The answers...

answers to "What are your comments on BOTANY?" are proving a good deal about the quality of Robbins' and Weier's new textbook.

- "Robbins and Weier will undoubtedly be our selection as the text."
- "... indeed a masterpiece."
- "The wealth and quality of the illustrations is outstanding. The organization and clarity of the text material is ideal for our purposes."
- "I have completed a thorough study of the book and find it excellent."
- "... ideally suited to an introductory course in plant science."

CRYSTAL-OPTICS

Specialist in the fabrication of Crystal Optics. Many Nicol Type Prisms delivered from stock. Limited manufacturing facilities for both Crystal & Precision Glass Optics available.

FOR A CONSISTENT DIET, FEED
PURINA LABORATORY CHOW,
THE UNIFORMULA RATION

Year after year, you can depend on a consistent diet for your animals when you feed Purina Laboratory Chow. The same formulation of quality ingredients goes into the Checkerboard Bag year after year so you get a reliable, uniform base for your animal experiments. When you order feed, get Purina Laboratory Chow—The Uniformula Ration.

CASTLE RECTANGULAR AUTOCLAVES

Large laboratories find the answer to their heavy sterilizing requirements in a Castle Rectangular Autoclave.

These Autoclaves are equipped with dual discharge for three functions: (1) sterilization at temperature of pure steam; (2) sterilization at temperature of flowing steam; (3) sterilization at temperature of steam and air combined.

Every feature of these heavy-duty Autoclaves is designed to simplify its operation and guarantee its safety. For full details write for "Bulletin 2-5." Wilmot Castle Company, 1212 University Avenue, Rochester 7, N. Y.

Triphenyl Tetrazolium Chloride (TPTZ) Schwarz

Important reagent for classification of reducing agents in biochemical research. Also valuable in determining the germinating capacity of seeds, and for separation of living and dead bacteria and yeast cells. TPTZ Schwarz is a crystalline product of high purity.

Schwarz fine chemicals satisfy the exacting requirements of products intended for use in biochemical or clinical research.

HEADQUARTERS FOR COLORIMETRIC APPARATUS
**Personnel Placement**

**CHARGES and REQUIREMENTS for "PERSONNEL PLACEMENT" Ads**

1. Rate: 15¢ per word, minimum charge $3.00 for each insertion. If desired, a "Box Number" will be supplied, so that replies can be directed to SCIENCE for immediate forwarding. Such service counts as 8 words (e.g., a 2 word ad, plus a "Box Number," equals 33 words). All ads will be set in regular, uniform style, without display; the first word, only, in bold face type.

   For display ads, using type larger or of a different style than the uniform settings, enclosed with separate border rules, the rate is $1.00 per inch; no extra charge for "Box Numbers".

2. Advance Payment: All Personnel Placement ads, classified or display, must be accompanied by correct remittance, made payable to SCIENCE. Insertion can not be made until payment is received.

3. Closing Date: Advertisements must be received by SCIENCE, 1515 Massachusetts Ave., N.W., Washington 5, D.C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of every week).

**POSITIONS WANTED**

Academic position desired by Ph.D. (Columbia University, 1949) in Education and Philosophy, with broad training in related fields. One year of active teaching experience. Four years of research and translation experience from English to Chinese. Can speak and write both Chinese and English fluently. Box 233, SCIENCE.

Agricultural Chemist: Experienced teacher of general, analytical chemistry. M.S.; post graduate work in nutrition, physiology desires teaching and/or research position. Box 251, SCIENCE.

Bacteriologist: Ph.D. 27, weeks industrial, teaching or research position. Experience in antibiotics. Box 258, SCIENCE.

Biochemist, Ph.D., 1950. Desires research, industrial or academic with teaching. Prefers microbiological or plant biochemistry. Phi Beta Kappa, Sigma Xi. Box 256, SCIENCE.

Biophysicist desires teaching position in a Department of Biology with opportunity for research. Box 250, SCIENCE.

Botanist: M.S., young man, desires research, teaching position; teaching experience, botany, bacteriology; experience in horticulture. Box 260, SCIENCE.

Entomologist, M.S., Field and teaching experience. Desires research or technical sales position. Box 236, SCIENCE.

Microbiologist-Bacteriologist: Ph.D., 33, decade of responsible teaching and research, desires academic position. Box 237, SCIENCE.

Scientists: Ph.D. pending, Pharmacology, immunochemistry, physiology, endocrinology. Teaching experience. Desires position allowing originality, integrative thinking, and research under scientist of broad experience in endocrinology and/or cellular physiology. Box 253, SCIENCE.

Young Ph.D. is available for research or teaching position in field of medical mycology; two years' research and teaching experience; in twenties; for further information, please write Burneice Larson, Medical Bureau, Palmolive Building, Chicago.

**Personnel Placement**

**POSITIONS OPEN**

Glass Blower. With at least 3 years' actual experience in making and repairing chemical laboratory apparatus. Location: Middle Atlantic industrial research laboratory. Send full particulars including salary expectations in first letter. Box 257, SCIENCE.

Physicist with Master's Degree and up to five years industrial experience is required for development work involving the fields of mechanical properties of matter, heat & moisture transfer, optical properties of films and sound absorption as applied to wood fiber products. Location: Upper Midwest. Send full information first letter. Box 259, SCIENCE.

Positions Open:
(a) Physician, preferably with Ph.D. in physiology or biochemistry, to direct department of exploratory development research; familiarity with problems of commercial medical research desirable. East.
(b) Physician preferably with Ph.D., to serve as associate professor of microbiology, university medical school and, also, physician or Ph.D. to head departments, surgery, bacteriology and microbiology in teaching hospital; West.
(c) Organic chemist: B.S. or M.S. degree required; research position, large industrial company; university medical center; Phillips Laboratory.
(d) Physiologist: Ph.D. with background of medical school physiology; chief responsibility: teaching, counseling an advanced human physiology to juniors and seniors; young women's college, East.

(e) Instructor in anatomy especially gross anatomy; department of anatomy, Eastern medical school. (f) Assistant director of laboratories; 300-bed general hospital; administrative ability with background in one of sciences, preferably chemistry, required; $5000-$7000.

(g) Physician or Ph.D., trained in cardiovascular physiology; research appointment; university medical school; Midwestern.

**TELL . . . YOUR SALES STORY** to the more than 32,000 SCIENCE subscribers . . . a fertile market for your Scientific Books, Services, or Supplies . . . this same responsive audience, as evidenced by the increasing number of advertisers. . . . PROOF that SCIENCE advertising produces results!

**The Market Place**

**CHARGES and REQUIREMENTS for "MARKET PLACE" Ads**

1. Rate: 20¢ per word for classified ads, minimum charge $5.00 for each insertion. Such ads are set in uniform style, width, display; the first word, only, in bold face type.

   For display ads, using type larger or of a different style than the uniform classified settings, and entirely enclosed with separate border rules, the rate is $1.00 per inch; no extra charge for "Box Numbers".

   Single insertion $16.00 per inch
   7 times in 1 year 14.30 per inch
   13 times in 1 year 13.00 per inch
   26 times in 1 year 11.50 per inch
   52 times in 1 year 10.00 per inch

2. Payment: For all classified ads, payment in advance is required, before insertion can be made. Such advance remittances should be made payable to "SCIENCE," and forwarded with advertising "copy" instructions.

   For display advertisers, monthly invoices will be sent on a charge account basis—providing satisfactory credit is established.

3. Closing Date: Classified advertisements must be received by SCIENCE, 1515 Massachusetts Avenue, N.W., Washington 5, D.C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of every week).

   For proof service on display ads complete "copy" instructions must reach the publication offices of SCIENCE, 1515 Massachusetts Avenue, N.W., Washington 5, D.C., not later than 4 weeks preceding date of publication.

ANNOUNCING

The New Model B-300 INSULATED CHROMATOCAB

for

PAPER PARTITION CHROMATOGRAPHY

1 Completely insulated with Glass Wool, and Triple Pane Windows at each end.
2 Special Pressure - Lock Handles for Tight Closure of top.
3 Gray Hammertone Metal Cabinet with Stainless Steel Lining.
4 Adjustable Screw - type Legs for Leveling.

The new Model B-300 insulated CHROMATOCAB assures uniform dependable results by stabilizing against fluctuations in room temperature and temperature gradients inside cabinet.

NOW AVAILABLE:
Other CHROMATOCAB models at various prices, as well as miscellaneous accessories for work in paper partition chromatography.

Write us today for new descriptive brochure.

THE BERKELEY CHROMATOGRAPHY DIVISION
of University Apparatus Company

2229 McGee Avenue

Berkeley 3, California
A complete outfit for demonstrating and teaching the fundamentals of radioactivity

- The new Nuclear Classmaster is the first adequate answer to the growing need for classroom and platform demonstration equipment to be used in teaching the fundamentals of radioactivity. While the operation of a Geiger counter can be shown with any count-rate or scaling instrument, the Classmaster is provided with accessories which permit demonstration and study of all of the nuclear phenomena normally covered in elementary instruction. It also permits many characteristics to be measured or calculated quantitatively.

- The basic electronic instrument indicates each disintegration by a neon tube flash and an audible click. The rate of count is also shown plainly on a large easy-to-read meter. By the use of the calibrated mounting device and the absorbers and radioactive sources provided, a complete set of experiments can be performed or the apparatus used for simple demonstration. A twenty-eight page instruction manual describes these experiments, both elementary enough for high school classes and comprehensive enough for students on the college level.

- The "Classmaster" is another of nuclear's wide range of instruments to meet the many requirements of nuclear science. Write for full details today!

nuclear INSTRUMENT & CHEMICAL CORPORATION
237 West Erie Street • Chicago 10, Illinois  • Cable Address: "Nuclear"
Mention 'Microtome' and you think of AO Spencer . . . a name synonymous with utmost precision in section cutting instruments for half a century . . . a name closely associated with the latest developments in ultra-thin sectioning.

Several AO Spencer Microtomes are especially designed to meet the needs of educators. Offering maximum precision at lowest cost, they permit students to cut sections easily and accurately.

**No. 810 ROTARY MICROTOME**

—an instrument with automatic feed mechanism for rapid, uniform serial sectioning. Price $292 complete with 110 mm knife back and handle.

**No. 900 TABLE MICROTOME**

—a low priced model for cutting uniform sections by hand. Price $47.
