Table of Contents

Protein and Nucleic Acid Conference:
E. R. Blout and Paul M. Doty ........................................ 639

Technical Papers
Effect of X-Irradiation in Oxygen and in Hydrogen at Normal and Positive Pressures on Chromosome aberration Frequency in Tradescantia microspores: Norman H. Giles, Jr., and Alvin V. Beatty .... 643
Detection of Internally-borne bacterial pathogens of beans by a rapid phage-plaque count technique: H. Katznelson .................... 645
Potentiation of muscular contraction by the nitrate-ion: Arthur J. Kahn and Alexander Sandow ............. 647
The mechanism of action of organic mercury compounds on cytochrome oxidase: Sister M. Angelice Seibert, Cornelius W. Kreke, and Elton S. Cook .... 649
Differentiation of bacterial species and variation within species by means of 2,3,5-triphenyltetrazolium chloride in culture medium: I. Forest Huddleston and Betty Balfuzer ........ 651
Obligate autotrophy in Chlamydomonas moewusu Gerloff: Joyce Chismore Lewin .... 652
A coenzyme of spleen β-glucuronidase: Peter Bernfeld and William H. Fishman .......... 653
An improved water separator: Richard N. Blomberg and William F. Bruce ............ 655

Comments and Communications
Scientific ethics: Max C. Markley .................................. 656
The use of sodium propionate in isolating actinomyces from soils: Patricia Crook, C. C. Carpenter, and Paul F. Kiens ............... 656

Book Reviews
A geography of Europe: Jean Gottmann. Reviewed by Ralph E. Olson .......... 657
Biological actions of sex hormones: Harold Burrows. Reviewed by M. X. Zarrow ................. 660

Scientific Book Register ........................................... 660

News and Notes
Conference on ionospheric physics: Clinton H. Grace .................... 661
