Summarizes work already accomplished  — opens new areas for research

**MEDICINAL CHEMISTRY, Volume I**

A Series of Reviews Prepared Under the Auspices of the Division of Medicinal Chemistry of the American Chemical Society

Edited by C. M. Suter, Sterling-Winthrop Research Institute.

Summarizes available data on biological properties of organic compounds and correlates the relationship between chemical structure and physiological activity in each area covered. Written by men actively engaged in industrial research, Volume I covers antithyroid compounds, antispasmodics, derivatives of carboxylic acids, antibiotics from plants, benzoates and substituted benzoates as local anesthetics, and analgesics. Covers methods of preparing the compound and the nature of the reactions involved and the types of testing procedure and behavior of the more active compounds. March 1951. 473 pages. $12.00.

Gives explicit directions for over 500 useful organic compounds

**PREPARATION of ORGANIC INTERMEDIATES**

By David A. Shirley, Tulane University. This book gives the laboratory worker specific, detailed instructions for preparing more than 500 useful organic compounds that are not commercially available or are overly expensive. April 1951. Approx. 308 pages. Prob. $6.00.

Presents first comprehensive treatment of nematology

**SOIL AND FRESHWATER NEMATODES**

By T. Goodey, Rothamsted Experimental Station, Harpenden, England. Covers the free-living forms found in decaying plant tissues, in soils and humus, in freshwater habitats, and sometimes in special association with insects. Provides helpful illustrations of each genus considered. March 1951. 390 pages. $7.00.

Send for copies on approval.

Proc., 9:11, March, 1950
GENERAL CHEMISTRY. New 3rd edition
By William A. Felsing and George W. Watt, The University of Texas. In press
Here is the new edition of this successful text. Greater emphasis is placed on fundamental principles in the elementary course in chemistry, and the changes that have been made are such as to provide a more rigorous course of study with particular emphasis upon the quantitative aspects of the subject. The number and variety of the problems has been greatly expanded.

DESTRUCTIVE AND USEFUL INSECTS. Their Habits and Control. New 3rd Edition
A thorough revision of this standard advanced text and reference work in applied entomology. The order of presentation remains essentially the same, but many new developments and recent discoveries in insecticides have been incorporated, making this book one of the most comprehensive and up-to-date studies in the field.

MILK AND MILK PRODUCTS. New 4th edition
In this revision of an outstanding introductory text, the authors concentrate on the presentation of acknowledged facts pertaining to the composition of milk, its properties, food value and bacteriology, and its use in the preparation of cheese, butter, ice cream, condensed and dry milk.

GUIDE TO GEOLOGIC LITERATURE
By Richard M. Pearl, Colorado College. 239 pages, $3.75
A guidebook to the extensive and complex world-literature of geology, its subdivisions, and its related fields. It includes all published literature in every language, from the earliest dates to current material of vital significance. It is not a subject directory but, rather a detailed overall guide to the available types of geologic literature.

For Large Capacity Laboratory Work

CASTLE RECTANGULAR AUTOCLAVES

Large laboratories find the answer to their heavy sterilizing requirements in a Castle Rectangular Autoclave.

These Autoclaves are equipped with dual discharge for three functions: (1) sterilization at temperature of pure steam; (2) sterilization at temperature of flowing steam; (3) sterilization at temperature of steam and air combined.

Every feature of these heavy-duty Autoclaves is designed to simplify its operation and guarantee its safety. For full details write for “Bulletin 2-5.” Wilmot Castle Company, 1212 University Avenue, Rochester 7, N. Y.

SOIL TESTERS

by Hellige and Truong

Hellige-Truog Testers have gained universal acclaim because they are based on sound scientific methods and are highly accurate. They have won the sponsorship of the foremost authorities on soil chemistry and thousands of testers are used by U.S. Government Agencies, as well as by professional and amateur gardeners.

FOR THE DETERMINATION OF SOIL REACTION

Important New Basic Texts—Spring 1951

Bacteriology

MICROBIOLOGY: General and Applied

SARLES, FRAZIER, WILSON, and KNIGHT, University of Wisconsin

Widely known long before its publication in January, through five preliminary experimental editions used in a number of colleges, this carefully planned and thoroughly tested text has had a most gratifying reception. Designed to meet the needs of the general student, it applies fundamental principles of bacteriology to many fields of knowledge and practice: agriculture, home economics, biology, engineering, public health, chemistry, sanitation, medicine, for example. Be sure to examine this text before you plan your next course.

493 pages $4.50

Geology

A TEXTBOOK OF GEOLOGY

ROBERT M. GARRELS, Northwestern University

This distinguished new text marks a genuine advance in the teaching of introductory geology: its new analytical approach stresses for the student the importance of reason rather than of memory. The author's use of the developmental method gives the work a high degree of organic unity. The text is not only unusually attractive physically, but it is interesting and stimulating in style, comprehensive in scope, and scientifically sound in content. The outstanding illustrations include more than 100 half-tones and nearly 200 charts, graphs, and diagrams. In Harper's Geoscience Series.

511 pages $5.00

Psychology

AN INTRODUCTION TO PSYCHOLOGY

GARDNER MURPHY, College of the City of New York

This newly published text is fully as outstanding a contribution for the beginning psychology course as Gardner Murphy's noted Personality is for advanced courses. The presentation is systematic, utilizing a "personalistic" point of view developed primarily in the study of personality. The illustrations include seventy half-tones and drawings and six color plates. The text is clearly and simply written and attractively printed and bound. A helpful workbook and well-planned chapter tests facilitate the use of the text.

583 pages $4.25

Second edition
Completely revised and enlarged

Radioactive Tracers in Biology
An Introduction to Tracer Methodology

By MARTIN D. KAMEN
Washington University Medical School

Dr. Kamen's text, the first in its field and still the only one of its kind, has been extensively expanded and revised in this second edition. The new material allows for increased integration and more critical evaluation of tracer methodology as applied to fundamental biological research. The new chapters extend the original basic material in biochemical and physiological research. Medical applications have been incorporated directly in the section on physiology; other new chapters and appendixes present information on radiation dosage, radiation hazards and health physics, radioactivity units, listings of useful radioactive nuclides, and specific procedures for calibration of the widely used isotopes, $^{32}$P and $^{131}$I.

1951, xiv, 429 pages, illustrated, $7.50

VOLUME II
ADVANCES IN

Biological and Medical Physics

Edited by JOHN H. LAWRENCE and JOSEPH G. HAMILTON
University of California, Berkeley

1951, xii, 348 pages, illustrated, $7.80

ACADEMIC PRESS INC., Publishers, New York 10, N. Y.
Fructose-6-phosphate (barium salt), glucose-7-phosphate (dipotassium salt), and phosphoglyceric acid (barium salt), three vitally important compounds in fermentation and enzyme reaction studies, are now available from Schwarz Laboratories, Inc. Also immediately supplied: Schwarz brand of fructose diphosphates (calcium, magnesium, and barium salts), purity 85 per cent minimum.

Schwarz fine chemicals satisfy the exacting requirements of products intended for use in biochemical or clinical research.

SCIENCE • 1515 Mass. Ave., N.W., Wash. 5, D. C.

POSITIONS WANTED

Anatomist (Ph.D. June '51) Gross, microscopic and comparative anatomy. 8 years teaching experience. Publications. Desires professorship in anatomy or zoology department with opportunity for teaching and research. East. Box 444, SCIENCE.

Bacteriologist-Immunologist, Ph.D. 11 years experience medical Bacteriology, teaching, research, clinical and commercial biologicals. Many publications. Age 35. Available June. Box 445, SCIENCE.

Biochemist; Ph.D.; since 1945, director development and distributor of plasma and liver fractions, pituitary factors for animal experimentation, purified enzymes; broad experience in research; for further information, please write Burneice Larson, Medical Bureau, Palmolive Building, Chicago.

Dentist—desires position in basic dental research, especially in bacteriology and pathology. Experienced in bacteriology, immunology, tissue culture, clinical laboratory procedures. Box 448, SCIENCE.

Physiologist-Biochemist. Recent Ph.D. research experience. Box 446, SCIENCE.

YOU reach over 32,000 scientists in these columns—at a very low cost

POSITIONS OPEN

Biocemist—450 bed hospital. Ph.D. preferred with thorough knowledge of spectrophotometry and flame photometry. Salary $5,600 or more depending on qualifications. Box 426, SCIENCE.

Chemical Engineers and Pharmacologists for large Pharmaceutical and Antibiotic Mfr. in East. Write Biochemical and Pharmaceutical Dept., Scientists’ and Engineers’ Ass’n., 14 Apple Tree Drive, Stamford, Conn. (Agency).

Electronics Research Engineer—B.S., M.S., or Ph.D. Degree in Electrical Engineering or Physics and at least 5 years experience in electronic measuring instruments, servo-mechanisms, A.C. and D.C. amplifiers, audio and radio frequency equipment. Salary $8,000 to $12,000—depending upon qualifications. Rush, Tomsett Associates, 1209 Berger Building, Pittsburgh 19, Pennsylvania.

Ph.D. in Physics. Qualifications: Training and experience in solid state and dielectric phenomena. Full time classified research, teaching optional. Ph.D. in Physical Chemistry. Qualifications: Training and experience in chemical kinetics, thermodynamics, strong organic chemistry. Full time classified research, teaching optional. One Opening: Part-time classified research in Physical Chemistry (physical properties of organic compounds), part-time work toward Ph.D. Salary up to $2400 for 11 months. Three Openings: Part-time, classified research, part-time work toward a Masters Degree in Physical Chemistry, and Electronic Engineering. Salary up to $1800 for 11 months. Two Openings: Part-time, classified research, part-time work toward a Masters Degree in Physics. Candidate experienced in electron microscopy and diffraction, or X-ray diffraction or spectroscopy preferred. Salary up to $1800 for 11 months. Salaries according to qualifications and experience. Please apply to Director, Institute of Science and Technology, University of Arkansas, Fayetteville, Arkansas. Interviews at Boston and Cleveland A.C.S. meetings.

Physiologist, Ph.D. as instructor in Physiology Department of North Eastern Medical School. Teaching 40 per cent, research 60 per cent of time. Experience or interest in training in cardiovascular research field required. Prior experience in Medical School teaching desirable but not essential. Available July 1, 1951. Box 447, SCIENCE.

CIVIL DEFENSE INSTRUMENTS AVAILABLE NOW

TRACERLAB HAS AVAILABLE TWO NEW PRECISION INSTRUMENTS FOR CIVIL DEFENSE AND INDUSTRIAL SAFETY MONITORING.

The SU-10 RADIAC is an ionization chamber type survey meter with five differently colored scale ranges of 5, 50, 500, 5,000, and 50,000 mr/hr. It is built to Armed Forces specifications and has been approved by the Federal Civilian Defense Agency. The instrument is shock proof and immersion proof and will operate under conditions of extreme temperature and humidity. A built-in radioactive checking source and long life batteries are also provided.

The SU-6 POCKET RADIAC is an ionization chamber type instrument which has a single logarithmic scale with a range of 25 r/hr. It will also be available soon with a range of 500 r/hr. This survey meter can be operated with one hand by means of a single control knob. It fits easily into hand or pocket and utilizes hearing aid components.

Tracerlab
TRACERLAB INC., 130 HIGH STREET, BOSTON 10, MASS.
Single adapter or double revolving nosepiece. Requires only a quick ¼ turn to switch from one power to another.

Circular housing of double nosepiece protects paired objectives from dust and abusive handling.

Low overall height, and slightly inclined eyepieces permit comfortable posture.

Clear, erect images and wide, flat fields.

Magnification range from 6.8 to 98X.

Convenient, well proportioned stand.

$185.00 for No. 67R with 1.0X paired objectives and 10X Huygenian eyepieces, without base and mirror.

$258.00 for No. 57W with 1.7X and 3.4X paired objectives and 10X Huygenian eyepieces, with base and mirror.

Other models proportionately low priced.

These precision instruments are indispensable in mineralogy, metallurgy, small parts inspection, critical assembly operations, food processing, science teaching. See your AO Spencer distributor for a demonstration, or write Dept. P3.
