Order these books now for Free Examination—

FOUNDATIONS OF SILVICULTURE UPON AN ECOLOGICAL BASIS
by the late JAMES W. TOUMEY and CLARENCE F. KORSTIAN, Professor of Silviculture and Dean, Duke University School of Forestry.

This book has long been recognized as a standard textbook in schools of forestry throughout the country. In this revised printing of the second edition, the material has been checked thoroughly for accuracy and the presentation has been clarified. In addition to minor alterations, certain portions have been expanded, such as the discussion of soil water, for the benefit of fuller explanation and for the inclusion of the latest information on various topics.

PHYSICS FOR STUDENTS OF SCIENCE AND ENGINEERING
by WILLIAM H. MICHEFNER, Assistant Professor of Physics, Carnegie Institute of Technology

Outstanding in—early introduction of the concept of area to represent work, elementary treatment of gyroscopic theory, derivations in kinetic theory, clear definition of the coefficient of viscosity. There is a minimum of derived formulas for students to use in handbook fashion. General principles are stressed throughout, with emphasis on the application of the principles to actual problems. The proper use of units and a workable method of converting units are also strongly stressed.

646 pages 5½ by 8½ $4.25

August, 1947.

PRINCIPLES OF MICROPALeONTOLOGY
by MARTIN F. GLAESSNER, Chief Paleontologist, Australasian Petroleum Company

A brief review of the main types of microfossils; a full discussion of the fossil representatives of the foraminiferida; the historical sequence of microfaunas, methods used in their detailed stratigraphic analysis, and examples of the application of microfaunal studies to problems of economic geology. An introduction to morphology and the discussion of taxonomy enable the student to analyze the observed structures and to use them correctly for the identification of fossils.

296 pages 6½ by 9½ $6.00

September, 1947.

CHEMICAL PROCESS PRINCIPLES
by O. A. HOUGEN and K. M. WATSON, Professors of Chemical Engineering, University of Wisconsin

Part I-Material and Energy Balances—Emphasis is on concise applications of physical chemistry, thermodynamics, thermochemistry and the first law of thermodynamics. Cites generalized procedures for estimating vapor pressures, critical constants, heats of vaporization. Presents new methods for dealing with equilibrium problems in extraction, adsorption, dissolution, crystallization. Includes effects of recycling, by-passing, changes of inventory, accumulation of inerta.

1943, 452 pages, 5½ by 8½. $5.00.

August, 1947; 412 pages; 5½ by 8½; $5.00.

Part II-Thermodynamics—Develops fundamental principles with emphasis on generalized methods used for estimating thermodynamic properties from sparse experimental data. Application of these principles is discussed in connection with problems in compression and expansion of fluids, power generation, and refrigeration.

Part III—Kinetics and Catalysis—A treatment of chemical kinetics applied to reactor design for nearly all types of reactions—homogeneous, heterogeneous, and catalytic. Covers temperature gradients and transient phenomena. Particular attention is given to the interpretation of pilot plant data and its application to design problems.

September, 1947; 348 pages; 5½ by 8½; $4.50.

IN A SINGLE, COMPACT UNIT
THIS TAYLOR COMPARATOR
gives you 6 big advantages
in checking pH or CHLORINE!

1. Economy—one single base may be
   used for pH, chlorine, many other
determinations

2. Speed—simple, 3-step operation

3. Convenience—all Taylor sets utilize
   colorimetric method of comparison
   with sets of liquid color standards...
   9 standards mounted in a plastic slide

4. Simplicity—eliminates nuisance of
   handling single color standards

5. Accuracy—Taylor Liquid Color Stan-
   dards carry an unlimited guarantee
   against fading

6. Durability—Taylor sets are made from
   strong, durable plastic ... lightweight,
   portable

Valuable Free Booklet!
This free booklet contains valuable in-
formation for all men concerned with
making tests of process liquids, boiler
water, etc. ... explains theory and ap-
plication and recommended practice. Also
contains complete catalog of Tay-
lor sets. See your dealer or write today
for your free copy....

New
Radically different!

"ZIRCONARC" 
PHOTOMICROGRAPHIC LAMP
For better black-and-white and
color photomicrographs

Combines the concentrated light of the Western Union arc
light bulb (about 1 mm dia.) with our fluorite-coated, 7-ele-
ment aplanatic optical system of highest correction, free from
chromatic aberration ... Device for double intensity expo-

eres ... Practically harmless to living cultures ... Built
with the same precision as the microscope itself ... Complete
with starting unit ... Order direct or from leading supply
dealers. Price $325.

PHOTOVOLT
Line-operated Electronic
pH METER

A Truly Universal Instrument
• for laboratory and industrial application
• for all types and designs of electrodes
• for pH, titration, and oxidation-reduction potentials
• for all AC power lines 90-275 volts 50-60 cycles
• available with or without portable wooden housing
• furnished with shielded glass electrode, available also with
  shielded compartment for unshielded electrodes

PHOTOVOLT CORP.
95 Madison Ave.
New York 16, N. Y.
Also: Colorimeters Electronic Photometers
Fluorescence Meters Densitometers
GEIGER-MUELLER
COUNTER APPARATUS

GM
COUNTER SCALING UNIT
MODEL GS-4

- An all-purpose scaling unit, proved over a period of years to be positive and reliable. Scaling ratio choice of 2, 4, 8, 16, 32 or 64.

- Built-in input amplifier having a gain of 170. Adequate for use with all standard self-extinguishing counters.

- Variable high voltage power supply—regulation better than \( \frac{1}{2} \) of 1%.

- Universal impulse register driving circuit. No spurious counts can be introduced by power line transients.

- Custom construction and highest quality components assure continuous, trouble-free operation.

TECHNICAL ASSOCIATES, 3730 San Fernando Road, Glendale 4, CALIFORNIA
Dear Fellow Scientists:

Since accepting the chairmanship of the Registration Committee for the December 26–31 meeting of the American Association for the Advancement of Science, I have come to realize how important registering for the meeting will be. I am sure those of you who plan to attend the meeting will agree with me, particularly as to advance registration, when you consider the following conditions.

(1) At times 50 to 60 scientific sessions will be held simultaneously by the 15 sections of the Association and the more than 50 cooperating societies. Therefore, sessions must be held in every important hotel in and near the Loop Area of Chicago. Your problem relative to the sessions will be—where, when, how to get there. The General Program, issued only to registrants, gives all the answers, and a Map. It will be indispensable, not only as a guide to the many sessions, but also, if you register in advance, it will enable you to plan unhurriedly the best use of your time during the meeting.

(2) Even if you have the program in your own specialty, you will want to attend important sessions in related fields. Widening horizons are now characteristic of science as never before, and the Association meetings provide unparalleled opportunities for becoming acquainted with specialists in many fields. The General Program will give you the where, when, and how to get there, with a great saving in time and taxi fares.

(3) You will want to find your friends during the meeting and you will want them to find you. That will be no needle-in-the-haystack problem if you are registered and have the General Program. The names of those registered in advance of the meeting will be on the Visible Directory, open for inspection adjacent to the International Science Exhibition in the Stevens Hotel. The Visible Directory is also an invisible directory, meaning that you can obtain the address, by telephone, of any person registered in advance for the meeting. All you will have to do is telephone the attendant in charge of the Visible Directory at the Stevens Hotel.

(4) In addition to listing the titles of papers and authors, the General Program will contain an index of the names and institutions of all persons on every program of the meeting. That is obviously something to keep. Every person registering will have a copy of it. There are other good reasons why you should register, but I will use the remaining space to ask you to fill in promptly, carefully and fully the registration blank below and send it now to the A A A S Office in Washington with your check for the registration fee (see blank). You will then receive your copy of the General Program early in December.

Cordially yours,
HANS O. HOEPFNER
University of Chicago

Achieving a Standardized Product

Nature is infinitely varied in the production of living things. It is our business to limit variation in the interests of science. By strict control of genetic factors and environment we are able to offer animals of dependable uniformity for biological purposes.

We have large colonies of mice, rats and guinea pigs all carefully standardized for research work. Your inquiries are invited.

and for Instruction in Optics

The New Jaco Junior Spectrograph
@ $1200.00

This 3 Meter Replica Grating Spectrograph offers dispersion and resolution hitherto unavailable in an inexpensive replica grating spectrograph. The instrument covers a range of 2200Å-7800Å on a 20" film at a dispersion of 10.9Å/mm. The Fe triplet 3099.94, 3100.33, 3100.67 can be resolved readily. The same quality construction employed in the Jaco Research 21' Spectrographs has been maintained throughout, so that the instrument is suited for serious analytical work.

Research models with adjustable wavelength range are also available.

CHARGES FOR CLASSIFIED ADVERTISING
Regular setting 10¢ a word. Minimum charge $2.50 for each insertion. A box number counts as 8 words of the advertisement (e.g. 20 words plus box number equals 33 words). Make checks payable to the A.A.A.S. All insertions must be accompanied by correct remittance and sent to the Adv. Dept. A.A.A.S. Please address replies as follows: Box number, SCIENCE, 1515 Mass. Ave., N.W., Washington 5, D.C.

POSITIONS WANTED

The California Medical Bureau, Agency for scientific and lay personnel in medicine, biology, chemistry, physics and allied sciences, supplies teachers, research workers, laboratory dieters, skilled office help. Prompt service. Registration fee. Your patronage respectfully solicited. THE CALIFORNIA MEDICAL BUREAU, Agency, Arcade Medical Center, 696 Colorado Street, Pasadena 1, California.

Mechanical Engineer: For operation and maintenance of scientific observation post, preferably in tropical ocean, with enough freedom from administrative duties to allow for active personal research program. Age 42. Extensive experience. Present salary and allowances $5500; will accept less for permanence and research. Box 116 A, SCIENCE.

Physicist is available for appointment, preferably in industry; Masters degree in physics; has specialized in measurement techniques; now assistant professor of physics, middle western university; for further information, please write Bur nive Larson, Director, Medical Bureau, Palmolive Building, Chicago 11.

Research Assistant: BA Zoology, Chemistry minor, young woman, 3 years experience, biotechnical techniques, no geographical restrictions. Box 111 A, SCIENCE.

POSITIONS OPEN

Editorial Assistant: Requirements: Background in biology, biochemistry or medicine; editorial, writing and research experience; typing ability. Please send details, with photo, to Medical Editor, M. D. Anderson Hospital for Cancer Research, Houston, Texas.

Good positions open for electronmicroscopists; spectrochemical analysts; physical process draftsmen; chemical engineers; physical chemists: radioactivity, colloid; physicists: gas kinetics, molecular spectroscopy, degrading, general classical, cathode ray tube, and recent grade BS, MS and Ph.D. Position Security Bureau, Inc., 45 John Street, New York City.

Positions Open: (a) Biochemist, preferably one whose background and qualifications are in protein and cellular biochemistry; cancer department, university hospital. (b) Physiologist or psychologist; should be interested in measurement of reactions of people to physiological stimuli; research department, university medical school; $4800. (c) Mycologist, PhD with knowledge of genetics and biochemistry to carry out fundamental research in antibiotics and, also, microbiologist with Bachelors degree to assist in fundamental microbiological research; excellent opportunities in newly-organized laboratories-industrial company; East. (d) Assistant professor of biophysics; PhD degree with research in the field of electrophoresis; $3000-3500. (e) Physicist interested in classical physical measurements; research department, university medical school; $4800. (f) Chemist capable of assuming charge of chemical control of manufacturing operations; pharmaceutical company having expansion program; Middle West. (g) Bacteriologist to assist or, if qualified, to direct teaching of bacteriology in eastern medical school; should be qualified to supervise all bacteriology done in teaching hospital: $6000-6500. S11-1, Medical Bureau (Bur nive Larson, Director) Palmolive Building, Chicago 11.

These advertisements will be read by more than 25,000 scientists in all fields.
Sell your product or services through an advertisement in these columns.
SCIENCE, 1515 Massachusetts Avenue N. W., Washington 5, D. C.

WESTINGHOUSE RESEARCH

Immediate Openings in Pittsburgh

Physicist of Ph.D. level interested in the theory of the solid state to do fundamental work in ferromagnetism

Physicist of Ph.D. level to do fundamental work in gas discharge.

Physicist or Mechanical Engineer of Ph.D. level to do research work in the field of friction under extreme pressures over a wide range of temperatures.

Instrumentation Engineer to manage our instrument activity.

Research Physicist or Vacuum Tube Research Engineer with some training in vacuum tube or x-rays desirable.

Research Physicist or Vacuum Tube Research Engineer to work on design of high power ultra-high frequency oscillator tubes.

Circuit Development Engineer or Physicist to design electronic devices for industrial applications for industrial test and processing.

Research Physicist interested in the fundamental properties of propagation, absorption and scattering of microwaves.

Nuclear Research Physicist for fundamental research in nuclear physical phenomena.

Nuclear Research Physicist or Electronics Engineer interested in development of circuits and equipment for measurement of nuclear processes, detection, and measurement of nuclear radiations.

Top Flight Research Physicist or Engineer capable of leading group on underwater sound developments.

Research Engineer or Physicist interested in basic studies of underwater sound phenomena.

For application address
Manager, Technical Employment,
306-4th Avenue, Pittsburgh, Pennsylvania.
**Personnel Placement**

**POSITIONS OPEN**

**Bacteriologist:** PhD, with specialized training in virology, medical bacteriology, and immunology. Position is with the Research Department of large biological firm. Salary $4500-4800. Box 113 A, SCIENCE.

**Economic Entomologist:** To serve in technical service capacity for prominent manufacturer of insecticides and fumigants. Duties will include technical liaison between sales, research and customers. Travel required from New York City base. Fundamental training in entomology, and some field experience required. Include resume of training, experience, personal data, salary requirements and recent snapshot, if available, in reply. Box 114 A, SCIENCE.

**Mathematical Physicist:** Required for the theoretical physics branch of the research division. Requirements include honors degree in mathematics with at least three years postgraduate training or experience in applied mathematics. A good working knowledge of quantum mechanics is necessary. Good accommodation available. State age, marital status, qualifications in first letter, quoting File 9-F, to National Research Council, Atomic Energy Project, Chalk River, Ontario, Canada.

**Virologist or Bacteriologist:** PhD. Production and developmental research in Virus Department of a large eastern pharmaceutical and biological house. Position carries considerable responsibility. Salary commensurate with training and experience. Replies held in confidence. Box 115 A, SCIENCE.

Fundamentals in Chemical Process Calculations
By OTTO L. KOWALKE
Professor of Chemical Engineering, University of Wisconsin

This text is designed to give chemical engineering students an introduction to the industrial applications of fundamental chemical principles and practice in solving problems typical of those arising in the chemical process industries. Clearly written and well organized, it can be used as early as the sophomore year, and gives the student a valuable review of the important principles of general chemistry, elementary physical chemistry, and thermodynamics. The topics have been chosen for their usefulness in subsequent studies of unit operations and of projects in chemical manufacture.

To be published in the fall. $3.00 (probable)

Principles of Chemistry
Fifth Edition
By JOEL H. HILDEBRAND
Professor of Chemistry, University of California

Extensively revised, the fifth edition of this well-known text contains new chapters on carbonic acid, and its ions, systems of acids and bases, and the structure of inorganic compounds—as well as numerous alterations and additions throughout the text to bring it up-to-date. Sections have been added on polymers, silicones, and transuranium elements, and recent discoveries in atomic structure have been included.

Published this fall. $4.25

Organic Evolution
Reissue with corrections and emendations
By RICHARD S. LULL
Sterling Professor of Paleontology, Yale University

Dealing with the history of evolution; the classification of organisms, and their distribution in space and time; the factors and mechanism of evolution, and the evidences of evolution, this reissue contains all the corrections made necessary by the advance of paleontological knowledge since 1929. The organization, emphasis and treatment of textual material remain the same.

Published this fall. $8.00

HEMOGLOBIN DETERMINATION

at the Bedside

With the NEW SPENCER Hb-Meter you can obtain rapid determinations at the office, hospital, or patient's bedside... readings that give laboratory accuracy.

Employing an amazingly simple technic for blood hemolysis, the Hb-Meter requires no diluting fluids nor volumetric measurements, no tables nor calibration curves. The results appear directly in grams per 100 ml. or in terms of percentage of normal for any of three recognized standards.

See your local supplier for complete information about this inexpensive pocket-sized diagnostic aid or write Dept. AX.
