## Table of Contents

The Response of Plants to Climate:
F. W. Went .................................................. 489

**Technical Papers**

Identification of Another Epidemic Respiratory Disease: Thomas Francis, Jr.,
J. J. Quilligan, Jr., and Elva Minuse .................. 495

Kinetic Mechanisms and Hydrocarbon Flame Spectra: R. C. Herman,
G. A. Hornbeck, and K. J. Laidler .................... 497

The Function of the Symbiotic Yeasts of Two Insect Species, Lasioderma serricorne F. and Stegobium (Sitodrepa) panicum L.: N. C. Pant and G. Fraenkel ........ 498

Some New Plant-Growth Inhibitors: R. S. de Ropp .................................................. 500

An Antigenically Distinct Subtype of Influenza Virus A Which is Virulent for Mice in Primary Passage of Allantoic Fluid: Thomas G. Ward and Bernice E. Eddy ........ 501

On the Validity of an Assumption of Resonance Theory: Arthur F. Johnson .............. 503

The Paper Chromatography of pH Indicators: Michael Lederer ............................. 504

Oxygen Uptake of Embryonated Eggs Infected with Western Equine Encephalitis

Virus: R. A. Siem, B. C. Smith, and Wm. F. McLimans ........................................... 505

The Biosynthesis of 17-Hydroxyecorticos terone from 11-Desoxy-17-hydroxyecorticos terone: D. A. McGinty et al. ................. 506

**Book Reviews**

Cosmical Electrodynamics: H. Alfvén.
Reviewed by Robert L. Platzman .................... 507

Problems of Morphogenesis in Ciliates: André Lwoff. Reviewed by R. P. Hall ............ 507

**Scientific Book Register** ............................................. 508

**Association Affairs**

The Cleveland Meeting: I—Annual Science Exposition ........................................... 509

**News and Notes**

The Fifth International Congress of Microbiology: Ernest Carroll Faust ............ 511
