Vivid and authentic, based on first-hand information—

Geography of Russia
By N. T. MIKOv, University of California, Berkeley. The author writes explicitly and specifically from first-hand information on location, tectonic structure, topography, glaciation, climate, rivers, and mountains. His discussion of the peoples of Russia includes subtle points on language and religion often missed by the superficial observer. The meat of the book is its detailed description of 20 important regions of the Soviet Union that includes examinations of the flora and fauna peculiar to each area. January 1951. Approx. 334 pages. Illus. Prob. $5.00.

Smoothes the transition to quantum and relativistic mechanics—

Classical Mechanics
By H. C. CORBEN, Carnegie Institute of Technology, and PHILIP STEHLE, University of Pittsburgh. Has two chief objectives: to present classical mechanics in a way that exposes the underlying assumptions and indicates the boundaries beyond which its uncritical extension is dangerous; and to help the reader sense the continuity in physical thought as he advances from classical mechanics to quantum and relativistic mechanics. November 1950. 388 pages. $6.50.

From the standpoint of modern organic chemistry—

Heterocyclic Compounds, Volume II
Polycyclic Five- and Six-Membered Compounds Containing One O or S Atom.
Edited by ROBERT C. ELDERFIELD, Columbia University. Continues the series so successfully initiated in April. As far as is known, this is the first time that the large group of naturally occurring compounds including anthocyanines, flavones, flavonols, chromenes, etc., are critically and exhaustively covered in book form. January 1951. 571 pages. Prob. $15.00.

Stresses chemical aspects of finishing—

An Introduction to Textile Finishing
By J. T. MARSH, F.R.I.C., F.T.I. Reviews the entire field of finishing with emphasis on its chemical aspects. Stressed are the recent developments that have increased our understanding of the chemical constitution and molecular structure of textile fibers. The two criteria used by the author in choosing finishes to be covered are commercial importance and scientific interest. January 1951. Approx. 552 pages. $5.50.

Send for copies on approval.

Laboratories at Chicago, U. S. A.

---

**For MEASUREMENT of SKIN RESISTANCE**

**Garceau RECORDING PSYCHOGALVANOMETER**

For the study of the psychogalvanic reflex and skin resistance. The instrument is direct-reading and gives a written record of the reaction of the patient.

Price ........ $775.00

**Garceau CLINICAL DERMOMETER**

For clinical and experimental investigation of disorders involving sympathetic reaction, such as pain reflexes. In the psychological laboratory, the instrument has a well-known application as a so-called "lie detector". Resistance is read directly from a calibrated dial. Small variations, greatly magnified, are shown on the meter. Battery operated. Price .... $115.00

FRESHWATER ALGAE OF THE UNITED STATES. New 2nd edition
By Gilbert M. Smith, Stanford University. McGraw-Hill Publications in the Botanical Sciences. 719 pages, $10.00
This outstanding text has been thoroughly revised to incorporate new developments since publication of the first edition. It is designed to enable the student to identify the fresh-water algae of this country, and to summarize the morphology and life histories of these algae. New material is included on 75 to 80 genera reported since 1933, and over 100 new illustrations have been added.

METHODS AND MATERIALS FOR TEACHING GENERAL AND PHYSICAL SCIENCE
By John S. Richardson and G. P. Cahoon, The Ohio State University. 501 pages, $4.50
This book is planned to give science teachers, prospective and in-service, direct assistance in utilizing the laboratory or direct-experience approach. The book provides specific procedures for student learning experiences, the equipment and operation of a science laboratory, and the details of hundreds of projects and demonstrations.

THE CHEMISTRY AND ACTION OF INSECTICIDES
By Harold H. Shepard, U. S. Department of Agriculture. Ready in March
An authoritative text and reference, this book is concerned with the properties of insecticides, rather than the details of insect control, and includes the essential facts and theories regarding the chemical, physical, and toxicological aspects of insecticides, as well as their effects upon insects, plants, and higher animal life.

PROCESS HEAT TRANSFER
By Donald Q. Kern, Process Engineering Division, The Patterson Foundry & Machine Company. 855 pages, $8.00
Affords systematic instruction in the calculations, derivations and empirics of heat transfer, using the language and methods of industry. This new philosophy of the subject has entailed a radically new approach by which solutions are presented for the numerous representative problems arising in the chemical and process industries. The book develops the fundamentals of heat transfer within the actual equipment and flow patterns in which it occurs in the majority of industrial processes.

Leonard P. Sayles

BIOLOGY
of the
VERTEBRATES

Third Edition

This book gives a broad background for more advanced study, not only in anatomy, but also in embryology, histology, and vertebrate physiology. The mellow, humane style, which was part of Dr. Walter’s greatness as a teacher, has been kept and the material has been brought up-to-date. This edition has been enriched with many new illustrations and an endeavor has been made to keep a proper balance in the presentation of the material, including a reasonable amount of controversial material.

Third Edition, $6.00

Published in September: Leonard P. Sayles’ MANUAL FOR COMPARATIVE ANATOMY $3.00

Personnel Placement

CHARGES and REQUIREMENTS for "PERSONNEL PLACEMENT" Ads
1. Rate: $2.00 per word, minimum charge $10.00 for each insertion. If desired, a "Box Number" will be supplied, so that replies may be directed to SCIENCE for immediate forwarding. Such service costs $2.00 per word ad, plus a "Box Number" equals $33 words. All ads will be set in regular, uniform style, without display; the first word only, in bold face type.
For display ads, using type larger or of a different style than the uniform settings, enclosed with separate border rules, the rate is $16.00 per inch; no extra charge for "Box Numbers".
2. Advance Payment: All Personnel Placement ads, classified or display, must be accompanied by correct remittance, made payable to SCIENCE. Insertion can not be made until payment is received.
3. Closing Date: Advertisements must be received by SCIENCE, 1515 Mass. Ave., N.W., Washington 5, D. C., together with advance remittance, not later than 14 days preceding date of publication (Friday of every week).

POSITIONS WANTED

Administrative Assistant, pharmaceuticals. Young woman, M.A. Biochemistry, additional graduate work; 8 years research (5 years pharmacological teaching; experience and interest in helping organize and coordinate laboratory work, directing control work in research and production; Philadelphia area or N. J. desired. All eastern locations considered. Box 364, SCIENCE.

Cytologist, Ph.D. Interested in position combining research in experimental cytology and cancer with teaching in anatomy, cytology or related subjects. Will be at Cleveland meetings. Box 367, SCIENCE. X

Ecologist, Ph.D. 45. Distinguished teaching career and active in research. Especially interested in training science teachers. Desires temporary summer position; will consider longer appointment. Box 360, SCIENCE. X

Organic Research Chemist, Ph.D. Six years highly successful experience in pharmaceuticals and dyestuffs. Varied publications. Box 361, SCIENCE. X

Physical-Colloid Chemist—Electrical Engineer, (B.S. CalTech, M.S. Chemistry, E. E. Stanford). Four years research. Returning February after one year in India. Desires position utilizing training to utmost. c/o 149 W. College St., Oberlin, Ohio. 12/15

Physician of outstanding attainments; B.S. (Chemistry), M.D. (Analytical Chemistry), Ph.D. (Organic and Physiological Chemistry, Bacteriology, Physiology). M.D., one of leading universities. Prefers opportunity for coordinated development of pharmaceuticals utilizing unusually fine background in chemistry, pharmacology, clinical experimental work; for further information, please write Science Division, Medical Bureau (Burneice Larson, Director) Palfalve Building, Chicago.

Research or Technical Director: Organic and biochemist, Ph.D. Would like Chicago or New York location. Over 20 years diversified and productive experience in synthetics, nutrition, high polymers, pigmented coatings, consulting. Box 356, SCIENCE. 12/1

TEACHER—CHEMIST—PHYSICIAN

Prepares to continue present activity of teaching and development of young people on collegiate and/or graduate school level; medical and chemical training and education primary interest. Desires teaching position; excellent background, Ph.D. and M.D. and ten years teaching experience organic, biochemistry, physiology. Active in clinical and academic research. Excellent industrial contacts. Will consider some administrative duties.

REPLY BOX 366, SCIENCE. X

Personnel Placement

POSITIONS OPEN

Bacteriologist: Liberal Arts College, Midwest; male; start February; starting salary $4200. Box 362, SCIENCE. X

College graduate wishing fellowship in pharmacology leading to Master's or Ph.D. degree. Stipend available from $1000-$1500 per year. Box 365, SCIENCE. X

Educational Representative—to contact teachers in medical and allied schools, colleges and schools of nursing in Southeast territory, comprising states of North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi and Tennessee, with headquarters in Atlanta. College graduate 25-30 years old science background and teaching experience preferred. This is a full-time, salaried travelling job with all expenses paid. Write P.O. Box 416, Philadelphia 5, Pa.

M.D. with some experience for clinical research—$10,000. Ph.D. or M.D. in Chemistry or Chemical Engineering for Director of Laboratories, $10,000. Both positions in the East. Tomsett Associates, 1205 LeGere Bldg., Pittsburgh 19, Pa. 12/8

Pharmaceutical Research: Ph.D. or equivalent, under 35. Research, product formulation and development. Industrial experience preferred. West. Box 352, SCIENCE. 12/8

Positions Open:
(a) Professor of pharmacology by Eastern medical college; although medical degree preferred will consider man or woman with Ph.D. degree and teaching, research experience. (b) Bacteriologist: qualified to direct research division, large pharmaceutical company; Ph.D. required; sound knowledge of growth of bacteriology, molds, as used in production of penicillin and of production methods required; around $8000. (c) Physiologist: Ph.D. training in pharmacology required; research position involving responsibility for routine examinations of new compounds; opportunity for independent research; East. (d) Director of research; preferably with background in field of synthetic organic chemistry; Ph.D. or M.D.; small company, expansion program; research experience in pharmaceutical industry desirable; $12,000-$15,000. S12-1 Science Division, Medical Bureau (Burneice Larson, Director) Palfalve Building, Chicago.

REGISTER NOW
for the Cleveland Meeting of the AAAS

AVOID CONGESTION AND DELAY
GET YOUR GENERAL PROGRAM –
BY FIRST CLASS MAIL – EARLY IN DECEMBER

Registration in advance of arrival at the 117th Annual Meeting of the AAAS in the downtown hotels of Cleveland, December 26–30, 1950, has so many advantages that we wonder why almost everyone doesn’t take this simple step. For instance:

1. You avoid congestion and delay at the Registration Desks in busy foyers at time of arrival. All indications point to a large attendance since all of the Association’s seventeen sections and subsections, and more than forty societies, will have sessions with excellent programs and there will be a number of important symposia.

2. You receive the General Program early in December in ample time, unhurriedly to decide among the events and the sessions that you wish to attend.

3. Your name and hotel address will be in the enlarged Visible Directory the first hour of the first day of the meetings, since it will be posted in Washington as soon as processed.

4. Advance Registrants will have the same privileges of receiving a map and directory of points of interest of Cleveland, literature, radio broadcast tickets, etc. At the convenience of Advance Registrants, these will be distributed from the Main Registration in the Public Auditorium—the location of the Annual Science Exposition, the Visible Directory, and the Science Theatre. Admission to the splendid series of latest scientific films will be free to all Registrants.

At the 1949 Meeting, the Council of the AAAS voted overwhelmingly to continue Advance Registration. To insure its prompt receipt, the General Program will be sent by first class mail December 1–4, 1950—which is also the closing date for Advance Registration.

- - - - - - - THIS IS YOUR ADVANCE REGISTRATION COUPON - - - - - - -

1. Advance Registration Fee (the extra quarter covers part of the first class postage) enclosed:
   □ $2.25 A.A.A.S. Member (check one) □ $2.25 College Student
   □ $2.25 Wife (or Husband) of Registrant □ $3.25 Nonmember of A.A.A.S.

2. FULL NAME (Miss, Mrs., Dr., etc.) (Please print or typewrite)
   (Last) (First) (Initial)

3. ACADEMIC, PROFESSIONAL, OR BUSINESS CONNECTION

4. OFFICE OR HOME ADDRESS (For receipt of Program and Badge)

5. YOUR FIELD OF INTEREST

6. CONVENTION ADDRESS (If not known now may be added later)

7. DATE OF ARRIVAL ___________________ DATE OF DEPARTURE ___________________

Please mail this Coupon and your check or money order for the fee, $2.25 or $3.25, to
AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
1515 Massachusetts Avenue, N.W., Washington 5, D. C.
Now you may have Perfect Projection of X-Ray Film

The newly designed and engineered Dillon-Murphy* Roentgenogram projector is now available as a single compact, completely mobile unit. This projector is the result of ten years of experimentation and one year of engineering development and design. It provides perfect projection of up to 14 x 17" roentgenograms to small or large groups. More important, you can now project a brilliant image with complete detail.

All-glass optical system of 8 precision ground lenses makes brilliant illumination of screen possible. Aberration is overcome by specially designed custom-made lenses. There is no "bright spot" in the center and the resolution of the projected image is equal to the film itself. Frequent refocussing is unnecessary. Present owners acclaim the performance of this new Dillon-Murphy Roentgenogram Projector.

**CLINICALLY TESTED**

- Projects full size 14 x 17" original roentgenograms
- Perfect for hospital staff meetings — roentgenologic conferences — professional societies — classes of medical students
- Easily transported
- Brilliant image can be projected with complete detail in small rooms or large lecture halls
- Image may be projected for any length of time without damage to film
- Resolution of projected image is equal to roentgenogram
