Twice every minute the TECHNICON Pipette Washer completes its syphon-cycle... seven surging gallons of water to loosen and dislodge clinging residues. Wastes are then literally swept out of the pipettes by the violent suction set up during the brisk ten-second emptying phase.

Only the Technicon washer offers such rapidity and thoroughness, delivering in six cycles a full basket-load of immaculate pipettes (capacity 200 of 1 ml in 100th's, up to 18" long). The stainless steel basket, proof against corrosive reagents, carries its load of pipettes undisturbed through every stage: cleansing, washing and drying. Requires no individual handling, no shifting from container to container, practically eliminates breakage and chippage. A must for the busy laboratory: let us send you Bulletin #6150 giving particulars.

No fuss or muss... pipette washing can be as easy as this
DeGowin, Hardin & Alsever on BLOOD TRANSFUSION

This brand new book (the only one of its kind in print, to our knowledge) is a very thorough and detailed study of all aspects of blood transfusion—both whole blood and plasma. There is historical material, laboratory data, explanations and illustrations of technic of all types of transfusion, information on blood banks, etc. All three co-authors have vast experience in the field and their findings, as set forth in this book, are backed by great authority.

Blood Transfusion. By Elmer L. DeGowin, M.D., and Robert C. Hardin, M.D., Associate Professors of Medicine, State University of Iowa; and Richard B. Alsever, M.D., United States Public Health Service. 587 pages, with 180 illustrations.

Lyons & Woodhall’s ATLAS of PERIPHERAL NERVE INJURIES

The brilliance and clarity of the illustrations in this new book almost defy description. The pages are extra-large (10” x 12¼”) in order to present to best advantage the magnificent surgical photographs. The pictures are on right-hand pages, with explanatory legends on the facing left-hand pages. This is the definitive work in the field.

Atlas of Peripheral Nerve Injuries. By William R. Lyons, Ph.D., Associate Professor of Anatomy, University of California Medical School; and Barnes Woodhall, M.D., Professor of Neurosurgery, Duke Medical School. 399 pages with hundreds of illustrations on 135 plates, 16 in color.

the most modern laboratory furniture in the world

Moduline, by Aloe, comes in architectural approved widths and depths so that custom-built laboratory facilities may be developed from standard Moduline units. Notice these details: concealed hinges; baked steel finishes with stainless steel table tops; Furnished with or without reagent shelves. Utilities can be top or splashback mounted. No working space is taken up with utilities. Each new installation is convincing more persons that Moduline is the most functional, practical, laboratory furniture ever designed. Write for special booklet T-300 and learn how Moduline can help solve your furniture problems.

Special schematic layouts for laboratories available on request.

THE THYROID AND ITS DISEASES
by J. H. Means, M.D.

The new, fully revised, second edition of this authoritative work is made up of comparative case records covering the etiology, diagnosis, prognosis and treatment of thyroid diseases and disorders; the results of extensive studies by a distinguished specialist and his associates at the Thyroid Clinic of the Massachusetts General Hospital. 2nd Edition. 620 Pages. Illustrated. $12.00

Viral and Rickettsial Infections of Man, edited by Thomas M. Rivers, M.D. $5.00

Bacterial and Mycotic Infections of Man, edited by René J. Dubos, M.D. $5.00

Symposium on Medicolegal Problems, edited by Samuel Levinson, M.D., Ph.D.

Volume I: Includes important contributions on Artificial Insemination—on Operations to Produce Sterility, et al. $5.00

Uterine Contractility in Pregnancy, by Douglas P. Murphy, M.D., F.A.C.S. $5.00

Congenital Malformations: A Study of Prenatal Characteristics with Special Reference to the Reproductive Process, by Douglas P. Murphy, M.D., F.A.C.S. $5.00

Calcific Disease of the Aortic Valve, by Howard T. Karsner, M.D.

and Simon Koletsky, M.D. $5.00

Now... the best team ever for Personnel Protection

The new, improved, all-electronic Model 2050 Charge-Read Meter. Easiest-to-read, easiest-to-operate meter of its type. Observations are easily made on a large three-inch meter. Requires no special training to operate. Stable operation even with a-c variation from 95 to 130 volts. Convenient storage for up to seven pocket chambers.

Sturdier than ever before... and now smaller Model 3340 Pocket Chamber. Smaller and more rugged for more convenient use and extra serviceability. The accepted standard in sealed ionization pocket chambers. Clips to shirt or coat pocket. Capacity .2 roentgen. Shock-proof, moisture-proof, accurate. Each instrument numbered for recording.

Here is the twin solution to the protection of workers exposed to gamma and x radiation. Every possible refinement of convenience and reliability distinguishes these two precise but rugged instruments. Inquire about this up-to-date, dependable Nuclear system for personnel protection.

Nuclear has the instruments... and the application know-how... Consult—

In the Spotlight

Never has an opaque projector been so amazingly successful as the Beseler Model OA3. This outstanding opaque projector has met with an enthusiastic reception in both education and industry. Its ability to accommodate a full 8½ x 11 page has opened up many new possibilities in the projection of opaque material.

BESELER MODEL OA3

Has a copy opening of 7½ x 10—big enough to cover 8½ x 11 pages in magazines and books.
Brilliant screen illumination
1000 watts — Air cooled

For literature describing Model OA3 and other Beseler Projectors, write for Booklet B.

The World's Largest Manufacturer of Opaque Projection Equipment
Cut Analytical Costs TWO WAYS with...

1. TIME-SAVING SPECTRUM PLATE PROJECTOR and CHARTS

- For ease of operation—speed, convenience and greater accuracy in examination of spectrum plates—for line identification, measuring wave lengths and preparing for densitometry, there is no instrument like the B&L Spectrum Projector. Here is a projector that delivers a clear, sharp, magnified image of the spectrum...one that can be easily compared to the B&L iron arc spectrum charts. These charts are supplied as optional equipment.

2. HIGH-SPEED ELECTRODE SHAPER

- Now you can turn the ends of graphite electrodes to any desired form much faster and easier with a B&L Electrode Shaper. This small "turret lathe" is simple to operate. Simply adjust for the desired cutting tool combination, insert the graphite rod, and move turret into shaping position. Motor starts and stops automatically. Any four cutting tool set-ups can be maintained at one time.
