Fractionation Problems?

here's help for you...

This tireless servant in your laboratory will automatically collect any number (up to 200) of rigidly controlled samples of predetermined fluid volumes. Each collected sample may comprise any number of drops from one to four hundred. As each separate sampling is completed, the carriage automatically advances to repeat identical collections consecutively until the whole fractionation has been made.

All you have to do is to set it up for the conditions of the chosen experiment, short or long, and then leave it alone. The machine will plod along without attention hour after hour, all day (and night) long. When the job's done, it will shut itself off.

The Technicon Fraction Collector has been thoroughly tested in actual laboratory installations, where it has proven invaluable to busy research staffs. We shall be happy to send you details.

saves time and labor
relieves laboratory staff of the fretful and time-consuming chore of fraction-cutting; releases workers for other duties.

triples work output
you can run it twenty-four hours a day, continuously, to triple fractionation output as compared with an 8 hour laboratory day.

gives greater resolution
by collecting a large number of small fractions, rather than a few gross ones, you'll get more data from a given fractionation, e.g. a chromatogram, or a fractional distillation.

assures accuracy
because the possibility of human error is automatically ruled out. Now fraction-collection becomes a straightforward mechanical procedure.

Technicon
collection
Automatic Fracton Collector

Send me detailed information on the Technicon Automatic Fraction Collector.

American Illustrated Medical Dictionary

For a half-century the American Illustrated has been the dictionary of choice among an overwhelming majority of scientists in the fields of medicine and biology. Their preference is very clearly indicated by the fact that the American Illustrated is the required dictionary in 85% of all medical schools in the United States in which ownership of a dictionary is obligatory.

This great popularity is not accidental—not by any means. The American Illustrated has achieved and maintained its eminent position because its editors are careful to preserve, through successive editions, those features which scientists have commended.

Among these are:
1. Completeness. The Twenty-first Edition defines more than 130,000 words and terms.
2. Up-to-dateness. The American Illustrated Medical Dictionary has always made a feature of new words. More than 2000 of them were added for this edition.
3. Authority. This dictionary has enjoyed the unquestioned confidence of American scientists for 50 years. Terminology conforms to the standards of leading scientific bodies.

Edited by W. A. Newman Dorland, M.D., Member of the Committee on Nomenclature and Classification of Diseases, American Medical Association. 1960 pages, 6" × 9", with 880 illustrations, 100 in color. Flexible or stiff binding.
Plain, $8.00; thumb-indexed, $8.50.

Twenty-first Edition.

Just published

Pre-Medical Physical Chemistry
By Matsen, Myers and Hackerman
This new book presents the principles of physical chemistry with particular reference to those which have, or are expected to have, application to the study of medicine and other biological sciences. An extensive treatment of properties of surfaces and of colloidal systems has been included. Published June 10. $4.75.

The Supersensitivity of Denervated Structures
EXPERIMENTAL BIOLOGY MONOGRAPHS By Cannon and Rosenblueth
This monograph is an examination of the data which lead to the inference that directly or remotely denervated structures become sensitive to the excitatory as well as to the inhibitory actions of sundry chemical substances and of impinging nerve impulses. Many physiological and clinical implications of the law are discussed. Published in July. $6.00 (probable).

Ready this summer

College Botany
By Hylander and Stanley
This new text for a year's course in general botany is built around four specific aims: to secure a proper balance in the amount of subject matter devoted to each special field in botany; to suit the content and method of presentation to the needs of beginning students; to develop an awareness of the importance of plant life and intelligent use of plant resources; and to utilize visual instructional materials to the fullest advantage. To be published this summer. $5.50 (probable).

Elementary Laboratory Experiments in Organic Chemistry FOURTH EDITION By Adams & Johnson
In the fourth edition of this popular manual, the sections on laboratory operations have been revised extensively so that greater emphasis is given to details of correct manipulation and the exposition of underlying principles. Several new experiments have been added to provide a wider selection and permit further variation from one year to another. To be published in August. $3.25 (probable).

Manuscripts submitted for publication should be sent to the Editorial Office, with stamped, self-addressed envelope enclosed for possible return. The AAAS assumes no responsibility for the safety of the manuscripts or for the opinions expressed by contributors.

Annual subscription, $7.50; single copies, $1.25: foreign postage, outside the Pan-American Union, $1.00: Canadian postage, $.50. Remittances and orders for subscriptions and single copies should be sent to the Circulation Department, Science, 1515 Massachusetts Ave., N.W., Washington 5, D. C. Membership correspondence for the AAAS should be addressed to the Administrative Secretary at the same address.

Change of address. Four weeks’ notice is required for change of address. This should be sent to Science Recorder, 1515 Massachusetts Ave., N.W., Washington 5, D. C. When ordering a change, it is necessary to furnish an address stencil label from a recent issue. Claims for a missing number will not be allowed if received more than 60 days from date of issue. No claims allowed from subscribers due to failure to notify the Circulation Department of a change of address or because an issue is missing from their files, or for any reason from subscribers in Central Europe, Asia, or the Pacific Islands (other than Hawaii).

The AAAS also publishes The Scientific Monthly. Subscription rates on request.
Alconox is not a soap. It's a powerful detergent and wetting agent that actually works its way under oil, grease, wax, etc., and literally floats the dirt away. Excellent for cleaning instruments, and other items made of glass, metal, porcelain, etc. If your cleanser doesn't offer all the advantages of Alconox, why not give Alconox a trial?

THE selection of a complete Counting System for your work program has many advantages over the unplanned purchase of separate instruments. NUCLEAR systems consist of a selected group of matched components, each one designed for best use in conjunction with the other units to do a precise and complete research job. There is no complicated rewiring or reconnecting to be done in order to make unmatched instruments work together. NUCLEAR offers a line of complete systems designed and perfected to meet the most exacting requirements of nuclear research. Before you buy, get all the facts about these and other NUCLEAR products and services.

MODEL 111—Parallel plate Alpha Counting System for counting low activity alpha samples having relatively large area. Consists of parallel plate "pulse type" ion chamber and three-stage preamplifier in one unit, plus a scaling unit with integral high voltage supply.

MODEL 117—Methane Flow Alpha Proportional Counter for counting alpha particles in the presence of strong beta activity. The only commercial instrument of its kind, it embodies a methane flow proportional counter, variable, high gain linear amplifier, impulse recorder, high voltage supply, and a scaling circuit of 256.

MODEL L-163—Radioisotope Analyst is especially planned for analyzing radioisotopes. This precise system, which will discriminately detect alpha, beta, and gamma radiation, consists of NUCLEAR'S exclusive "Q-Gas" Counter, plus Model 163 Count-o-matic Scaling Unit.

MODEL L-165—Packaged Laboratory is a group of instruments which permits precise research or monitoring. It includes a complete scaling unit, a thin mica end window counter, an aluminum Geiger tube mount, and cables and sample dishes.
LaMOTTE Standardized Buffer Salts and Solutions

These LaMotte products are the ultimate in purity and uniformity. Packaged in special containers, they are guaranteed to give consistently accurate results.

LaMotte Standardized Buffer Salts are specially purified and standardized for the preparation of Clark & Lubs Buffer Solutions and Buffer Mixtures. Supplied in 50, 100, 250 and 500 gram containers.

LaMotte Standardized Buffer Solutions are freshly prepared from LaMotte Buffer Salts. Concentrations are M/5 except Sodium Citrate which is M/10. Specially packaged to prevent mold growth and contamination. Container sizes 100, 250, 500 and 1000cc.

BARGAINS in WAR SURPLUS OPTICS

ASSEMBLE YOUR OWN BINOCULARS!
Complete Optics! Complete Metal Parts!
Savings More Than ½ Regular Cost

GOVT. 7 x 50 BINOCULARS
Here's an unusual opportunity to acquire a fine set of Binoculars at a substantial saving of money. Offered here are complete sets of Optics and Metal Parts for the 7 x 50 Binoculars. These components are new and all for assembly. We supply full instructions.

METAL PARTS—Set includes all Metal Parts—completely finished—for assembly of 7 x 50 Binoculars. No machining required. A sturdy Binocular Carrying Case is optional with each set of Metal Parts.

Stock #243-W $39.40 Postpaid, plus $4.50 for Case—Total $44.00

OPTICS—Set includes all Lenses and Prisms you need for assembling 7 x 50 Binoculars. These Optics are in excellent condition—perfect or near-perfect—and have low refraction index.

Stock #3103-W 7 x 50 Optics $25.00 Postpaid

(These are standard American-made parts... not Japanese, French or German.)

NOTICE: Add 20% Federal Excise Tax if you buy both Binocular Optics and Metal Parts.

ARMY'S 8 x 30 BINOCULARS
COMPLETE OPTICS & METAL PARTS—Model M-1031
8 x 30 Binoculars. (Widestep model. Everything you need—ready for assembly. When finished will look like a regular factory job costing $102 to $121. The Optics are new, in perfect or near-perfect condition. Have new low refraction coating. Metal Parts are new and perfect, all completely finished. No machining required. Complete assembly instructions included.

Stock #330-W $40.00 Postpaid

Optics and Metal Parts are Available for Monoculars (½ a Binocular). For Complete Details, Write for Bulletin W.

10 LENS KIT—THE LENS CRAFTERS DELIGHT!
Kit includes illustrated booklet... specific project for every lens in the kit. Use these lenses in photography for copying, ULTRA CLOSE-UP SHOTS, Micro-photography, Kodachrome Viewer, etc. Dozens of other uses in experimental optics, building TELESCOPES, low power Microscopes, etc. No assembly required.

Stock #2-W $1.00 Postpaid

8 POWER ELBOW TELESCOPE
Gov't Cost $200.00! Our Price $27.50!
Big 2" diameter objective. All lenses Achromatic. Ample prism enabled image. 4 built-in filters—clear, amber, neutral and red. Slight smudging condition but all guaranteed for perfect working order. Weight 6 lbs. Can be carried but is bulky. Excellent for finder on Astronomical Telescope.

Stock #943-W $27.50 Postpaid

6 POWER PERISCOPE and ADJUSTABLE TRIPOD. 27" long. Focusing eye-piece. Adjustable cover for objective end. Gov't. cost $105. Tripod and mount worth more than purchase price.

Stock #717-W $20.00 f.o.b. Audubon

20X PRISM SPOTTING SCOPE SET—Consists of all lenses and prisms required to make a good standard 20X Spotting Scope. Low refraction coated. 57 mm. dia. Achromatic objective. Some metal parts included. We furnish instructions.

Stock #5145-W $22.00 Postpaid

(Also surplus Riflescopes—Write for Bulletin W)

TELESCOPE EYE-PIECE—Consists of 2 Achromatic Lenses. F.L. 28 mm. in a metal mount.

Stock #5140-W $1.50 Postpaid

MOUNTED PROJECTING LENS SYSTEM
F.L. 91.44 mm. (Just right for 35 mm. Projectors). Speed of F/4.5. Outside dia. of mount at one end 60 mm. Length of mount 64 mm.

Stock Z24033-W $3.00 Postpaid

THREADED OUTSIDE MOUNT FOR FOCUSSING ABOVE (Not Illus.)—
Stock Z2715-W $1.00 Postpaid

SIMPLE LENS KIT—Some chipped rejects, some perfect, few coated... in any event an excellent bargain. Containing Plane Convex, Double Convex, Concave, Meniscus Lenses. Dia. range 5 mm. to 40 mm. Assorted focal lengths.

Stock 25-W... 45 lenses $5.00 Postpaid

Stock Z210-W... 50 lenses $10.00 Postpaid

MOUNTED ANASTIGMAT LENSES—Use for Projectors, Enlargers, Copying Cameras. Complete with Shutter and Diaphragm. Value about $25. An excellent buy. WE WILL INCLUDE FREE ILLUSTRATED BOOKLET ON HOW TO MAKE YOUR OWN ENLARGER.

Stock ZR994-W—Speed of F/7.7, focal length approx. 100 mm. Suitable for pictures, negatives, positives up to 3½ x 4½" $7.50 Postpaid

Stock ZR996-W—Speed of F/0.3, focal length approx. 100 mm. Suitable for pictures, etc. up to 2½ x 3½" $8.50 Postpaid

CONDENSING LENSES—Seconds, but suitable for Enlargers and Spotlights.

Stock ZR1061-W... 6½" dia., 9" F.L. $2.50 ea. Postpaid

Stock ZR1088-W... 5" dia., 7" F.L. $1.00 ea. Postpaid

Stock ZR1084-W... 2½" dia., 4" F.L. $1.00 ea. Postpaid

Stock ZR1077-W... 2½" dia., 3" F.L. $1.00 ea. Postpaid

Stock ZR1019-W... 6" dia., 10" F.L. $2.00 ea. Postpaid

Stock ZR1062-W... 6" dia., 9" F.L. $2.00 ea. Postpaid

Stock ZR1088-W... 11½/16" dia., 3" F.L. $3.25 ea. Postpaid

Stock ZR1069-W... 4½" dia., 2½" F.L. $12.50 ea. Postpaid

Stock ZR721-W... 500 sheets $1.00 Postpaid

SLIDE PROJECTOR SETS—Consist of all unmounted lenses you need to make the following size projectors:

Stock #2038-W... 2½", 2¼" $3.35 Postpaid

Stock #4038-W... 2½", 2¾" $3.50 Postpaid

Stock #4029-W... 35 mm $2.85 Postpaid

Stock #5139-W... $13.75 $3.25 Postpaid

TERRIFIC BARGAIN! BUBBLE SEXTANTS
Army Air Forces type. Govt. cost about $125.00 each. Includes Carrying Case, flashlight, aux. 2-power Galilean Telescope, etc. Wartime used. Bubbles PLETYE REPAIRED, COLLIMATIED AND PUT IN LIKE NEW WORKING ORDER. Money back guarantee. Full directions included.

Stock #2924-W $12.50 Postpaid

Same Sextant as above, but BRAND NEW and with Automatic Electric Adjusting Device and Illuminated Adjusting dial for nighttime use. Govt. cost $247.

Stock #933-W... $22.50 Postpaid
