New information on diverse sciences

COMPARATIVE ANATOMY
By Leverett A. Adams, University of Illinois
and Samuel Eddy, University of Minnesota.

Designed for an introductory vertebrate zoology course, this textbook is presented in two parts. The first reviews the classification of different groups of vertebrates with a comprehensive glossary of short definitions of common zoological terms for the beginning student. The second and major part of the book concentrates on comparative study of the organ systems of the various groups. Human anatomy is not overemphasized at the expense of comparative study but is presented in a ratio equally well suited for the general or pre-medical student. The book is illustrated with exceptionally clear line drawings.

February 1949    Approx. 478 pages    364 illus.    Prob. $5.00

INDUSTRIAL RHEOLOGY AND RHEOLOGICAL STRUCTURES
By the late Henry Green, formerly with the Interchemical Corporation.

A manual and scientific working guide presenting for the first time the unique correlation of rheological and microscopical investigations for those working with printing inks, paints, oils, plastics, food, and related articles.

February 1949    Approx. 311 pages    Illus.    Prob. $5.00

RADIOACTIVE MEASUREMENTS WITH NUCLEAR EMULSIONS
By Herman Yagoda, Physical Chemist, National Institute of Health.

The author describes in detail practical methods by which photographic emulsions can be used to measure radioactivity. Explanations of the theory underlying nuclear emulsion technique are largely non-mathematical.

March 1949    Approx. 300 pages    Prob. price, $5.00

JOHN WILEY & SONS, Inc., 440 Fourth Avenue, New York 16, N. Y.
The Scaling Unit with a Future!

Use it 3 ways...

with this one instrument you can do...

1. Geiger counting
2. Proportional counting
3. Scintillation counting

Most nuclear research work today is done with Geiger and proportional counters—and probably will be for a long time to come. Yet the trend in research is toward the use of scintillation counters for all types of work.

Nuclear's Model 162 Scaler is a highly adaptable instrument that will fit into your instrumentation plans... now and in the future. It is already in use in many laboratories with various kinds of counters.

Investigate the possibility of using this versatile instrument in your work. We will be glad to send full information on request.

INTRODUCTION TO COLLEGE GEOLOGY

By Chauncey D. Holmes

Associate Professor of Geology and Geography, University of Missouri

This new book for one-semester courses in elementary geology introduces the student to the whole field. It stresses the general educational values of the science, as well as providing an adequate foundation for more advanced courses. Completely up to date, amply illustrated, it contains all the technical information usually required of the elementary student. To be published this spring. $4.00 (probable)

GENERAL CHEMISTRY, Fifth Edition

By Harry N. Holmes

Professor Emeritus of Chemistry, Oberlin College

Famous for its wealth of descriptive material, the new fifth edition of this best selling chemistry text keeps pace with the rapid change in theory, and application to industry which has taken place since the previous edition. To be published in April. $5.00 (probable)

A LABORATORY MANUAL OF GENERAL CHEMISTRY, 5th edition will also be available this spring.

FUNDAMENTALS OF COMPARATIVE EMBRYOLOGY OF THE VERTEBRATES,

Revised Edition

By Alfred F. Huettner

Professor and Chairman of the Department of Biology, Queens College

Maintaining the same general plan of organization and morphological point of view, the revised edition of this popular text has been brought completely up to date. Two completely new chapters have been added; one on the histories and theories of development, and the other on the embryology of the mammal. The original drawings by the author are unsurpassed in biological textbooks. To be published in April. $6.00 (probable)

COLLEGE BOTANY

By Hylander and Stanley

This new text is designed for a full-year course in general botany. Part I discusses the individual plant and its life problems, using a woody green plant to introduce the student to the basic facts of plant morphology, histology, and cell structure and function; Part II deals with plants as groups in our large vegetation complex. To be published in April. $6.00 (probable)

C. J. HYLANDER is the former Chairman of the Botany Department, Colgate University; ORAN B. STANLEY is Associate Professor of Botany, Colgate University.

THE MACMILLAN COMPANY 60 Fifth Avenue New York 11
Cyclotron Specialties Impulse Registers were originally designed to meet the exacting requirements of radio-activity research workers. Their outstanding performance has attained for them acceptance in nearly every scientific field and today, many special types are in use by scientific workers throughout the world.

Cyclotron Specialties Registers are unique in their ability to operate at exceptionally high speeds with complete accuracy and without adjustment or maintenance. They are unexcelled for high speed impulse recording and mechanical operations requiring counting in precise quantities.

In addition to the Cyclotron Specialties Registers illustrated, other types include higher speeds, electrical reset, add and subtract type and higher totalization. Inquiries for these special types will receive prompt attention.

An Unusual Line of
IMPULSE
REGISTERS

FLUSH MOUNTED Type
with single hole mounting
and plastic case. Widely
used for panel mounting.

TYPE 401-A with fully en-
closed plastic desk case
and non-removable-top
binding posts. See the
complete specifications
below.

SPECIFICATIONS OF IMPULSE REGISTER NO. 401-A
Accurately Registers Up to 60 Impulses Per Second
Main, easily-read sweep dial reads 0 to 100 directly
Sweep dial plus auxiliaries read 0 to 9,999 impulses without extra equipment
4000 ohm B.C. resistance
Operates on as low as 100 milliwatt
Small, compact, light weight
Durable, rugged construction to withstand unavoidable accidents
Dimensions: 3" x 4" Weight: 2 lbs.

FLUSH MOUNTED Type
with four auxiliary dials
making possible direct
readings to 999,999 im-
pulses. Similar in con-
struction to regular Flush
Mounting.
FIELDBOOK OF NATURAL HISTORY

By E. LAURENCE PALMER

Professor of Nature and Science Education
Cornell University

662 pages, 6 x 9, illustrated
Textbook edition, $5.00

Here, in one convenient volume, is an extraordinarily comprehensive guide to natural history. Professor Palmer’s fieldbook embraces birds, fish, plants, rocks and minerals, the stars, mollusks, reptiles, and animals—more than 2000 items and hundreds of pictures arranged and tabulated for easy reference. Each item has its descriptive identification, followed by data on range and location, life history, ecology, and economic importance. Furthermore, each item is illustrated with a detailed drawing. Common names are given in every case, and for the advanced student of natural science, technical classifications of division, order, and family are provided.

QUANTUM MECHANICS

Designed as a textbook for senior mathematics and physics majors and graduate students, this book seeks to provide a comprehensive treatment of the subject of quantum mechanics in a single volume of moderate size. The purpose of the book is threefold: (1) to explain the physical concepts of quantum mechanics, (2) to describe the mathematical formalism, and (3) to present illustrative examples of both the ideas and the methods.

INTRODUCTION TO HISTORICAL GEOLOGY

By Raymond C. Moore, University of Kansas. 542 pages, $5.00

In this distinctive new textbook a universally recognized authority presents an exceptionally readable, well organized account of the important features of earth history, including plants and animals recorded by fossils. Avoiding technical terminology, the author makes clearly understandable how observed geologic features furnish records of past conditions and events.

Send for copies on approval

McGRAW-HILL BOOK COMPANY, INC.
330 WEST 42ND STREET, NEW YORK 18, N. Y.
THE many users of Nyssco Biology Charts throughout the country have frequently requested that we publish a series of test and laboratory notebook sheets, $8\frac{1}{2}'' \times 11''$ in size, based on, and supplementing, our series of Nyssco Biology Charts. We are therefore offering a series of 73 of these sheets, which have been approved and are now included in the Science Supply List of the New York City Board of Education.

Features and advantages in using Nyssco BT Sheets are as follows:

1. The figures are the same fine illustrations used in our Nyssco Biology Charts, reduced to notebook size.
2. As the illustrations are all unlabeled (only lead lines showing), these sheets are excellent for testing the student or for inclusion in his laboratory notebook.
3. Enhance the appearance of the student's laboratory notebook, and therefore result in greater pride in his work.
4. Save an immense amount of time taken up in drawing in the laboratory, especially for students not too adept at drawing.

Supplied in convenient packages of 12, 50, and 100 sheets. Ask for complete list of titles and sample sheets.

Order sample set of the series of 73 sheets ($2.25), one of each title, from which you can order the titles best suited to your own courses.

PLEASE!

IF YOU ARE CHANGING YOUR ADDRESS, please let us know, if possible, four weeks in advance, giving old as well as new address, and adding zone number to meet postal requirements. If you are unable to notify us, so as to affect succeeding issues, kindly leave instructions and postage with your postmaster for forwarding your copy. Second class matter requires postage when remailed to a different address.

SCIENCE
1515 Massachusetts Avenue, N. W.
Washington 5, D. C.
NEW MODEL B
BECKMAN SPECTROPHOTOMETER
SCHEDULED FOR PRODUCTION, APRIL, 1949

GLASS PRISM SPECTROPHOTOMETER, Beckman Model B. A new, medium priced instrument designed especially for speed and convenience in routine analyses but with an accuracy suitable for many types of research work. Range 320 to 700 mm\(\mu\) with standard blue-sensitive phototube and, by the use of an accessory red-sensitive phototube, up to 1,000 mm\(\mu\).

Consisting of a glass prism monochromator with tungsten lamp light source, holder with four cells, blue-sensitive phototube, built-in a.c. operated voltage stabilized amplifier, and indicating meter reading directly in both absorbance (optical density) and percentage transmission.

Monochromator. With glass prism. Wavelength scale approx. 260 mm long, graduated from 320 to 1,000 mm\(\mu\), readable and reproducible to 0.5 mm\(\mu\) in the ultraviolet, to 1 mm\(\mu\) in the visible range and to 2 mm\(\mu\) in the near infrared, with an absolute accuracy within 5 mm\(\mu\). Stray light is negligible, i.e. less than 1.5\% at the extreme violet end of the spectrum. Minimum spectral band width less than 5 mm\(\mu\), between 320 and 600 mm\(\mu\), and 6 to 7 mm\(\mu\) between 600 and 700 mm\(\mu\). Wavelength scale is at top of sloping panel and is operated by control knob at front of instrument.

Slits. Entrance and exit slits are simultaneously adjustable by graduated control on front of panel.

Meter. A large deflection type meter, with mirror to avoid parallax, permits direct readings of absorbance (optical density) or percentage transmission, with an accuracy of 1\% absorbance and 0.5\% transmission. A four-position amplifier sensitivity control on the front panel shifts absorbance readings in 0.500 unit steps, permitting readings on the upper two-thirds of the meter scale where it is expanded.

Sample Holders. The cell carrier is designed to take either a standard holder with four square cells 10 mm liquid length or two cylindrical cells up to 50 mm length. The entire cell carrier assembly can be removed from the instrument and replaced with an Integrating Sphere Reflectance Attachment, for either solid or powdered samples, which will be available later.

Phototubes. A blue-sensitive phototube, which covers the range 320 to 700 mm\(\mu\), is furnished with the instrument. An accessory red-sensitive phototube is offered for extending the range to 1,000 mm\(\mu\).

Lindemann Electrometer
for research in radioactivity

The Lindemann, originally designed for use in connection with photo-electric measurements of light, is now used extensively for the determination of radioactive emission. The instrument has high sensitivity and good stability. It does not require levelling. It is placed on a microscope stand. When reading, the upper end of the needle is observed with illumination through a window in the bottom of the electrometer case. Send for Bulletin 169LE

ELECTRON-RAY Research pH Meter

A portable, completely self-contained, line operated instrument. Sensitivity .005 pH, readings reproducible to .01 pH, accuracy .02 pH, range 0 to 14 pH, 0 to 1200 v. Laboratory and Industrial Models also available.

Personnel Placement

CHARGES and REQUIREMENTS for "PERSONNEL PLACEMENT" Ads

1. Rate: 15¢ per word, minimum charge $3.00 for each insertion. If desired, a "Box Number" will be supplied, so that replies can be directed to SCIENCE for immediate forwarding. Such service counts as 8 words (e.g., a 25-word ad, plus a "Box Number", equals 33 words). All ads will be set in regular, uniform style without display; the first word, only, in bold face type.

For display ads, using type larger or of a different style than the uniform settings, entirely enclosed with separate border rules, the rate is $15.00 per inch; no extra charge for "Box Numbers".

2. Advance Payment: All Personnel Placement ads, classified or displayed, must be accompanied by correct remittance, made payable to SCIENCE. Insertion can not be made until payment is received.

3. Closing Date: Advertisements must be received by SCIENCE, 1515 Mass. Ave., N.W., Washington 5, D.C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of every week).

Positions WANTED

Biochemist: Ph.D. Six years varied experience, desires teaching or research position with Medical School allowing work toward M.D. Box 36, SCIENCE. 2-18

Biologist: entomology, zoology, man, Ph.D., National Research Fel- low, etc.; publisher, interested in research positions in general zoology, animal ecology, physiology, histology, economic ento- mology, botany, conservation. Three years as head municipal rodent control. Box 34, SCIENCE. 2-11

Botanist: M.S., young woman; 8 years successful college teaching experience; desires teaching position in botany or biology; available Sept. 1949. Box 28, SCIENCE. X

Laboratory Director: Sc.D., qualified in scientific crime detection—clinical pathology—lie detector. Director approved laboratory eighteen years, including eight years teaching. Desires position in crime detection, clinical pathological or lie detector laboratory. Box 32, SCIENCE. 2-11

Physiologist, Ph.D.; several years' academic experience; since 1943, engaged in research ranging from induction of tumors by methyl-cholanthrene to studies on artery metabolism; for further information write Burnice Larson, Medical Bureau, Palmolive Building Chicago. X

Plant Geneticist: Ph.D., 11 years experience in commercial plant breeding and seven years of pure research in Botany and Genetics. Extensive background in mathematics. Desires research and teaching position in West. Will consider commercial position with ample opportunities for research. Box 31, SCIENCE. X

Plant Physiologist: Ph.D. Ten years postdoctoral research and teaching experience in fundamental and applied agricultural and horticultural problems, numerous publications, desires better teaching-research or industrial position. Now employed with large eastern college, available June 1949. Box 311A, SCIENCE. 2-44-99

Summer position as assistant to Biologist at Woods Hole desired. Woman Medical student, Johns Hopkins. A.B. (majors: Biology and Chemistry). Experience in Histochemical techniques, and as Hospital Laboratory technician, Control Chemist. Dependable, thorough and eager to learn. Box 37, SCIENCE. X X

Virologist: veteran, single, ten years experience in diagnostic and experimental virology desires appointment in a medical school with possibility of taking courses towards M.D. Box 35, SCIENCE. 2-11

Young Man: Age 34, M.S. (Major, physics; Minor, mathematics); one year mathematics teaching; nine years industrial research. Desires teaching position in mathematics. Box 23, SCIENCE. X

Zoologist: Ph.D., woman, desires summer teaching position. Twelve years experience. Botany minor. Box 25, SCIENCE. X

Personnel Placement

Positions WANTED

Anatomist: histologist and cytologist. Human anatomy training essential. Instructorship available next fall. Box 29, SCIENCE. X

Bacteriologist or Biochemist: Bacteriologist with experience in Biochemistry or Biochemist with thorough knowledge of Bacteriology. The position entails research and development of industrial microbial processes; location Metropolitan New York Area. State age, education, experience, and salary level. Box 7, SCIENCE. 2-4

BIOCHEMIST

Recent Ph.D.—for research on growth and metabolism of yeast. Responsible position for man with qualifications for independent research. Please forward complete information, including photograph and salary requirements to:

DIRECTOR OF RESEARCH

RED STAR YEAST & PRODUCTS CO., Milwaukee 1, Wis.

Biochemist: Ph.D. or M.D. to conduct investigation in chemistry of yeast at midwestern university. Position open. Must have experience in commercial fermentation methods. Initial salary and rank according to qualifications, from Research Associ- ate (Assistant Professor) to Research Professor (Full Professor). $4,000 to $6,000. Applicants should include personal data, references, publications, etc. Please give brief history. Box 11, SCIENCE. 2-11

Full time research appointment: Man or woman at Ph.D. level with training or experience in parasitology and entomology to work in cooperative project in malaria chemotherapy. Starting salary $3,600-$4,800. Box 30, SCIENCE. 2-11

TO AVOID DELAY . . . . . . .

Please be sure to enclose cash in advance with all classified ads.

Oceanographer: To undertake graduate instruction and develop research in Gulf and Caribbean waters. Should have adequate training in either Physics or Chemistry or Geology or Palaeo- ecology as well as experience with oceanographic methods. Initial salary and rank according to qualifications, from Research Associ- ate (Assistant Professor) to Research Professor (Full Professor). $4,000 to $6,000. Applicants should include personal data, references, publications, etc. Please give brief history. Box 11, SCIENCE. 2-11

Positions Open:

(a) Ph.D., trained in biochemistry, bacteriology; laboratories, 400-bed hospital; vicinity, New York City; $7,000. (b) Visiting Pro- fessor in biochemistry; six months; Asia; salary plus transporta- tion, complete maintenance. (c) Physiologist; research department, biological manufacturing company; Middle West. (d) Para- tologist; survey control work; West Indies. (e) Physiologist, chemist trained in enzymes and chemist trained in either protein or lipid chemistry and third chemist trained in biochemistry; research appointments; Middle West. (f) Biochemist; well versed in blood chemistry; research involving chemistry in relationship to diabetes; East. (g) Organic chemist, Ph.D.; research background in synthesis of organic compounds and experience in reaction kinetics desirable; duties involve experimental and theoretical studies of basic physical, thermodynamic, chemical factors involving ignition of solid propellants. $2,500. Burnice Larson, Medical Bureau, Palmolive Building, Chicago. X

Zoologist; assistant professor, woman's college, east; minimum Master's; two years experience. September. Box 24, SCIENCE. X

15¢ per word is now the rate for all Personnel Placement classified ads—so be sure to send the correct amount in advance to avoid delays in insertion of your ad.
### The Market Place

#### CHARGES and REQUIREMENTS for "MARKET PLACE" Ads

1. Rate: 20¢ per word for classified ads, minimum charge $5.00 for each insertion. Such ads are set in uniform style, without display; the first word, only, in bold face type. For display ads, using type larger or of a different style than the uniform classified setting, and entirely enclosed with separate rates are as follows:

<table>
<thead>
<tr>
<th>Type of Ad</th>
<th>Rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Single insertion</td>
<td>$16.00 per inch</td>
</tr>
<tr>
<td>7 times in 1 year</td>
<td>14.50 per inch</td>
</tr>
<tr>
<td>13 times in 1 year</td>
<td>13.00 per inch</td>
</tr>
<tr>
<td>29 times in 1 year</td>
<td>11.50 per inch</td>
</tr>
<tr>
<td>52 times in 1 year</td>
<td>10.00 per inch</td>
</tr>
</tbody>
</table>

2. Payment: For all classified ads, payment in advance is essential, before insertion can be made. Such advance remittances should be made payable to SCIENCE, and forwarded with advertising "copy" instructions.

3. Closing Date: Classified advertisements must be received by SCIENCE, 1515 Massachusetts Avenue, N.W., Washington 5, D. C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of every week). For proof service on display ads complete "copy" instructions must reach the publication offices of SCIENCE, 1515 Massachusetts Avenue, N.W. Washington 5, D. C., not later than 4 weeks preceding date of publication.

in One Day—

have been received by SCIENCE for forwarding to "Box Number" advertisers in these columns!!

SCIENCE reaches directly, every week, foremost scientists in the leading educational institutions, research foundations and industrial laboratories of the Nation—and 76 foreign countries.

So whether you are an employer seeking competent assistants, or are interested in finding a new position for yourself, an advertisement here will be reaching a distinguished—and responsive—audience.

See top of pages 18 and 19

for full instructions.
CONTROL CONTAMINATION!

The improved SU-3 Laboratory Monitor is a requirement for contamination control in the properly operated radioactivity laboratory. It is a counting rate meter with three scales of 200, 2,000, and 20,000 counts per minute, and has a loudspeaker to give audible indication of detected radiation. The use of a thin mica window Geiger tube permits detection of even the lowest energy beta emitters.

Checking laboratory glassware used in tracer experiments for an adequate decontamination.

Surveying bench tops and laboratory hoods even for low energy emitters such as C-14 and S-35.

Monitoring laboratory coats and workers' hands to check on external radiation and to prevent the possibility of ingesting radioactive materials.

Continuous monitoring of background counting rate to detect unexpected fluctuations which might affect precise radioassays or cause health hazards.

Laboratory Monitor with TGC-1 Geiger Tube (3-4 mg/cm² mica window) ...... $285.00
With TGC-2 Geiger Tube (less than 2 mg/cm² mica window) ........ $310.00

AO 16 mm MICROFILM READER

with 7 BASIC IMPROVEMENTS

FOUR SPEED AUTOMATIC TRANSPORT
2 forward, 2 reverse, controlled with a single lever. Far faster in locating frames.

TEXTURE-FREE SCREEN
Unmatched brilliance without thin screen 'hot spot.' Exceptionally easy on the eyes.

BRIGHTER ILLUMINATION
Unique Spencer optical system gives extra brilliance, controlled with built-in diaphragm.

SAFE, COOL OPERATION
Low voltage lamp, fan, and unique housing keep film safe from damage and entire instrument comfortable to handle.

SIMPLE FOCUSING ADJUSTMENT
First to achieve hairline sharpness despite film and eyesight variations.

ELIMINATES FILM WEAR
Nothing touches film except at extreme edges. Emulsion surface remains unmarred indefinitely.

LIGHT WEIGHT, EASY TO MOVE
Glides on silent ball bearing casters from desk to desk or office to office. Occupies minimum space.

Only

THE NEW AO 16 mm MICROFILM READER brings you these and many other exclusive features for convenience in microfilm reading. Whether you are now using microfilm or have yet to switch to this safe, sure, space-saving method of record keeping, you owe it to yourself to see and try the AO Reader.

Write for literature or the name of your nearest distributor.
