Complete with any one set of LaMotte Permanent Color Standards, together with a supply of the corresponding indicator solution, measuring pipette and marked test tubes. Complete $12.50 f.o.b. Towson, Maryland.

If you do not have the LaMotte “A B C of pH Control,” a complimentary copy will be sent upon request without obligation.

HEALTH and HYGIENE

By LLOYD ACKERMAN

"THIS comprehensive study of disease prevention and health promotion," says the American Scientist, "is a veritable mine of authoritative information." In terms popular enough to be understood by everyone, it points out how simple preventive measures can stop millions of cases of illness each year and thereby increase the life span of all. Material from all aspects of hygiene—physical, mental, social, and spiritual—is clearly presented.

908 pages—$4.50

HIDDEN HUNGER

By Icie G. Macy and Harold Williams

TWO nutritional experts have turned the historical and contemporary spotlight on the food we eat, and its relationship to our health and happiness. Their book corrects misconceptions of foods and diets; indicates late developments in nutrition experiment and practice. It shows how to avoid the physical degeneration due to a lack of balanced diet, and, in everyday terms, just what to do to combat "hidden hunger."

WE CAN MAKE A MIRROR SURFACE OF ALMOST ANY METAL!

Experience gained over the past ten years enables us to advise you intelligently regarding special mirror problems. Most of our customers find that our regular CHROMIUMUM, DUOLUX, and RHODIUM mirrors are precisely adapted for their purposes. But if you have in mind a problem involving the possible use of thin metallic films, get in touch with EVAPORATED at ITHACA.

Descriptive folder on request.

High-vacuum chambers are used in the production of our mirrors.
For Spectrochemical Analysis in Biology and Chemistry and for Instruction in Optics

The New Jaco Junior Spectrograph @ $1200.00

This 3 Meter Replica Grating Spectrograph offers dispersion and resolution hitherto unavailable in an inexpensive replica grating spectrograph. The instrument covers a range of 2200Å-7800Å on a 20' film at a dispersion of 10.9Å/mm. The Fe triplet 3099.94, 3100.33, 3100.67 can be resolved readily. The same quality construction employed in the Jaco Research 21' Spectrographs has been maintained throughout, so that the instrument is suited for serious analytical work. Research models with adjustable wavelength range are also available.

Make checks payable to the A.A.A.S. All insertions must be accompanied by correct remittance and sent to the Adv. Dept. A.A.A.S. Please address replies as follows: Box number, SCIENCE, 1515 Mass. Ave., N.W., Washington 5, D. C.

### POSITIONS WANTED

The California Medical Bureau, Agency for scientific and lay personnel in medicine, biology, chemistry, physics and allied sciences, supplies teachers, research workers, laboratory directors, skilled office help. Prompt service. Registration free. Your patronage respectfully solicited. The CALIFORNIA MEDICAL BUREAU, Agency, Arcade Medical Center, 906 Colorado Street, Pasadena 1, California.

**Biologist:** MS, MA, 18 years successful college teaching; comparative anatomy, histology, genetics, microbiology, bacteriology, biology. Primary interest teaching. Box 903, SCIENCE.

**Biophysiologist:** PhD. Interested in greater scope for research, some teaching, cooperative projects. Research experience in bio-electro potentials, tissue excitability, motor mechanisms, mathematical representation of biological systems, regulations. Box 900, SCIENCE.

**Mathematician:** PhD, experienced good instructor at leading universities, desires teaching position in New York City. Box 901, SCIENCE.

**Parasitologist—Zoologist:** PhD, 38, desires research-teaching position in parasitology and zoology in university, medical school, or college. Now available. Box 899, SCIENCE.

**Physicist:** PhD; ionic, nuclear physics background; university teaching experience; mass spectrometer, X-ray diffraction industrial experience; desires academic position primarily. Recently with National Geographic Eclipse Expedition. Immediately available. Box 904, SCIENCE.

**Zoologist:** MS, desires college teaching position in general biology, invertebrate zoology, vertebrate zoology and ecology. Box 902, SCIENCE.

**Zoologist, Ph.D. in August. Chief Interest: Vertebrates, Zoology, Physiology. Some teaching experience. Desires position with time for research. Box 884, Science.**

**Biochemist:** PhD; twelve years research experience in enzymatic, bacterial and antibiotic fields; interested either academic or commercial appointment. For further information, please write Burnice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

**Physiologist:** PhD degree; five years full time teaching; eight years in industry engaged in uncovering the electrical, optical, mechanical and thermal properties of high polymeric substances; for further information, please write Burnice Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

**Mathematician, Ph.D., 10 years experience research in applied mathematics. Now employed. Desires position in research or teaching. Box 903, SCIENCE.**

**Zoologist, Ph.D., woman. Desires new college appointment, September. Experienced teacher, general zoology, comparative and microscopic anatomy, embryology, genetics. Box 904, SCIENCE.**

Positions Open: (a) Chemist to take charge of health department registrations, patents and trade-marks, large pharmaceutical company, Middle West; preferably someone with background in pharmaceutical chemistry; should have knowledge of Spanish, German; BS degree or better. (b) Nutritionist to conduct research studies in nutrition research division of large company in Chicago area; PhD degree in nutrition or biochemistry required; no experience necessary. (c) Pharmacist with executive ability to become associated with large professional organization; duties include checking presentations of drugs and other products; preparation of reports to executive pharmacists; surveying literature for new claims, preparing bibliographies, interviewing industrial representatives, assembling information on special products; headquarters in Middle West. (d) Clinical psychologist, medical division—medical college; must be large industrial company. Western city of 125,000; (e) Biochemist or analytical chemist for research in the area of organic chemistry and in inorganic products; assistant to biochemist, research bacteriologist and, also, tissue technician; department of research utilizing having interesting long-range program. $3,02 Medical Bureau (Burnice Larson, Director), Palmolive Building, Chicago 11.

---

### Personnel Placement

**POSITIONS OPEN**

Attractive industrial research, production and sales positions for agriculturists; bacteriologists; chemists: analytical, biological, inorganic, organic, pharmaceutical, physical, chemical engineers; entomologists; geologists; horticultrurists; ecologists; medical technologists; pharmacists; physicians and surgeons; physicists; plant pathologists and physiologists. Chemical Department, Position Securing Bureau, Inc. (Agency) 45 John Street, New York City.

Universities and colleges throughout the United States are asking us for recommendations for positions on their staffs that need to be filled. Because the demand this year is so great, we are interested in further registration of those ready for advancement in professional rank and of those who would accept instructorship. Our service is nation wide.

**AMERICAN COLLEGE BUREAU**

28 E. Jackson Blvd. Chicago 4, Illinois

Administrative secretary in biology, also technical and administrative assistant to chairman of department, large university. Biological training desirable, especially in the assistant position. Box 477, SCIENCE.

**Applied biologist:** A young, growing research organization has the following opening: Applied biologist with background in bacteriology and biochemistry; experience with biological problems related to the basic industries of forestry, fisheries or agriculture. For qualified man position will lead to head of division. Maximum starting salary, $2000 per annum. Reply in confidence to British Columbia Research Council, Vancouver, British Columbia, Canada, stating education, experience and availability.

**Biologist, bacteriologist, botanist, zoologist, with MA or PhD degree, in college of Southwest.** Box 898, SCIENCE.

**Wanted:** Instructor in anatomy with degrees doctor from recognized university; age, not over 35 years. Write Dr. S. I. Kornhauser, 101 West Chestnut Street, Louisville 2, Ky.

... a Kodak color film you can process yourself

Ektachrome Film meets the need of the worker who wants to compare the finished photographic result in full color with his specimen while it is still set up.

The user processes it in his own darkroom in ninety minutes, without special equipment and with materials just as safe as ordinary developers. He obtains a positive transparency from which color prints can be made if wanted.

Ektachrome comes in the same standard sheet sizes as Kodachrome Professional Film, in both daylight and Type B (3200° K. source) color balance with approximately the same emulsion speeds.

Ektachrome Film and Ektachrome Processing Kits with complete instructions are now available and may be obtained from your Kodak dealer.

EASTMAN KODAK COMPANY
ROCHESTER 4, N. Y.
WITH a Spencer Bierbaum Microcharacter you can measure accurately the hardness of small areas, particles, and microscopic constituents of metals.

The specimen, highly polished and lubricated, is moved by micrometer feed beneath an accurately ground diamond point. The point is cube shaped for durability and ease of duplication. Pressure is precisely controlled so that hardness can be determined under the microscope by measuring the width of the resulting cut.

The Microcharacter is recommended for use with Spencer Metallurgical Microscopes. For further information write Dept. T3.
