Practical Invertebrate Anatomy
By W. S. Bullough
A complete laboratory reference, this book describes more than 100 invertebrates commonly examined by zoology students. Each description is prefaced by an account of the distribution, habitat and mode of life of the genus. Notes on unusual organic structures are included, together with details of classification. A series of 168 drawings, directly labelled, provide clear and precise illustration. Appendices describe the methods of culture, killing, fixing and preserving specimens. Published in June. $4.50

Biology of the Vertebrates
Third Edition
By Walter and Sayles
In making the revision, Dr. Sayles has kept the flavor of the previous editions while bringing all the information up to date. Many new illustrations have been selected from a variety of sources, and several chapters have been rewritten in the light of recent research. $6.00

Manual for Comparative Anatomy
Revised Edition
By Leonard P. Sayles
This manual features a unique arrangement, listing parts in one column, each followed by the descriptive material. Either type study or comparative study of systems is facilitated by this method. The revision includes 37 new illustrations, bringing the total to 92. All illustrations are fully and directly labelled. To be published in August.

Fundamentals of Comparative Embryology of the Vertebrates
Revised Edition
By Alfred F. Huettner
Maintaining the same general plan of organization and morphological point of view, the revised edition of this popular text has been brought completely up to date. Two completely new chapters have been added; one on the history and theories of development, and the other on the embryology of the mammal. The original drawings by the author are unsurpassed in biological textbooks. $5.00

UNIVERSITY OF DACCA, East Bengal, Pakistan.

Applications are invited for the following positions on the terms stated against each:

1. **Professor of Physics**—Salary will depend upon qualifications and may amount to Rs. 2000/- p.m. including allowances. In exceptional cases it may be increased to Rs. 2500/- p.m.

2. **Professor of Botany**—Salary will depend upon qualifications and may amount to Rs. 1500/- p.m. including allowances.

Appointments will be on deputation or contract not exceeding 5 years or permanent basis in exceptional cases. Benefit of Provident Fund for service not less than five years, contribution which on either side being 6 1/2 % of the salary. Quarters will be provided on payment of 10% of the salary. First class free passage for joining appointment at Dacca will be provided.

Applicants should be distinguished scholars, with experience of University teaching and guiding research. Knowledge of English is essential. Candidates should give all details of age, nationality, academic career, teaching experience, and original publications enclosing a copy of each; also testimonials and names and addresses of three referees.

Applications must reach the Registrar, University of Dacca (P.O. Ramna), East Bengal, Pakistan not later than 31st August, 1950.

P.S. Special attention is invited to the present rate of exchange and the extended date for receiving applications.

Klett Manufacturing Co.
179 East 87 Street, New York, New York
Accuracy, reliability, simplicity, and speed are the most important considerations in the selection of counting room equipment. The instruments illustrated above and listed below provide the most desirable unit for this purpose.

1. SC-1B Autoscaler
2. SC-9C Shielded Manual Sample Changer
3. E-2A Sample Storage Cabinet with 10 E-1 Sample Trays
4. Calibrated Reference Sources or Uncalibrated Reference Sources
5. TGC-1 Geiger tube or TGC-2 Geiger tube
6. E-3A Aluminum Absorber

Special equipment which will operate with this basic unit is also available for completely automatic counting. For further information on the selection of equipment for a radioactivity laboratory write for Bulletin S-25.
NEW SPENCER No. 735 LAMP

Here is the illuminator for advanced microscopy you knew was bound to come... with convenient precise controls for critical adjustment... with essential optical and mechanical qualities to complement a fine microscope.

COOLER OPERATION. Sturdy die-cast housing dissipates heat.

- CRITICAL FOCUSING FROM EITHER SIDE. Rack & pinion movement.

- NO TRANSFORMER. Lamp operates from 110 volt outlet.

- PRECISION REFLECTOR ADJUSTMENT. So quick, simple, and accurate.

- RAPID BULB CHANGE. Lamphouse separates.
  Hinged lamp chimney opens to reveal bulb and reflector.

- PRECISE TILTING. Screw adjustment maintains any angle.

- QUALITY OPTICAL SYSTEM. Two plano-convex lens elements.

- IRIS DIAPHRAGM. Knurled ring control.

- FILTER HOLDER. Choice of single or multiple holder.

Correct illumination is essential for the best results from any microscope objective, eyepiece and condenser. Your instrument deserves the Spencer No. 735. For further details write Dept. 03.
