Now high speed movies with good depth of field

TODAY high speed movies provide the research scientist with more detailed information than ever. For with the Kodak High Speed Camera, these pictures are sharp and clear and in addition have remarkably good depth of field.

This is due both to the high intensity lighting now available and to the high-quality optical system which employs a rotating, accurately plane-parallel glass plate behind the lens to sweep the image in synchronism with the traveling film.

In the example illustrated, the camera was operating at 2000 frames per second with a lens aperture of f/8. Illumination of 7 to 15 times the intensity of sunlight on a bright day was provided by the new General Electric 750R Reflector Photographic Lamp.*

If you would like more information about the Kodak High Speed Camera, just mail the coupon. Eastman Kodak Co., Rochester 4, N. Y.

*This lamp may be ordered from your local Kodak dealer.

EASTMAN KODAK COMPANY, Rochester 4, N. Y.
Gentlemen:
Please send me: □ your folder “Magnifying Time” which describes the High Speed Camera; □ a 16mm. sample reel of high speed motion study which I may borrow.

Two New Editions

INTRODUCTION to PARASITOLOGY
With Special Reference to the Parasites of Man

Eighth Edition
By Asa C. Chandler, The Rice Institute

A new and completely revised edition which introduces the reader to the increasingly important subject of parasitology. References to parasites other than those of man have been greatly increased in this edition. All the common parasites of domestic animals are mentioned, and the important ones discussed in detail. Considerable space is devoted to life cycles, epidemiological factors, interrelations of parasites and hosts, and underlying principles of treatment and prevention. Special emphasis is laid on the biological aspects of the subject.

Features of the 8th edition
1. A complete reworking of the illustrations—about 50% are new and nearly all the rest have had the lettering improved.
3. Keys to such groups as the trichostrongylids and the biting and sucking lice of domestic animals.
4. A separate chapter on the discussion of Acanthocephala and a new section on insecticides—including all important war and postwar findings.

September 1949 756 pages 282 illus. $6.00

ELECTRONIC INTERPRETATIONS of ORGANIC CHEMISTRY

Second Edition
By A. Edward Remick, Wayne University

Carefully reviews the field so that the reader may know exactly how to proceed in using the electron theory as an aid in solving his laboratory problems. This edition features a new chapter, "Some Contributions from the Field of Stereochemistry," and the entire book has been completely revised. English electronic theory of organic chemistry is combined with the American counterpart, and the electrochemical approach to organic oxidation-reduction is covered.

June 1949 600 pages Illustrated $6.00

The Fundamentals of College Chemistry
G. Brooks King, Professor of Chemistry,
The State College of Washington
William E. Caldwell, Professor of Chemistry and Chemical Engineering, Oregon State College

This new text presents the basic facts and principles of chemistry clearly and simply. A wealth of illustrative examples is provided. The modern theory of atomic structure is introduced early to provide a basis for such fundamental concepts as valence and ionization.

Electronic Mechanisms of Organic Reactions
Allan R. Day, Associate Professor of Chemistry, University of Pennsylvania

Based on the results of recent investigations, this new book systematizes organic chemistry through the use of electronic mechanisms. Approx. 408 Pages

CHANNELLING NATURE FOR SCIENCE

In producing animals for scientific research there must be never-ending watchfulness to keep natural variation at a minimum.

That's why we carefully control genetic factors and environment to produce dependable uniformity year after year in our large colonies of mice, rats and guinea pigs.

These strains are identified by the initials CF for your assurance of dependability.

Your inquiries are invited.

ELECTRON-MULTIPLIER PHOTOMETER

New electron-multiplier photometer, for measuring extremely low light intensities, utilizes photomultiplier tubes which obviate need for additional amplifiers. Applicability is widened by choice of photomultiplier having optimum characteristics in ultraviolet or visible. Photometer comprises: (1) detector, (2) power supply and controls, (3) galvanometer. This arrangement makes it convenient to use directly or attach photometer to various instruments. Among features: Selective wide range of sensitivity; linear response; dark-current balance control; constant voltage; stable battery power supply; interchangeable photomultiplier tubes.

A NEW TEXT!

ELEMENTARY PLANT PHYSIOLOGY

BY STUART DUNN, PH.D.,
Associate Professor of Botany,
University of New Hampshire.

- A brief text for the one-semester course or one-quarter course in introductory plant physiology.
- Fundamental principles are stressed.
- Basic facts and historical summaries are skillfully interwoven to arouse student interest.
- Applications of the subject to agriculture are particularly well done without detracting from the author's serious discussion of fundamental principles.
- Beautiful drawings and photographs of plant experiments prepared especially for this text!
- Separate laboratory manual available to accompany text.

ADDISON-WESLEY PRESS INC.
KENDALL SQUARE BUILDING CAMBRIDGE 42, MASS.
### POSITIONS WANTED

**Botanist:** Ph.D., 19. College teaching. Experienced. Trained: morphology, genetics, mathematics; international research. Box 308, SCIENCE.

**Chemist:** 40, B.S. Chemistry; M.S. Zoology; married; 2 years research: experience rubber, plastics, synthetic fiber; 1 year H.S. teaching; 3 years medical lab & hospital experience; desires permanent position, preferably Midwest. Box 316, SCIENCE.

**Parasitologist:** Ph.D.; research in treatment of intestinal infections; teaching experience; publications. Desires research or teaching-research combination. Box 317, SCIENCE.

**Plant Physiologist:** Ph.D. Fourteen years of academic research in plant biochemistry, plant nutrition and growth. Publications. Presently engaged in industrial research. Desires research position in an experiment station or teaching and research in a university. Box 307, SCIENCE.

**Young Scientist** seeks industrial research appointment, preferably with opportunity for management and production. Ph.D.; majors: organic chemistry, enzymology; graduate training and experience in organic chemistry, biochemistry, fats enzymes; for further information, please write Burneice Larson, Medical Bureau, Palmyra Building, Chicago.

### POSITIONS OPEN

**Biochemist:** Ph.D. or M.S. Full-time research in project on relation of hormones to protein metabolism. Experience with various hormones and/or chemical reactions desirable but not necessary. Salary commensurate with experience. Send personal data, academic record, publications, and recent photograph. Box 318, SCIENCE.

**Positions Open:**
(a) Physicist: preferably internist, to join clinical investigation staff, pharmaceutical company; research experience desirable. (b) Pharmacologist, Ph.D., or Ph.D. in related work with solid knowledge of pharmacology; large pharmaceutical company; $4000-$6000. (c) Assistant professor or instructor, physiology, research department distinguished for its research and graduate program; eastern university. (d) Associate cancer cytologist; university research department: duties: principally study of malignancy with particular reference to virus diseases: East. (e) Research scientist to assist head, pharmacological control department; degree in pharmacy, biology or chemistry required; biological manufacturing company; East. (f) Assistant professor or instructor, bacteriology; university medical school; West. (g) Physician experienced in clinical and research aspects of cancer to direct cancer institution; teaching affiliations: $10,000-$15,000. (h) Chemist: recently created program involving sodium and potassium determinations; teaching hospital; large city of West, medical center. S9-1 Burneice Larson, Medical Bureau, Palmyra Building, Chicago.

**Spectroscopist:** Excellent opening for experienced hand spectroscopist with good theoretical background to carry out direct fundamental spectroscopic studies relating to combustion processes. Publications encouraged. Salary open. Write: Personnel Administrator, Jet Propulsion Laboratory, California Institute of Technology, 4800 Oak Grove Drive, Pasadena, California, giving details of training, experience, publications, and professional references.

### CHARGES and REQUIREMENTS for "PERSONNEL PLACEMENT" Ads

1. Rate: 15¢ per word, minimum charge $3.00 for each insertion. If desired, a "Box Number" will be supplied, so that replies can be directed to SCIENCE for immediate forwarding. Such service counts as 8 words (e.g., a 25-word ad, plus a "Box Number", equals 33 words). All ads will be set in regular, uniform style, without display; the first word, only, in bold face type.

2. For display ads, using type larger or of a different style than the uniform settings, enclosed with separate border rules, the rate is $15.00 per inch; no extra charge for "Box Numbers".

3. Closing Date: Advertisements must be received by SCIENCE, 1315 Mass. Ave., N.W., Washington, D. C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of each week).

### PERSONNEL PLACEMENT

**POSITIONS OPEN**

**Scientists:** Salaried positions, $3,600 to $25,000. This confidential service for outstanding men or women who desire a change of connection, will develop and conduct preliminary negotiations without risk to present position. Send name and address for details. Tomsett Associates, 1205 Berger Building, Pittsburgh 19, Pa.

**VACANCY FOR PROFESSOR IN GENETICS**

(1) Applications are invited for appointment to a post of Professor in Genetics in the Public Service of the Union of South Africa. The post is at the Natal Agricultural Research Institute, Pietermaritzburg which is associated with the University of Natal.

(2) Applicants must be in possession of a Doctor's degree with thorough training in Genetics, Cytology and Plant Breeding. Research experience, especially in the breeding of farm crops will be a recommendation.

(3) Candidates must furnish full particulars regarding qualifications and training and experience of research and publications. A detailed resume of previous training and experience, with a statement of proficiency in at least one of the official languages of the Union of South Africa i.e. English and Afrikaans (or Netherlands) is an essential requirement.

(4) The scale attaching to the post is £960 x 40-1120.

(5) The Government of the Union of South Africa will defray the cost of transporting the successful candidate, his wife and minor children (including a reasonable quantity of personal luggage) from his place of residence to Pietermaritzburg, Natal, South Africa.

(6) Satisfactory certificates of Birth and Health and also certified copies of academic and/or professional certificates and diplomas must be submitted. Original certificates and testimonials are not to be submitted in the first instance.

(7) In addition to the salary mentioned in paragraph 4, a temporary cost of living allowance at the following rates, which may be varied from time to time, is payable: if married—£208 per annum if unmarried—£50 per annum.

(8) The application must be made on a prescribed form (2.83) which is obtainable from:

The Secretary,
South African Embassy,
3101 Massachusetts Avenue, N.W.,
Washington 8, D. C.

Then all completed forms must be addressed. Applications should reach that office not later than 7th October, 1949.

LIMNOLOGICAL ASPECTS OF
WATER SUPPLY AND WASTE DISPOSAL
v + 87 pages—6 x 9—illustrated—clothbound—1949

This volume of 20 papers treats of a field of science of rapidly
increasing importance. In it engineering and limnology meet,
and government plays an important role.

The papers in this new volume are not simply academic discussions of possibilities,
but of sound biological and engineering science as applied to current practice in
northern Wisconsin and Minnesota. The 12 contributors to this volume are largely
from that area, but several are connected with institutions from Ohio to Boston.

PRICES FOR THIS BOOK IN CAR-
TONS, postage prepaid, are as follows:
Members of the A.A.A.S. . $2.75
Nonmembers and Institutions . 3.25

EASE OF OPERATION WITH

The NEW "100" Scaler

Direct Reading Without Interpolation or Multiplication is possible with the new Tracerlab "100" Scaler. A built-in Wizard register and direct reading neon lights give a direct indication of counts received.

Plug-In Decascales and Discriminator Circuit simplify servicing. Highest grade electronic components are used throughout for reliability and trouble-free operation.

Timing Errors Are Eliminated by provisions for starting and stopping both the scaler and an electric timer with a single start-stop switch.

Resolving Time of the scaling circuit is less than ten microseconds, many times faster than any commercially available Geiger tube.

High Voltage Supply is continuously variable from 350 to 2,200 volts and regulation is better than .025 per cent change in output per 1 per cent change in line voltage.

PLUG-IN DECASCALES

Servicing of scaling and discriminator circuits is no more complicated than replacing a standard vacuum tube.

IT'S THE SPENCER
PHASE TURRET CONDENSER

TURRET DIAL ROTATES EASILY without danger of disturbing the microscope.

THE ANNULAR DIAPHRAGMS (interchangeable) are brought into correct position without backlash.

INDIVIDUAL CENTERING OF ANNULAR DIAPHRAGMS permits parcentering to four different phase objectives. Therefore there is no need to center annular diaphragms when changing objectives.

CENTERABLE MOUNT permits accurate location of phase condenser in substage fork.

LONG FOCUS ANNULAR DIAPHRAGMS to fit turret condenser are available for micro manipulation and tissue cultures located up to 17mm above stage.

Please write for demonstration or catalog and chart of applications.
