Health Hazards in Radiation Work:
M. Ingram ......................................................... 103

The Mechanism of the Heat Inactivation of Pepsin:
E. J. Casey and K. J. Laidler ................................. 110

Technical Papers
Absorption of Radioactive Zirconium and Niobium by Plant Roots from Soils and Its Theoretical Significance:
J. Vlamin and G. A. Pearson ................................. 112

New Method for Studying Electrical Orientation and Relaxation Effects in Aqueous Colloids: Preliminary Results with Tobacco Mosaic Virus:
Chester T. O'Konski and Bruno H. Zimm ............... 113

The Induction of Resistance to 4-Amino-N\textsuperscript{10}-Methyl-Pteroylglutamic Acid in a Strain of Transmitted Mouse Leukemia:

Hemin Synthesis in Spleen Homogenates:
Kurt I. Altman and Kurt Salomon ............................ 117

Effect of 2,4-Dichlorophenoxyacetic Acid on the Alpha and Beta Amylase Activity in the Stems and Leaves of Red Kidney Bean plants:
W. B. Neely, C. D. Ball, C. L. Hamner, and H. M. Sell ................................. 118

News and Notes .................................................. 119
