Contents

The Alaskan Science Conference:
John C. Reed and Harold J. Coolidge ................................................................. 223

Osmotic Quantities in Plant Cells: J. Levitt .............................................................. 228

Technical Papers
The Breeding Site of Drosophila lacicola Patterson:
Herman T. Spieth ........................................................................................................ 232

An Improved Micromanipulator for Cellular Microsurgery:
M. J. Kopac .................................................................................................................. 232

The Effect of Cortisone on the Pathogenesis of Tuberculosis:
Max B. Lurie et al. ........................................................................................................ 234

The Adaptive Increase of the Tryptophan Peroxidase-Oxidase System of Liver:
W. E. Knox and A. H. Mehler ..................................................................................... 237

Experiments on the Catalytic Exchange of Acetone and Propane with Deuterium:
L. N. Kauder and T. I. Taylor ..................................................................................... 238

Adrenal Cholesterol in the Scorbatic Guinea Pig:
M. Jane Oesterling and C. N. H. Long ........................................................................ 241

A Universal Motion Analyzer Applied to Psychomotor Performance:
Karl U. Smith and Robert Wehrkamp .................................................................... 242

Phosphorus in Neutron-Bombarde Phosphates: Role of Hypophosphate:
J. G. A. Fiskell ............................................................................................................. 244

Comments and Communications
Successful Transplantation of a Fertilized Bovine Ovum;
Two Points of View; Perfection None Must Hope to Find;
A Return to Medievalism in Science Teaching; Mass Mortality and Dinoflagellate Blooms in the Gulf of Mexico .......................................................... 247

Book Reviews
Childhood and Society; Structural Chemistry of Inorganic Compounds; Radio Communication at Ultra High Frequency ...................................................... 253

News and Notes
Association for Research in Nervous and Mental Disease:
Robert G. Grenell ....................................................................................................... 255

College Enrollment .................................................................................................... 3

Meetings & Conferences ............................................................................................ 16

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
113 (2931)

Science 113 (2931), 3-260.
