New Wiley books for study and reference—

COMPARATIVE PHYSIOLOGY
by Bradley T. Scheer, Assistant Professor of Biochemistry, University of Southern California.

Material is organized in this book from over 1,000 original papers, to make a study of each of the major animal phyla. The phylogenetic method is used throughout; each section gives for a single phylum, material on nutrition, feeding, digestion, circulation, respiration, metabolism, excretion, regulation of the internal environment, and the neuromuscular system. Important ecological and evolutionary developments are discussed in summaries of each chapter.

Ready in February Approximately 549 pages
Probable price, $5.50

FUNDAMENTALS OF PHOTOGRAPHIC THEORY
by Thomas H. James and George C. Higgins, both of Eastman Kodak Research Laboratories.

A general account, based on fundamental physical and chemical concepts. Contents include: the light-sensitive material; photographic emulsion; formation of the latent image; exposure effects; mechanism of development; composition and reactions of developer; general kinetics of development; fixing, washing; Sensitometry—exposure and development, density and its measurement, interpretation of sensitometric data; theory of tone reproduction; structure of the developed photographic image; sensitizing and desensitizing.

Ready in January Approximately 290 pages
Probable price, $4.00

NOMOGRAPHY
by Alexander S. Levens, Associate Professor of Mechanical Engineering, University of California at Berkeley.

This book gives basic information on the theory and construction of charts involving straight line scales, curved scales, and combinations of these two. Both the Cartesian coordinate and the alignment chart are discussed, with special emphasis on the latter method. Examples of the uses of these charts are given in a variety of technical fields, and exercises are included for practice.

Ready in January $3.00 176 pages

ALCONOX
Cleans Better, too

What's your toughest cleaning problem? Give it to Alconox, the soapless cleanser that works on a new principle. Tests show Alconox removes grit, grease, grime, dirt from hard-to-clean glass, metal, porcelain ware, etc., at least 15% to 21% faster than soap cleansers.

Leaves them sparkling. No film; no streaks. Contains no soap, yet gives rich suds even in hard water. Amazingly economical in cost and storage. One spoonful makes a gallon of active cleaner.

Cleans Brilliantly
Glassware
Metalware
Porcelainware
Pipeettes
Cloth, Walls

Used By Leading
Laboratories
Hospitals
Bottling plants
Food processors
Chemical works

TOWARD GENERAL EDUCATION
By Earl J. McGrath and Others

Here is a thoughtful program of general education presented in a series of discussions by Earl J. McGrath, Dean of the College of Liberal Arts, The State University of Iowa, and nine faculty members. With the student as a future citizen as the focal point of their thinking, the authors deal primarily with the elementary knowledge, skills, and attitudes necessary to fulfilling the responsibilities of an intelligent and informed citizenship.

To be published in January. $8.00 (probable)

POWDER METALLURGY
By Paul Schwarzkopf

This important new book for metallurgists is, in effect, the revised and expanded notebook of one of the pioneer metallurgists—a man whose life work has been an integral part of the whole scientific and industrial development of powder metallurgy. This book contains a great deal of invaluable information about the industrial processing of metal powders and the products obtainable. It also contains a review of the theories on which powder metallurgy is based.

Published October 28, 1947. $8.00

DYNAMIC ASPECTS OF BIOCHEMISTRY
By Ernest Baldwin

Containing the essential information which has been established in the last few decades with the most recent findings in the field, this new text covers the fundamental aspects of biochemistry in a clear and lucid manner. It gives a coherent exposition of the entire subject as well as a critical account of the facts, and gives a clear picture of the various phases of metabolism and digestion, and of the relationship of enzymes to these functions of the animal body. 27 tables, 34 figures and diagrams.

Published November 18, 1947. $4.00

THE LOGIC OF THE SCIENCES AND THE HUMANITIES
By F. S. C. Northrop

In this outstanding treatise on logic and scientific method, the author conceives logic in the broadest possible manner to include any form of knowing in religion and art as well as the sciences proper. He presents an analysis of the different scientific methods of the natural and social sciences and the humanities, and studies each method in connection with the specific content of a specific science. Special attention is given to the scientific method for solving moral and social problems of value.

Published December 1, 1947. $4.50

THE NEW
LaMOTTE WATER SOLUBLE
pH INDICATORS
(Sulfon-phthalein) pH 0.2–9.6

These products were originally developed in the LaMotte laboratories and are of the same superior quality as the acid form indicators hitherto available for pH work.

They have the distinct advantage of being instantly soluble in distilled water, hence are easy to convert to solution form. Use of alkali, as in the older technic is eliminated, and no heating is necessary.

The clean, quick way to prepare indicator solutions for accurate pH work.

Personnel Placement

POSITIONS OPEN

Post-Doctorate Fellowship, synthetic organic chemistry, at mid-west university, to start immediately. Knowledge of pyridimide and biochemistry helpful but not required. Salary $3,600-4,000. Send photograph and credentials. Box 144A, SCIENCE.

Positions Open: (a) Pharmaceutical research executive; Middle West. (b) Biochemist planning career in biochemistry and interested in obtaining experience in clinical biochemistry, or young physician trained in biochemistry and interested in research for research appointment; department of pharmacy, university medical school; $4,000. (c) Associate professor in bacteriology; considerable experience with virus infections required; Ph.D. or M.D.; $5,000; Middle West. (d) Chemist or pharmacist with executive ability to serve as chief chemist; duties consist of supervising plant pharmaceutical and chemical research including plant analytical and control laboratories; Ph.D. preferred; East. (e) Chief technochinian; should be trained especially in either bacteriology or chemistry; duties include supervising work of six technicians; large general hospital; $3,600-4,200; Pacific Coast. (f) Professor of pharmaceutical chemistry; preferably one who can report February 1; university school of pharmacy. $1-2, Medical Bureau Burneice Larson, Director, Palmolive Building, Chicago 11.

Bacteriological assistant; aerosol therapy of lungs; work in laboratory and wards at Seaview Hospital, Staten Island, N. Y. Write, stating full qualifications, salary expected, to Dr. Harold A. Abramson, 133 East 58th Street, New York City.

Biologist: preferably zoologist or bacteriologist wanted by Eastern urban university. Research encouraged. Possible headship of department. Box 159A, SCIENCE.

Physicist: Ph.D., potential headship of department in Eastern urban university. Research opportunities. Salary to $5,000. Box 160A, SCIENCE.

Unusual opportunity for the right man as research associate, with special training in endocrinology, to collaborate on the physiological factors underlying the native resistance to infection. Eastern university connections. Beginning salary $4,500. Project for at least three years. Box 161A, SCIENCE.

BIOLOGISTS WANTED

to staff a new division in the Game and Fisheries Branch, Department of Mines and Natural Resources, Province of Manitoba, Canada. Duties will involve original research in the field of fisheries and wild life management and in working out practical management techniques.

Permanent Civil Service positions with salaries varying from $2,400 to $4,200 per annum, depending on qualifications, experience and duties assigned. Apply at once to:

MANITOBA CIVIL SERVICE COMMISSION

247 Legislative Bldg., Winnipeg, Canada
or, in Canada, to your nearest National Employment Service office.

HEADQUARTERS FOR COLORIMETRIC APPARATUS
NEW!

2 x 2” Slide and Strip Film PROJECTORS
Gives you 3 in 1

1. 2 x 2” Slide Projector
2. Viewer for Small Group or Individual Use
3. Microfilm and Strip Film Projector (single frame)

Viewlex Projectors give you a complete, self-contained portable projector outfit . . . accurate, clear, true to life color renditions without over-balance of green. It can be used by anyone, anywhere, at any time . . . on a desk, table or counter . . . you obtain brilliant pictures with lights on or off.

Viewlex Projectors use aspheric condensers . . . the 150 watt projection lamp gives greater screen brightness than other projectors give with 300 watts. This means less heat, greater safety to films and slides, and lower operating cost. A demonstration will clearly prove the superiority of the Viewlex.

A-1585 MODEL AP-1 — 2” Luxtar Lens, Coated Optics for slides only, complete with case, screen and built-in Slide File.
$64.50 ea.

A-1586 MODEL AP-1C — 2” Luxtar Lens, Coated Optics, Combination Slide and Strip Film, complete with case, screen and built-in Slide File.
$77.00 ea.

A-1589 FOR DISTANT PROJECTION—5” Accessory, Aspheric Condenser and Luxtar Color corrected, Anastigmat Lens.
$19.95 ea.

CLAY-ADAMS CO. INC.
44 EAST 23rd STREET, NEW YORK 10, N. Y.
The new TRACERLAB SU-1 RADIATION SURVEY METER and FILM BADGE SERVICE are designed to answer the problem of personnel monitoring. The SU-1, a sensitive, ionization chamber type meter indicating true Roentgen dosage, is patterned after the popular A.E.C. "Cutie-Pie" monitor. Light weight plus complete portability make the SU-1 an invaluable asset to the worker in radioactivity.

Tracerlab fills all your needs in radiochemistry. Write for descriptive literature. Monthly publication TRACERLOG sent upon request.
In Sectioning Biological Specimens

Biologists, instructors, and students alike find it easy to cut sections accurately with these Spencer Microtomes:

No. 810 Rotary Microtome (above) — an instrument with automatic feed mechanism for rapid, uniform serial sectioning.

No. 900 Table Microtome — a low priced model for cutting uniform sections by hand.
