When you're looking for the right potentiometer to do a specific job, it will pay you to check the complete L&N line first. Whether you need the extreme precision of an N.B.S.-certified Wenner, the convenience of a Micromax or Speedomax recorder, or an intermediate instrument, you'll find the characteristics you want in a soundly engineered L&N potentiometer.

More than a score of models comprise the line. Just glance at the table below. There's a potentiometer for practically any purpose—measurement of low voltages, temperature vs. temperature-difference, calorimetry, pH and other emf cell work ... self-contained portables for temperature and pyrometer checking ... and the popular, general-purpose Type K's. Models run from highest to moderate precision. They come in convenient single, double, even triple ranges ... to suit the job at hand.

Naturally, we can't begin to tell you all you want to know in so short a table. So for complete details, let us send you catalog information. Simply write our nearest office, or 4926 Stenton Ave., Phila. 44, Pa.

New (8th) Edition
of one of the
world's really great
medical textbooks

Cecil & Loeb's
MEDICINE

In the New (8th) Edition, this standard work maintains its time-tested characteristics of completeness, authority, and balanced presentation. 809 separate diseases are considered; the 168 contributors are recognized authorities in the fields they cover, and the space allotted to each subject is proportionate to its importance.

Features of the new edition: concepts of pathologic physiology are integrated into all discussions; 20 new subjects are covered (collagen diseases, Q fever, etc.); and 82 discussions have been completely rewritten.

Edited By RUSSELL L. CECIL, M.D., Professor of Clinical Medicine Emeritus, Cornell University; and ROBERT F. LOEB, M.D., Bard Professor of Medicine, Columbia University. Associate Editors: ALEXANDER B. GUTMAN, M.D., Professor of Medicine, Columbia University; WALSH MCDERMOTT, M.D., Associate Professor of Medicine, Cornell University; and HAROLD G. WOLFF, M.D., Professor of Medicine (Neurology), Cornell University. 1627 pages, 7" x 10", with hundreds of illustrations, some in color. $12.00.

Let the Technicon Fraction-Collector take over the tedious chore of fraction-collection in your laboratory... it will increase work output, give higher resolution, save staff time and labor. Completely automatic, it needs only to be set up for a given experiment, which it will then carry to completion, turning itself off when the job is done. The T/F model here will handle routine fractionation competently. Based on a simple rate-of-flow principle, it will collect any number of samples up to 200, each sample comprising any volume from a few drops up to 28 cc (or more, on special order).

For hyper-critical determinations, this Technicon Collector employs a photo-electric drop counter and totalizer, shown here. Each collection will comprise an identical number of drops, yielding samples of identical volume. Send for the detailed bulletin describing these precision Technicon instruments.
Hilton                HIGH-SPEED AERODYNAMICS
By W. F. Hilton, Armstrong Whitworth Aircraft, Ltd., Coventry; formerly of The Johns Hopkins Applied Physics Laboratory. April 1951. 608 pages. 394 figures. 24 half-tones. $8.50. Conditions of flight just below, through, and above the speed of sound; the physical laws and mathematical analysis of high-speed flight; and the design of high-speed planes and rockets and their motors.

Lang                 SOME ASPECTS OF FLUID FLOW
Edited by H. R. Lang, Secretary and Editor of the Institute of Physics, London. Ready, June 1951. 296 pages. 112 figures. Tables and bibliographies. About $8.00. Papers presented at the Institute conference of October 1950, with reports of discussions; covers fundamental problems, techniques, and applications of present knowledge and techniques.

Alexander           SURFACE CHEMISTRY
By A. E. Alexander, New South Wales University of Technology. Ready, July 1951. About 85 pages. Figures and half-tones. About $1.50. Historical development, insoluble monolayers, adsorbed films, the gas-solid interface, the solid-liquid interface, and electrical phenomena at interfaces.

Reddaway             THE REBUILDING OF LONDON AFTER THE GREAT FIRE

Havighurst & Morgan   SOCIAL HISTORY OF A WAR-BOOM COMMUNITY
By Robert J. Havighurst, Committee on Human Development, University of Chicago, and H. Gerthon Morgan, University of Maryland. Ready, June 1951. 384 pages. 3 half-tones. $4.00. A sociological study of the impact of war industry upon the population, housing, economy, and community life of Seneca, Illinois, in the early 1940's.
A Complete Electrophoresis and Schlieren Laboratory:

Built-in regulated and stabilized power supply . . no "B" batteries.

Integral refrigeration system . . no ice cubes.

Internal rapid dialysis facilities . . no additional refrigerator.

Base for sturdy support . . no special table or carriage.

All optics in air-conditioned space . . no drying agents.

Cells available for adsorption, diffusion, and macro-preparative work.

Price of the Amino Portable Electrophoresis Apparatus, ready to plug in, and complete with cell, holder, and accessories required for immediate operation . . $3000, F.O.B. Silver Spring, Md.

Apparatus Constants

Physical Dimensions—Base unit, 24 x 18 x 13 inches; over-all height, 46½ inches.

Optical Path Length—90 inches.

Screen Size—3½ x 4½ inches (standard cut film).

Magnification—2.

Temperature Control—plus-minus 0.02°C.

Current Range—1-30 milliamperes.

A.C. Ripple—less than 0.03% of total current.

THE CENCO MEGAVAC PUMP

in a single mechanical unit produces high ultimate vacuum with high pumping speed for research and laboratory operations which require fast initial evacuation. Precision machining of internal parts, lever-action vanes and positive sealing rings assure long life and efficient, dependable service. Speed at 1 micron, 375 ml/sec; vacuum, 0.1 micron or better.

If your vacuum system requires high or low speed evacuation, let us recommend an efficient pumping unit. Fifty years experience in engineering and manufacturing high vacuum pumps is yours for the asking.

An Authoritative Text

TAXONOMY OF VASCULAR PLANTS

by Lawrence

It is believed this book will be the most complete and authoritative text on plant taxonomy that has been published in the English language. It provides in one volume a comprehensive source of information on the theory, principles, and operating procedures followed in plant taxonomy plus an accounting of all of the families of plants known to grow in North America. Ready for fall classes.

Up-to-date Material

FOUNDATIONS OF BIOLOGY, 7th Ed.

by Woodruff and Baitsell

Very careful attention has been given throughout the new edition to the complete integration of the textual material so as to make a logical, coordinated and continuous story of biology. Important new material has been added and long chapters have been split to make for increased student interest and more adaptable assignments. The complete assembly of illustrations in this new edition are believed to be superior to that in any previous edition. Coming in June.
Commercial gamma globulin sedimenting at 60,000 rpm (260,000 g).

**BOUNDARIES BY REFRACTIVE INDEX**

Using the refractive-index method of analysis, as illustrated, the new Spinco Ultracentrifuge is designed for direct observation; manual or automatic photography with exposures adjustable from 5 to 30 seconds at intervals from 2 to 64 minutes. Send for complete details.

No other microscopes made anywhere stand hard usage and passing years better than Leitz instruments. Even so, there may be times when damage and wear put your Leitz microscope in need of expert attention.

It's good to know that whenever your microscope does need repairs or reconditioning, you can rely on the skill and experience of technicians schooled in the Leitz traditions of craftsmanship. Manning the completely equipped and stocked Leitz Service Department in our New York plant, they stand ready to assist you whenever the need arises.

For information, write Dept. SC

Select the Exact illuminator you need...

from the most complete line serving science

In every phase of microscopy there is one specific type of light that offers more advantages than any other—and there's a corresponding Bausch & Lomb illuminator to provide it. Perhaps you require the monochromatic light of high intensity provided by the B&L Grating Monochromator. Or you may want the convenience of the B&L Panfocal Illuminator, which offers an instant choice of bright field, dark field or polarized light. Or, for simple examinations, you might favor the extreme economy of the B&L Micro-Lite. Whatever your requirement, there's a B&L illuminator to fill it... dependably and economically.

WRITE for complete information on B&L Micro-Illuminators... Catalog D-119. At your request, also, we'll be glad to have your present illumination methods checked for correctness. No obligation, of course. Write to Bausch & Lomb Optical Co., 642-8 St. Paul St., Rochester 2, N. Y.
