Reviews entire field from a chemical point of view

First systematized information on hydrazine and its derivatives

Question of choice discussed in new book — A Cowles Commission monograph

Emphasizes a practical approach to discovery and trapping of oil and gas

CRYSTAL GROWTH
By H. E. Buckley, University of Manchester, England. A comprehensive coverage of crystal growth, ideas and research by one of the foremost men in the field. Approaching the subject from a chemical viewpoint, the book covers solution, solubility, and supersolubility, the artificial preparation of crystals, recent theories of crystal growth, ideal and real crystals, miscellaneous types of crystallization, and peculiarities of crystal growth. January 1951. 571 pages. 267 illus. $9.00.

THE CHEMISTRY OF HYDRAZINE
By L. F. Audrieth and Betty Ackerson Ogg, both at the University of Illinois. A practical treatment of a potentially useful hydronitrogen. Presents important physical and chemical characteristics, reducing properties, and methods of formation and preparation of hydrazine and its important compounds. March 1951. Approx. 242 pages. Prob. $4.50.

SOCIAL CHOICE and INDIVIDUAL VALUES
By K. J. Arrow, Stanford University. Deals with the question of whether it is possible to construct a social preference function (as a guide to choice among alternatives) which reflects, in an objective and impartial manner, the preference of all individuals in regard to these alternatives. February 1951. 99 pages. $2.50.

PETROLEUM GEOLOGY
By K. K. Landes, University of Michigan. This is the only modern book covering all three divisions of petroleum geology—geological occurrences of oil and gas deposits, geographical distribution of oil and gas deposits, and techniques for locating oil and gas. February 1951. Approx. 643 pages. 241 illus. Prob. $10.00.

Send for copies on approval.

JOHN WILEY & SONS, Inc. 440 Fourth Avenue New York 16, N. Y.
UTILITY POLARIMETER
Made in U.S.A.

OUTSTANDING FEATURES!
- Simplified zero adjustment for Analyzer
- Standard 30 cm, tough to accommodate standard size polarimeter tubes up to 220 mm in length
- Extra large circular scale with prominently engraved lines and numerals to eliminate the necessity of magnifiers
- Height of optical axis 14", the same as for larger model polarimeters

Utility Polarimeter, on heavy base providing a reading accuracy to 0.1 angular degree, with estimations possible to 0.05°. Variable Brightness Glan-Thompson Polarizer and a Laurent quartz plate with very fine edge for half-shaded field. Full 6" diameter scale from 0° to 180°. Supplied with Orange glass filter for isolating sodium "D" line.

CANCER
the subject of outstanding A. A. S. Symposium Volumes:

MAMMARY TUMORS IN MICE, 1945:
10 contributors, VIII + 223 pages, 7½ × 10½, clothbound, double column, illustrated, $3.50. Cash order price to A.A.A.S. members $3.00.
... Coordinated knowledge of cancer of the breast in mice.
... It cannot fail to stimulate interest and further research efforts in one of our most fascinating and important biological problems.
... Prepared by members of the staff of the National Cancer Institute.

APPROACHES TO TUMOR CHEMOTHERAPY, 1947:
93 contributors, X + 442 pages, 7½ × 10½, clothbound, double column, illustrated, $7.75. Cash order price to A.A.A.S. members $6.50.
... A progress report, addressed largely to future workers.
... An important and trustworthy reference book.
... Planned under the auspices of National Cancer Institute, Memorial Hospital of New York, Sloan-Kettering Institute for Cancer Research, Lankman Institute of Philadelphia, and others.

TO: AAAS, 1515 Mass. Ave., N.W.
Washington 5, D. C.

Announcing Two Important New Basic Texts

MICROBIOLOGY: General and Applied

By William Bowen Sarles, William Carroll Frazier, Joe Bransford Wilson, and Stanley Glenn Knight

University of Wisconsin

To be published next Monday, January 22, this outstanding text is already well known to college teachers of bacteriology and is awaited with keen anticipation. For ten years successive mimeographed editions have been tested, not only at Wisconsin, but at several other colleges and universities, and the book has been constantly revised and rewritten to make it fit the needs of students in arts, general science, agriculture, home economics, pharmacy, chemistry, and engineering. MICROBIOLOGY is a comprehensive basic text for the first course in general bacteriology. About a third of the book is devoted to the fundamentals of the subject, somewhat more than a third to its important applications in all fields, and the balance to infectious diseases of man, animals, and plants. The illustrations, mostly photomicrographs, are ample and pertinent.

493 pages $4.50

An INTRODUCTION to PSYCHOLOGY

By Gardner Murphy

One of America's most eminent psychologists—the editor of Harper's distinguished Psychological Series—here proves that he can write as effectively for the beginning student as for the advanced student and the research worker. An INTRODUCTION to PSYCHOLOGY makes a new approach to the subject, and one which will appeal strongly to many students. A systematic and unified presentation, it utilizes what might be called a "personalistic" point of view, developed primarily in the study of personality. In other words, it focuses upon the nature of the whole person; motives, precepts, thoughts, attitudes are considered as activities of persons. Illustrations are drawn from all kinds of sources, including literature, and there are 70 half-tones and drawings and six color plates. Accompanying chapter tests and a workbook will be ready shortly.

564 pages plus index $4.25

HARPER & BROTHERS, 49 East 33d Street, New York 16, N. Y.

January 19, 1951
The first complete biography of one of America’s foremost scientists

JOSEPH HENRY:
HIS LIFE AND WORK

by Thomas Coulson

ALTHOUGH Henry had been equalled only by Franklin as a scientist in America, this biography of him is the first comprehensive portrayal of one of the foremost physicists of the 19th century. His struggle for an education, his difficulties with his first experiments, his discovery of self-induction, his organization of the Smithsonian Institution, his defense against Morse in the telegraph controversy, his organization of the Weather Bureau, and his friendship with Lincoln, Wheatstone, Agassiz, Bache, Faraday, Torrey—all these are part of an account which places Joseph Henry at last in the position in the annals of science to which he has long been entitled. 352 pages, $5.00.

GBI 60 LABORATORY PARK CHAGRIN FALLS, OHIO

During the past thirty years The Coleman & Bell Company has developed processes for the preparation and purification of several hundred dyes for use as biological stains. These products are prepared in our laboratories on a semi-commercial scale. In connection with their manufacture and purification, we have developed a testing laboratory equipped for testing the purity of these products both chemically and biologically. Most of the common stains are offered with the certificate of a Biological Stain Commission.

C & B Products are distributed by Laboratory and Physician Supply Houses Throughout the World

THE RICKETTSIAL DISEASES OF MAN

This symposium volume is a comprehensive survey of the general field of Rickettsial diseases in man. Among the contributors appear the names of many of the foremost American authorities on this important and relatively new field of medicine.

The first group of papers includes discussions of the taxonomy, biology, isolation, and identification of vectors, and reservoirs of infection of the Rickettsial diseases of man. The second group of papers is devoted to discussions of serological reactions, the Weil-Felix reaction, the complement-fixation and agglutination reactions, and the preparation and standardization of Rickettsial vaccines. The final group of papers treats of insecticides, methods of their application, and mite controls.

Many of the 27 contributors to this volume during World War II were on the battle fronts in Africa, Italy, France and Germany, protecting our troops and the local populations wherever Rickettsial diseases prevailed. Rarely, if ever, have the authors of a medical book had so wide and so successful practical experience in the very subjects on which they have written.

To: A.A.A.S. Publications
1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Please accept my order for one copy of The Rickettsial Diseases of Man (7½ x 10¼, cloth bound). My check in correct payment is enclosed ($5.25 to A.A.A.S. members, $6.25 to those who are not members; including postage.)

SCIENCE, Vol. 113
When Accuracy is Important

THE CASTLE PRECISION INCUBATOR is designed and built to give you the precise accuracy that is essential in bacteriological work. Construction is of monel metal for lifetime use.

Independent laboratory tests proved these two important facts:

UNIFORMITY: $\pm \frac{1}{6}^\circ C$. Never as much as a degree variation between top and bottom of chamber even when loaded.

CONSTANT TEMPERATURE: $\pm \frac{1}{2}^\circ C$ to $\frac{1}{4}^\circ C$. Never more than a fraction of a degree variation at the thermometer... despite room temperature fluctuations from $10^\circ C$ to $35^\circ C$.

For full details write: Wilmot Castle Co., 1212 University Ave., Rochester 7, N.Y.

PERSONNEL PLACEMENT

CHARGES and REQUIREMENTS
for "PERSONNEL PLACEMENT" Ads
1. Rate: 15¢ per word, minimum charge $3.00 for each insertion. If desired, a "Box Number" will be supplied, so that replies can be directed to SCIENCE for immediate forwarding. Such service counts as 10 words (e.g., a 25-word ad, plus a "Box Number" equals 35 words). In all ads will be set in regular, uniform style, without display; the first word, only, in bold face type.

For display ads, using type larger or of a different style than the uniform settings, enclosed with separate border rules, the rate is 17.50¢ per inch; no extra charge for "Box Numbers".

2. Advance Payment: All Personnel Placement ads, classified or display, must be accompanied by correct remittance, made payable to SCIENCE. Insertion can not be made until payment is received.

3. Closing Date: Advertisements must be received by SCIENCE, 1515 Mass. Ave., N.W., Washington 5, D.C., together with advance remittance, positively not later than 14 days preceding date of publication (Friday of every week).

PERSONNEL WANTED

Academic Position: Ph.D. Teaching, research, or departmental responsibilities in medical school, college, or university. Bacteriology, mycology, parasitology, public health, histology, and biology. 13 years teaching experience; several publications; honor and professional societies. Available February or September 1951. Box 378, SCIENCE.

Biochemist; M.S. (Chemical Engineering); Ph.D. (Biochemistry); three years, plant chemist in industry; eight years, biochemist, research department, university medical school; for further information, please write Science Division, Medical Bureau (Burneice Larson, Director) Palmolive Building, Chicago, Ill.

PERSONNEL OPEN

Biochemist, Clinical Laboratory, large north-central University Hospital requires biochemist competent to supervise adequate technique. Experience with newer methods, including flame-photometry, essential. Salary $5,000.00. Box 402, SCIENCE, 1/26.

Biochemist, Technologist (female) for studies with microorganisms and bacteriological in industrial research laboratory. In replying give experience, references and salary expected. Box 401, SCIENCE, 1/26.

EDITORIAL ASSISTANT at Princeton University

Man or woman with college degree, courses in physical sciences. Experience in technical publications work desired. Assist editor series of monographs in jet propulsion. Stimulating activity. Salary according to qualifications.

Reply BOX 399, SCIENCE 1/9

Positions Open:
(a) Bacteriologist or serologist, Ph.D., to supervise blood bank and departments of bacteriology and serology, general voluntary hospital, fairly large size; minimum $6,000; California. (b) Animal pathologist; research laboratories, university medical school; part or full-time; vicinity New York City. (c) Pharmacologist and, also, organic chemist; Ph.D.'s, for research departments; pharmaceutical company; East. (d) Biochemist; Ph.D., with sound knowledge of bacteriology, to serve as assistant director of research, pharmaceutical company; East. (e) Bacteriologist or microbiologist; Ph.D.; research laboratories; industrial company; Chicago. (f) Instructor or assistant professor microbiology; recent Ph.D. preferred; September 1951 appointment. (g) Research librarian; background in organic chemistry required; ability to translate German and French advantageous, pharmaceutical company; East. S1-3 Science Division, Medical Bureau (Burneice Larson, Director) Palmolive Building, Chicago.

PERSONNEL PLACEMENT

RESEARCH ASSOCIATE

Opening in large Eastern Pharmaceutical Company for Research Associate Ph.D. or Sc.D. in bacteriology or biochemistry with an immuno-chemical background to direct studies on antigen separations and purifications. Please forward resume including age, experience and salary desired to BOX 400, SCIENCE

THE NATIONAL RESEARCH COUNCIL—
in September 1949 held a Symposium on

BRUCELLOSIS

The 24 papers presented by 30 authors have been published in book form by the A.A.A.S.: 6 × 9, clothbound, illustrations, tables, references, author and subject indexes, VI + 271 pages.

BRUCELLOSIS presents the advances in knowledge in the prevention, diagnosis, and treatment of this disease. Practicing physicians, veterinarians, and public health workers, are vitally concerned and should be familiar with the many aspects of this problem treated in BRUCELLOSIS.

SHALL WE REPRINT BRUCELLOSIS?

The first printing of July 1950 has been sold out. The book will again go to press on February 5th, and this time the type, previously held, will be destroyed. We do not intend to order many copies for stock, because we expect rapid progress in brucellosis research.
