Fifty Years of Quantum Theory

Max Planck, the Man and His Work:
Walter Meissner .......................................................... 75

The Advent of the Quantum Theory:
Albert Einstein ............................................................. 82

Fifty Years of Quantum Theory:
A. Sommerfeld and F. Bopp ............................................. 85

Quantum Theory and Chemistry:
Linus Pauling ..................................................................... 92

Conceptual Foundations of the Quantum Theory:
Henry Margenau .................................................................. 95

Technical Papers

Nuclear Models: Victor Weisskopf ........................................ 101

Regarding Covariant Subtraction of Infinities: G. Breit .......................................................... 103

Nonclassical Reaction Kinetics:
Henry Eyring and Peter Gibbs ............................................ 104

Quantum-Theoretical Densities of Solids at Extreme Compression: Walter M. Elsasser ........................................ 105

News and Notes

The International Oxford Conference on Nuclear Physics: E. P. Wigner .......................................................... 107
