### Table of Contents

Self-Awareness and Scientific Method:
George F. F. Lombard ........................................ 289

Clifford Dobell, F.R.S.: 1886-1949:
Gordon H. Ball .................................................. 294

**Technical Papers**

The Influence of ACTH and Cortisone on Certain Factors of Blood Coagulation:
R. W. Smith, et al. ............................................ 295

The Nucleus-Dependence of P³² Uptake by the Cell:
Daniel Mazia and Henry I. Hirschfield ................... 297

The Use of a Radioactive Isotope in Determining the Retention and Initial Distribution of Airborne Bacteria in the Mouse: L. J. Goldberg and W. R. Leif 299

Intracellular Distribution in Rabbit Liver of Injected Antigens Labeled with I¹³¹:
Charles F. Crampton and Felix Haurowitz ............... 300

The Differential Induction of Lethal Mutations by Formalin in the Two Sexes of *Drosophila*: Irwin H. Herskowitz ..................... 302

Lethal Mutation Rate in *Drosophila*
Treated with 20-Methylholanthrene:
Walter J. Burdette ............................................. 303

 Arylcycloalkylamines: Alfred Burger, et al. ............ 306

Crystalline + Chromogen Obtained from *Bombyx mori*: Y. Hirata, K. Nakanishi, and H. Kikkawa ...................... 307

Built-up Poultry-House Litter as a Growth-promoting Supplement for Chicks on an All-Vegetable Vitamin B₁₂-deficient Diet: E. R. Halbrook, A. R. Winter, and T. S. Sutton .................................................. 308

Preliminary Results on the Crystal Structure of Some Ammonium Salts with Substituted Aliphatic Chains: G. L. Clark and C. R. Hudgens ............................................. 309

Growth Layers on the Teeth of Pinnipedia as an Indication of Age:
Victor B. Scheffer ............................................... 309

**Comments and Communications**

A Commentary on Structural Variation in Conifer Wood; Maximal Consumption of Ethyl Alcohol; Textbooks and Courses in General Biology .................................................. 312

**Book Reviews**

Geochemistry; Physical Methods in Chemical Analysis; The Autobiography of Robert A. Millikan; Heterocyclic Compounds; The Chemistry of Heterocyclic Compounds; Natural Regions of the U.S.S.R.; A History of Biology; The Practice of Medicine ............. 315

**Scientific Book Register** ........................................ 318

**News and Notes** ............................................... 319
Editor's Summary
