Photography makes this engineer's notes an indisputable record

It's the photograph of the oscillograph traces in this engineer's notebook that makes the page an indisputable record of wave form variations in passing from second harmonic distortion, through a nearly pure sine wave, to third harmonic distortion.

With photography, your oscillograph is much more than a testing and measuring device. It becomes, in addition, an instrument that preserves a record of performance long after the circuit has been torn down, and retains it for detailed study whenever you wish. Eastman Kodak Company, Industrial Photographic Division, Rochester 4, N. Y.

PHOTORECORDING... an important function of photography
The subject in its earth science aspects

Gives equal emphasis to facts and principles of zoology

Over 500 useful organic compounds

Treats fundamental concepts in detail

Latest in a well-known series

PHYSICAL GEOGRAPHY

By Arthur N. Strahler, Columbia University. Presents physical geography as a basic earth science in its own right. In this book, Dr. Strahler is primarily concerned with explaining the processes and forms which have been developed in the atmosphere and hydrosphere and on the earth's land surface. Although the author uses many regional examples and outlines the global distribution patterns of weather and climates, he does not attempt an encyclopedic region-by-region description of the world—he puts his first emphasis on principles rather than descriptive details. Physical Geography contains authoritative, readable material on time, tides, illumination, weather, the great soil groups, rocks, folds and faults, and other physical attributes. The extremely broad coverage is reflected in a set of full-color Visual Aids, which will soon be available to supplement the text. May 1951. Approx. 442 double-column pages. 514 illus. Prob. $6.50

MAN AND THE ANIMAL WORLD

By Bernal R. Weimer, Bethany College. Since the animal that the student knows most about is man, Man and the Animal World begins with a study of man as an introduction to the life principles and processes manifested in other animals. The book is carefully balanced—giving equal stress to the facts and basic principles of zoology while maintaining interest and presenting all the important, basic information. Dr. Weimer presents a brief natural history survey of the various taxonomic groups and gives adequate emphasis to the physiology of animals and their importance from the standpoint of human health, food supply, and other aspects of zoology. Combining rigor with human appeal, the author has designed this book for a one-semester course in zoology which will give the student the full perspective of structure, physiology and animal relations. 321 illustrations serve as an excellent teaching aid. May 1951. Approx. 518 pages. $5.00.

PREPARATION OF ORGANIC INTERMEDIATES

By David A. Shirley, Tulane University. April 1951. Approx. 308 pages. Prob. $6.00.

OPTICAL CRYSTALLOGRAPHY

Second edition by Ernest E. Wahlstrom, University of Colorado. April 1951. 247 pages. $4.50.

INTERSCIENCE

MEDICINAL CHEMISTRY—Chemistry, Biochemistry, Therapeutic, and Pharmacological Action of Natural and Synthetic Drugs.
In two volumes.
By ALFRED BURGER, Associate Professor of Chemistry, University of Virginia.
VOLUME I—May 1951. 6 x 9. 595 pages, 58 tables. $10.00
VOLUME II—September 1951. 6 x 9. approx. 490 pages, 60 tables. $10.00
This book is written as an advanced treatise on a professional level. Emphasis has been placed on chemical aspects. The author reviews structural analysis and syntheses of important medicinal chemicals, biological testing, and therapeutic usefulness as well as medicinal and veterinary drawbacks. While mainly designed for the chemist, biochemist, and pharmacologist in research and industry, it will acquaint the physician with the background and newer developments of drugs and give him an appreciation of the scientific work that has made his therapeutic tools possible.

Contents—

METHODS OF VITAMIN ASSAY
Prepared and edited by The Association of Vitamin Chemists, Inc.
Second edition completely revised and augmented.
1951, 6 x 9. 322 pages, 10 illus. $5.50
Over 50% new material!
Larger by 114 pages!
A completely new book!
The wide acceptance of the first edition encouraged the preparation of this second edition, in which methods have been revised to incorporate pertinent information from the current literature as well as modifications in procedure suggested by the many users of the book.

SOYBEANS AND SOYBEAN PRODUCTS—Their Chemistry and Technology.
In two volumes. Edited by KLARE S. MARKLEY.
VOLUME I: 1950. 6 x 9. 558 pages. 123 illus., 92 tables, 1 col. plate. $11.00
VOLUME II: 1951. 6 x 9. 624 pages, 92 illus., 81 tables, 1 col. plate. $11.00

THEORY OF ELECTRONS
By L. ROSENFELD, Professor of Theoretical Physics, University of Manchester.
1951. 6 x 9. 135 pages, 7 illus. $2.25
All books available on approval.

PERSONNEL PLACEMENT

YOUR ad here reaches over 32,000 foremost scientists in the leading educational institutions, industrial laboratories, and research foundations in the U. S. and 76 foreign countries—at a very low cost

CLASSIFIED: $15 per word, minimum charge $3.00. Use of Box Number counts as 10 additional words.

DISPLAY: $17.50 per inch, no charge for Box Number. Correct payment to SCIENCE must accompany all ads inserted usually made 2 or 3 weeks after receipt of ad.

SCIENCE • 1515 Mass. Ave., N.W., Wash. 5, D. C.

POSITIONS WANTED

Bacteriologist—B.S., single, draft exempt. Two years Public Health; special studies food bacteriology, chemical background. Box 483, SCIENCE.

Entomologist: M.S. Field and chemical experience, desires industrial or teaching position. Box 484, SCIENCE 4/20

Parasitologist, Ph.D. Publications in parasitic physiology, taxonomy, epidemiology. Available June. Box 455, SCIENCE 6/13

Positions Wanted:
(a) Bacteriologist; Ph.D.; eight years' teaching experience (Bacteriology); four years research bacteriologist and three years, director, development bacteriology, pharmaceutical industry.
(b) Physical Chemist; Ph.D. Sixteen years on faculty, medical college and director clinical laboratories; performs teaching or direction, research in clinical chemistry. For further information, please write Science Division, Medical Bureau (Burneice Larson, Director) Palmolive Building, Chicago.

Student, B.S. (Physics), M.A. (Applied Mathematics), desires summer position. Box 488, SCIENCE.

Zoologist: Ph.D., eight years experience, desires summer teaching, zoology, biology, physiology. Box 485, SCIENCE.

YOU reach over 32,000 scientists in these columns—at a very low cost

POSITIONS OPEN

Assistant Pathologist: starting immediately—500 bed general hospital affiliated with State University Medical School. Write Director Laboratories, Maimonides Hospital of Brooklyn, 4802 Tenth Avenue, Brooklyn 19, New York.

Positions Open:
(a) Biochemist to join cancer research group; Southwest. (b) Product Development Man; Ph.D. or Master's in pharmacy or experience in developing new pharmaceuticals required; south. (c) Pharmacologist or Bacteriologist, Ph.D. or M.D.; laboratories concerned principally with development of new antibiotics and antibiotic dosage forms, East. (d) Medical Bacteriologist; preferably Ph.D.; research laboratories, industrial company; West. (e) Assistant Medical Director; duties include medical writing, clinical investigation; East. (f) Bacteriologist; Ph.D. to direct research division, pharmaceutical company; knowledge of growth of bacteriology, moles used in penicillin required; $8000. (g) Assistant or Associate Professor of Anatomy, full-time position in medical school; East. (h) Science Division, Medical Bureau, (Burneice Larson, Director) Palmolive Building, Chicago.

PITUITARY-ADRENAL FUNCTION

6 × 9 inches, illustrated, clothbound, 224 pages—$4.00
Price to AAAS members for prepaid orders—$3.50

PITUITARY-ADRENAL FUNCTION continues the AAAS tradition of presenting in book form the collected papers presented at symposium programs of wide interest. This volume includes 22 papers delivered at a two-day Symposium on the Adrenal Cortex at the AAAS meeting in New York City, December 1949.

PITUITARY-ADRENAL FUNCTION assembles important contributions of a score of laboratories in the United States and Canada from which many of the recent major advances in pituitary-adrenal physiology and therapeutics have come, and includes studies on the regulation of adrenal cortical activity, the role of the cortical hormones in protein, carbohydrate, and mineral metabolism, and effects of the cortical steroids and the ACTH in various disease states. A summary chapter on "Adrenol-escence" by Dr. George Perera forecasts some of the possible future trends in this active field of endocrine research.

Enclosed is $_______. Please Accept my order for ______ copy of PITUITARY-ADRENAL FUNCTION.

NEW INSTRUMENTS
For TRACER WORK

Will be displayed by Tracerlab at the convention of the Federation of American Societies for Experimental Biology in Cleveland. Among these will be the three instruments illustrated on this page.

Also on exhibit will be various instruments for civil defense against radiation, including the only monitor which has been approved by the Federal Civil Defense Administration.

NEW Laboratory Monitor for checking contamination and laboratory background.

NEW Autoscaler for automatic measurements of radioactivity.

NEW Proportional Tube for selective measurement of alpha and beta radiation.

SPENCER SCHOLAR'S MICROSCOPE

BETTER 4 WAYS FOR TEACHING

Stage Temperature Favors Most Living Material
New heat-absorbing glass and baffle plate prevent overheating.

Saves Time Teaching Science
So easy to learn and to use...more time is free for teaching Science. Simple controls permit more rapid operation.

A Precision Scientific Instrument
Standard quality Spencer trade-marked optics. Precise all-metal bearing surfaces.

Low Cost to Buy and Maintain
Locked-in parts reduce maintenance costs. 'Spring loaded' focusing mechanism protects slides.

PRICE
$109.00
(For 100X - 430X model as illustrated)

- Spencer No. 78 Scholar's Microscope, with built-in factory-focused light source furnishes constant, uniform illumination and consequently better optical performance. Time-consuming and frequently faulty sub-stage adjustments are eliminated. Reversed position of microscope arm offers clear view of stage, objectives, and diaphragm openings. Low over-all height increases comfort. Time-saving single control provides rapid yet critical focusing. Ask your AO Distributor to show you the No. 78 Microscope...or write for catalog M153 to Dept. R2.
