images up to 10 feet across
even under oil-immersed objectives

Because of the virtually solar intensity of the Scopicon's high-pressure mercury arc, you can project sharply detailed images up to ten feet across even under oil-immersed microscope objectives. The light's white color demonstrates the various biological stains to their best advantage.

The Scopicon is highly adaptable — can be used with equal convenience for small-group study in a normally lit room, or for exhibition to large groups in a darkened auditorium. Let us send you the brochure describing this versatile instrument.
Affords new simplicity and flexibility for micro-studies in biological or chemical technics

The de Fonbrune micromanipulator, incorporating a pneumatic pump system, has proved exceptionally satisfactory for micro-studies in many fields. In the biological sciences the de Fonbrune instrument is used in cell dissection and isolation . . . micro-injection and operation on the protozoa . . . pH studies on living cells . . . isolation and transfer of single bacteria, etc. This flexible instrument has proved equally serviceable in study of fibers and yeast cells, in investigating oils, rust deposits, colloidal, and other materials.

Manufactured under exclusive license of the French patents, the de Fonbrune micromanipulator consists of a manipulator and receiver. These units may be used with any type of microscope . . . arranged for right or left hand operation. In use, the micro-tool is mounted on the receiver. Impulses from the pneumatic pumps of the manipulator are transmitted to the tool through sensitive metallic membranes. Within a range of 3 mm, the micro-instrument may be moved in any plane or angle by a single control. Ratio of displacement of control lever and micro-tool may be adjusted from 1:50 to 1:2,500 depending on range desired.

Experimental and Clinical Practice

A Symposium

Edited by Dr. Abraham White

UNIVERSITY OF CALIFORNIA MEDICAL CENTER, LOS ANGELES

A complete report—in convenient book form—of all that was reported and discussed at the First Annual Conference on Steroids in Clinical and Experimental Practice held in Cuernavaca, Mexico.

Another medical achievement! This book makes available for the first time an authoritative expression of opinion regarding the metabolic and clinical effects of a variety of steroids. Although the reports are concerned mainly with the 11-desoxy steroids, information of value is also given with reference to Cortisone and ACTH, generally for comparative purposes.

A summary of the clinical findings reported at the conference is included in the form of five summary tables, making it possible for the reader to learn, for each steroid studied, the type of clinical condition, the number of patients, the pharmaceutical form of preparation used, the average daily dose, the duration of the treatment and the actual clinical responses observed.

Of inestimable value to those actively engaged in scientific research as well as to general practitioners.

SCIENCE, Vol. 113
New Macmillan Texts

BRINKLEY

Principles of General Chemistry
4th Edition

This well-known chemistry text has been thoroughly revised. More emphasis is given to the experimental background of fundamental principles; there is closer integration of experimental data and theory and a broad coverage of inorganic chemistry. Published in April—$5.00

STANFORD

Man and the Living World
Revised Edition

Keeping the organization and approach the same, the author in his revision has added much up-to-date material on scope of science, antibiotics, atomic hazards, tracer research, reproduction, genetics, and the food prospects of the world. Other material has been condensed or deleted. Coming in June

MEYER

Introductory Chemistry

This text for the terminal course should be particularly useful to students of nutrition, nursing, and physical education as well as for any student who needs a basic knowledge of organic and inorganic chemistry for advanced study in other fields. Coming in June

THE MACMILLAN COMPANY
60 FIFTH AVENUE, NEW YORK 11, NEW YORK
In order to meet the specialized needs of Civil Defense organization, NUCLEAR has developed specialized instruments for civilian protection. From a pocket monitor to complete central-station continuous radioactivity recording systems, NUCLEAR instrumentation offers reliable, efficient units for Civil Defense use.

Briefly described below are three of the most recently perfected NUCLEAR instruments for Civil Defense. Complete details on these and other NUCLEAR instruments will be furnished promptly upon request.

nuclear "CIVION" (Model 2383)—Compact High-Level Monitor
- **Small**—only 2” x 3” x 6¼”.
- **Light**—weighs 21 ounces.
- **Watertight**—tough plastic case can be immersed in water without damage.
- **Reading Range** from .025 r/hr. to 500 r/hr.
- **Detects** gamma and strong beta radiation.
- **One Control** is "On-Off" switch in convenient thumb-operating position.
- **Illuminated Meter** for night use.
- **Long Life** from batteries...in excess of 100 hours continuous.
- **No Zero Set** required except when replacing batteries.
- **Batteries** quickly replaceable without tools.
- **Meter** damped for stability, clearly marked 2” scale under magnifying lens window.
- **All-Plastic Ion Chamber** for true roentgen reading within F.C.D.A. tolerance.

nuclear (Model 2610A) Beta-Gamma Monitor
- **Approved** by F.C.D.A. for low-level monitoring.
- **Lightweight**—10” x 4¾” x 5¾”. With batteries, weighs 9½ lbs.
- **Watertight** instrument case and probe.
- **One-hand** operation.
- **Shielded Probe** for beta and gamma discrimination.
- **Plug-in Geiger Tube** requires no soldering.
- **Ranges**: 0.2, 2, 20 milliroentgens per hour full scale.
- **Audio and Visual** radiation indications.
- **Radioactive Calibration Source** mounted on instrument.

nuclear (Model 2584) Gamma Survey Meter
*AN/PDR-T1 Type as recommended by F.C.D.A.*
NUCLEAR Model 2584 is a MODERN development of the wide range, low level AN/PDR-T1 Meter, with these improvements:
- **Dial Light** switch more rugged, protected against turning on accidentally.
- **Case** is all cast aluminum in two parts for more stable operation.
- **Watertight**, yet can be arranged for opening quickly without tools.
- **Push-Button** zero check allows check without changing range setting.
- **Circuit** redesigned for greater simplicity, equal or better dependability, easier access.
- **Ranges**: 0-5; 0-50; 0-500; 0-5,000; 0-50,000 mr/hr.
- **Power Supply** self-contained batteries, quickly accessible for replacement.

NUCLEAR "PRECISION INSTRUMENTATION FOR NUCLEAR MEASUREMENTS"
ANNOUNCING (In press)

ALGAE OF THE WESTERN GREAT LAKES AREA

by GERALD W. PRESCOTT
Professor of Botany, Michigan College

This long needed volume is a treatment of all the algae (exclusive of diatoms and desmids) known from Michigan and Wisconsin. In it are keyed, described and figured about 1,100 species and the book will thus be of use over a geographic area far greater than the title would suggest. It will be a standard reference for years to come.

Two of the many useful features of the book are an illustrated glossary and a 49 page bibliography, perhaps the most extensive ever published.

940 pages, over 1,000 illustrations
List $10.50

SPECIAL PREPUBLICATION OFFER
Orders received before July 1 will be billed at $9.50
Orders accompanied by remittance received before July 1, $8.50

YOUR CHANCE TO SAVE REAL MONEY!

MAKE A MICROSCOPE—Get wonderful results. Own an instrument worth many times the cost to you. Simply convert a U. S. Govt. Riflescope (Govt. cost over $65.00). It’s easy! We show you how. No machining required. Get it to 40 Power. Scope we furnish is used but good condition.

sent complete with extra lenses and direction sheet.

Stock #2599-W $7.50 Postpaid

WRENCHES—for above project, to simplify and speed up work.

Stock #2919-W $1.00 Postpaid

SAVE! NEVER BEFORE AT SUCH LOW, GIVE-AWAY PRICES!

Ronchi Rulings

(Black Line Gratings)

FOR TESTING! EXPERIMENTING!

Plate glass with etched parallel black lines—space between each line is same as thickness of the ruled line itself. Made by photographic process. Number of lines per inch ranges from 65 to 133 as shown below. Normally cost $5.00 to $5.00 per square inch. Used for fine measuring, testing and measuring astronomical mirrors, testing microscope objectives, camera objectives, and magnifiers, used in pairs to see distortion pattern.

MOUNTED ANASTIGMAT LENS—Free booklet with your order: “How to Make Your Own Enlarger.” Speed f/1.7, focal length approx. 127 mms. Suitable for 36 mm negatives, positives up to 3 x 4”. Stock No. 8004-W $7.50 Postpaid

NON-ABSORBING BEAM-SPLITTING MIRROR—Latest development! Optically flat to .0001 wave distortion. Size: 1-15/16” x 2-15/16” x .020 thick. Reflects approximately 50% and transmits approximately 50%. No light is absorbed. Has a three-layered film which accomplishes non-absorption.

Stock #207-W $4.00 Postpaid

8 Power ELBOW Telescope

Gov’t Cost $200!

Our Price $27.50

Big 2” diameter objective. All lenses Achromatic. Amici prism erects the image. 4 built-in filters—clear, amber, neutral and red. Slightly wider to 5”. Special, flat lens, 45° field of view. Weight 5 lbs.

Stock #2943-W $27.50 Postpaid

LOOK AT THIS BARGAIN!

MOUNTED PROJECTION LENS—Speed F/1.9...F/1.6. 15 mm. $22.00 value for $7.50. Low Reflection Coated. Used on 8 or 16 mm. Movie Projectors....or to make a Desk Viewer or Editor....for 16 mm. Micro-Film Reader....for Concert Future. Get it here...

Stock #1045-W $7.50 Postpaid

LENS CLEANING TISSUE—1st quality, sheet size 11” x 14”. Made from finest, spec. Free shipping. High used strength.

Stock #2721-W....100 sheets $1.00 Postpaid

SLIDE PROJECTOR SETS—Consist of all unmounted lenses you need to make the following size projectors:

Stock #2099-W—35 mm. Stock #2098-W—16 mm. Stock #2097-W—24 mm.

Both $2.85 Postpaid

UTILITY MAGNIFIERS

Greater Power! Wider, Flatter Field!

Fine, professional magnifiers made with achromatic lenses and precision metal parts. These efficient Magnifiers are the best on the market today...outstanding for their exceptionally wide, flat field of view. Ring provided to “lock” in focus. Excellent clarity and sharpness right out to edge of field. Double lens systems. Eye Lens has clear diameter of 1-1/8”, Objective, Rectangular 1-1/8". Stock #1038-W $5.00 Magnifier Stock #1037-W 6% Power Magnifier $12.95 Postpaid Stock #1036-W $15.95 Postpaid

LOOK! LOOK! LOOK!

Sheet Polarizing Material

Stock #691-W 1 pair of 1” dia. Circles $2.65 Postpaid

Stock #692-W 2 pair of 2” dia. Circles $5.65 Postpaid

A WONDERFUL BUY!

Complete With Tripod and Swivel Head

AMAZING POCKET-SIZE TO POWER SPOTTING SCOPE

$14.95 ONLY

Complete With Tripod and Swivel Head. Only 5½" long! Made high on tripod. Adapted from Army telescope and worth many times our price. Excellent for clarity and sharpness. Has prism erecting system, achromatic Objective, Reticle Eye-Piece. Lenses low reflection coated. Ideal Scope for sportsmen and hunters.

Stock #951-W $14.95 Postpaid

SO MUCH for SO LITTLE!

SIMPLE LENS KITS!—Kits include plainly written, illustrated booklet showing how you can build lots of optical items. Use these lenses in experimental optics, building TELESCOPES, low power Microscopes, etc.

Stock #2-W—10 lenses $1.00 Postpaid

Stock #3-W—45 lenses $3.00 Postpaid

Stock #10-W—80 lenses $10.00 Postpaid

Stock #2390-W $3.25 Postpaid

TERRIFIC BARGAIN! BUBBLE SEXTANT

BRAND NEW and with Automatic Electric Averaging Device and Illuminated Averaging Disc for nighttime use. Govt. cost $271. Though brand new, we have re-checked Bubble and Collimation and guaranteed perfect working order. Price includes wooden Carrying Case. Full directions for use accompany each shipment.

Stock #2983-W $25.00 Postpaid

BUBBLE SEXTANT—TYPE A-SA. Excellent condition but may be slightly used. Each has been carefully checked and collimated. Averaging done for you. Fine for daytime use. Carrying Case and instruction booklet included. Govt. cost about $325.00

Stock #2946-W $32.50 Postpaid

TELESCOPE EYE-PIECE—Consists of 2 Achromatic lenses F/ 28 mms. in a metal mount.

Stock #5140-W $4.50 Postpaid

The Hellige Twin-Kit is the finest of the small testers on the market. Light in Weight—Simple to Operate—Scientific in Method—Accurate in Result. It is equipped with the famous Hellige Glass Color Standards that never fade or change and carry a lifetime guarantee. WRITE FOR FOLDER No. 800-F5

AMINO ACIDS

Check your requirements now for Summer feeding experiments. Don’t let vacation delays impair your data.

DI-Ornithine Hydrochloride and DI-Threonine are now available.
THE DINOSAUR BOOK. The Ruling Reptiles and Their Relatives

By Edwin H. Colbert, The American Museum of Natural History. Ready in June

With hundreds of photographs, line drawings, and charts this fascinating new book discusses the evolution of various types of dinosaurs—the grass eaters, the carnivores, the sea and the earliest birds—describing how they lived and looked, and following their changes through the geologic ages down to their present-day survivors. Broad in scope, this new book provides a vivid glimpse into the lost world of the geologic past.

GENERAL CHEMISTRY. New 3rd edition

By William A. Felsing and George W. Watt, The University of Texas. 558 pages, $5.00

Here is the new edition of this successful text. Greater emphasis is placed on fundamental principles in the elementary course in chemistry, and the changes that have been made are such as to provide a more rigorous course of study with particular emphasis upon the quantitative aspect of the subject. The number and variety of the problems has been greatly expanded.

ABSORPTION AND EXTRACTION. New 2nd edition

By Thomas K. Sherwood, Massachusetts Institute of Technology; and Robert L. Pigford, University of Delaware. McGraw-Hill Chemical Engineering Series. Ready in September

Covers the theory, design procedures, and performance data relating to mass transfer between phases, especially the industrial counter-current operations of gas absorption and liquid-liquid extraction. The new revision summarizes the large amount of new material which has become available in the past decade. As such, it will be valuable both as a text and reference volume.

BASIC WING AND AIRFOIL THEORY

By Alan Pope, Daniel Guggenheim School of Aeronautics, Georgia Institute of Technology. 294 pages, $5.00

Written at the senior and first-year graduate level, this text will clarify many statements which had to be assumed during elementary, practical courses in aerodynamics. Regular undergraduate engineering mathematics is all that is required, and every step necessary for a clear understanding is provided. Numerous examples and problems are included.

Send for copies on approval
Select the **Exact** illuminator you need . . . from the most complete line serving science

In every phase of microscopy there is one specific type of light that offers more advantages than any other—and there's a corresponding Bausch & Lomb illuminator to provide it. Perhaps you require the monochromatic light of high intensity provided by the B&L Grating Monochromator. Or you may want the convenience of the B&L Panfocal Illuminator, which offers an instant choice of bright field, dark field or polarized light. Or, for simple examinations, you might favor the extreme economy of the B&L Micro-Lite. Whatever your requirement, there's a B&L illuminator to fill it . . . dependably and economically.

**WRITE** for complete information on B&L Micro-Illuminators . . . Catalog D-119. At your request, also, we'll be glad to have your present illumination methods checked for correctness. No obligation, of course. Write to Bausch & Lomb Optical Co., 642-8 St. Paul St., Rochester 2, N. Y.
