INTRODUCTORY
COLLEGE CHEMISTRY, 5th Ed.
Harry N. Holmes

Brought into line with present concepts of teaching chemistry, this revision represents a somewhat more radical revision than the usual. The first three chapters are largely rewritten, more emphasis is placed on the influence of size and structure of the atom, and all applications to industry are based on theory. Published in June—$4.75

FUNDAMENTAL PRINCIPLES of PHYSICAL CHEMISTRY, Rev. Ed.
Carl F. Prutton & Samuel H. Maron

In this revision there has been a check of problems and an increase in their number by over 30%. A new chapter has been added on Photochemistry, constants have been revised to latest values, the chapter on Atomic Structure and Radioactivity has been revised and a table of best values of physico-chemical constants has been added. Ready in July

RESEARCH in MEDICAL SCIENCE
David Green & W. Eugene Knox, Editors

This scholarly book contains contributions from representatives of 26 aspects of medical science. Written for the highest type of teacher who wishes to get better oriented, it is up-to-date, readable, and useful. The New York Times reports: "... extremely valuable. The individual articles go further than the ordinary scientific paper in expressing the authors' feeling about their work; this, along with good bibliographies, makes the papers eminently useful for research men in the same field. Brings to the general reader the character of medical investigation, and of the men that put questions to nature." 1950—$6.50
Now . . . get a firm, lasting grip on small objects

. . . with this new AUTOMATIC PICK-UP TWEEZER

You'll appreciate the many uses of this truly practical automatic pick-up tweezer. Picks up small or odd-shaped objects difficult to grip otherwise, and small sterilized objects where finger handling is objectionable. It is ideal for holding fractional weights, crystals, small vessels, etc. Its automatic closing gives you a firm, lasting grip without continued pressure making it useful for lengthy gripping of an object, such as holding wire in difficult or awkward positions for soldering. You'll easily perform many operations that are difficult with an ordinary tweezer.

The Automatic Pick-up is the size of an automatic pencil and is provided with a pencil clip for pocket storage. Depressing the top cap causes three strong hooked spring steel wires to extend from the tip permitting them to flare out uniformly. Releasing the pressure on the cap causes them to withdraw toward the tip and close together. Any object within their grasp is thus firmly held until released by again depressing the cap. The wire fingers are extendable up to 3/4 inch between tips.

FREE!
CUT OUT THIS AD AND PIN IT TO YOUR LETTERHEAD FOR ENOUGH COAGUSOL TO MAKE 6 GALLONS OF SOLUTION!

You will find that a COAGUSOL solution's penetrating action strips stains, dried blood and tissue from even the finest serration of surgical instruments, without soap, without scrubbing—speedily, economically. Because we are sure that you will find this new detergent invaluable—we ask you to try COAGUSOL at our expense. For full information and your generous sample, write right now to

HELLIGE BLOOD SUGAR COLORIMETER

EMPLOYING NON-FADING GLASS COLOR STANDARDS

Hellige Blood Sugar Colorimeters are furnished with non-fading glass color standards for precise glucose determinations by the picric acid or Folin-Wu method. A reliable diagnostic aid for the practitioner as well as the specialist, these low priced instruments are Sturdy in Construction — Simple to Operate — Scientific in Method — Accurate in Result. Fingertip blood can be used in each of these micro procedures.

CANCER

the subject of outstanding A. A. A. S. Symposium Volumes:

MAMMARY TUMORS IN MICE, 1945:
10 contributors, VIII + 223 pages, 7½ × 10¾, clothbound, double column, illustrated, $3.50. Cash order price to A.A.A.S. members $3.00.

... Coordinated knowledge of cancer of the breast in mice.
... It cannot fail to stimulate interest and further research efforts in one of our most fascinating and important biological problems.
... Prepared by members of the staff of the National Cancer Institute.

APPROACHES TO TUMOR CHEMOTHERAPY, 1947:
93 contributors, X + 442 pages, 7½ × 10¾, clothbound, double column, illustrated, $7.75. Cash order price to A.A.A.S. members $6.50.

... A progress report, addressed largely to future workers.
... An important and trustworthy reference book.
... Planned under the auspices of National Cancer Institute, Memorial Hospital of New York, Sloan-Kettering Institute for Cancer Research, Lankenau Institute of Philadelphia, and others.

Some Fundamental Aspects of the Cancer Problem, 1937, Note: this was published by and is still available at The Science Press, Lancaster, Pa. Order Direct.

PERSONNEL PLACEMENT

CLASSIFIED: $1.50 per word, minimum charge $3.00 Use of Box Number counts as 10 additional words.
DISPLAY: $17.50 per inch, no charge for Box Number.
Correct payment to SCIENCE must accompany all ads. Insertion usually made 2 or 3 weeks after receipt of ad.

SCIENCE • 1515 Mass. Ave., N.W., Wash. 5, D. C.

POSITIONS WANTED

Bacteriologist: Ph.D., woman. Teaching and research experience in medical and general bacteriology and parasitology. Desires research or teaching position. Box 542, SCIENCE.

Botanist: Ph.D. this August; desires teaching position. Basic training botany, zoology, and bacteriology. College teaching experience. Sigma Xi, Ruth Thomas, Box 1157, Vanderbilt University, Nashville, Tennessee.

Pharmaceutical chemist: Ph.D.; qualified for executive position, either in management, research, new product, development, sales promotion; eleven years' research and development director, supervising investigation and development, new specialties; for further information please write Science Division, Medical Bureau (Burnice Larson, Director), Palmolive Building, Chicago.

Ph.D. desires position either as Pharmacologist or Chief Pharmacist of hospital in or around New York—Washington, D. C. area. Box 541, SCIENCE.

Physicist: Ph.D., with seventeen years experience in industrial research and university teaching, desires academic position. Strong background of geophysics and mass-spectrometry. Box 534, SCIENCE.

Zoologist: Ph.D., 1951. Desires teaching and/or research position. Major: Parasitology; ten years experience in Zoological Technique, General Zoology, and related fields; four years Medical Bacteriology. Publications. Box 528, SCIENCE.

Zoologist: Ph.D. (Chicago), desires position. Twelve years experience in biological research, 10 teaching. Twelve publications. Age 36. Box 539, SCIENCE.

Zoologist: M.A., and advanced study now doing research desires teaching or research position, preferably West Coast. Experience in invertebrate zoology and histology. Box 540, SCIENCE.

POSITIONS OPEN

Medical Abstractors: To work from foreign languages (French, German, Spanish, Portuguese, etc.). Letters must detail experience. Box 541, SCIENCE.

Microbiologist: Ph.D. or equivalent training in Microbiology, Bacteriology or allied field plus educational training in Biochemistry, Pharmaceutical background helpful. Age 30-45. This position, with a well-established eastern pharmaceutical company, will involve responsibility for planning, directing and coordinating research and product development. Send complete personal, educational and experience data to: Box 544, SCIENCE.

Pharmacologist: M.S. or Ph.D. in Pharmacology or Physiology. Research Department, pharmaceutical company, West Coast. Box 538, SCIENCE.

Positions Open:
(a) Pharmacologist or Physiologist: M.S. or Ph.D.; industrial experience desirable; important research position; major company; Pacific Coast.
(b) Biochemist or Physical Chemist to take charge of division, new research laboratory, large teaching hospital; Midwest.
(c) Physical Chemist: medical school research post; Midwest.
(d) Polymer Chemist to serve as senior scientist, research and development laboratories; one of the leading pharmaceutical companies; Ph.D. or equivalent training.
(e) Ph.D. in pharmaceutical chemistry or biological chemistry to direct product development; established company; university city; unusual.

Young man experienced in teaching to establish course in Physiology and Pharmacology; small college of pharmacy of high repute; research opportunity. Box 546, SCIENCE.

WANTED TO PURCHASE WALTER J. JOHNSON • 125 East 23rd St., New York 10, N. Y.

Your sets and files of scientific journals are needed by our library and industrial customers. Please send us lists and description of periodical charge $5.00. Will sell at high market prices. Write Dept. A15, J. S. CANNER, INC. Boston 19, Massachusetts

Beckman IR-2T Infrared Spectrophotometer with Single Beam Direct Transmittancy Recorder

In combination with the IR-2 Spectrophotometer, the Beckman Transmittancy Recorder provides highest accuracy with the utmost in reliability, convenience, and ease of control. It retains the excellent resolution, minimum stray light, high stability and drift freedom, and wavelength accuracy of the well-known Beckman Spectrophotometer.

The Single Beam Direct Transmittancy Recorder employs the memory standardization principle, using reliable electronic circuits instead of complicated mechanical-optical arrangements.

A standardizing run is made on the empty or solvent-filled absorption cell. During this run the signal from the photoreceiver is automatically maintained constant, and the resulting slit width vs. wavelength function is "memorized" on a wire recorder. The sample is then placed in the same cell, and information played back from the wire recorder automatically controls the wavelength and slit drive motors to reproduce precisely the conditions which produced the constant 100% reference level. Any absorption resulting from the sample is accurately and automatically recorded directly in transmittancy. On repeat runs, the same reference wire is used, eliminating repetition of standardizing measurements.

24640T—Beckman IR-2T Infrared Spectrophotometer, with Single Beam Direct Transmittancy Recorder ........... $11,730.00

24638T—Beckman IR-2S Infrared Spectrophotometer (without recorder). Zero drift and non-linearity are eliminated. Monochromator calibrated directly in wavelength units. Calibration of radiation measurement dial directly in both percent transmittance and absorbency units. Monochromator with sodium chloride optics has direct reading wavelength scale 1.0 to 15 microns. Wavelength settings are reproducible to better than 0.001 micron (10 millimicron region) ............... $4,200.00

For full information on these Beckman Spectrophotometers, write, wire, phone or teletype Dept. SC-6, the WILL office-warehouse nearest you.
ACCURATE
FROZEN SECTIONS for
Urgent Diagnosis

Many hospitals—where speedy diagnosis is essential to successful surgery—choose the AO Spencer No. 888 Automatic Clinical Microtome. With this instrument tissue can be cut almost as fast as it can be mounted—minutes from the time it is placed on the freezing plate. The rapid feeding mechanism moves the specimen automatically with each stroke of the handle, advancing sections as thin as 5 microns. Slicing action of the knife reduces compression and distortion of the specimen.

This same AO Microtome is available without the freezing attachment for paraffin or celloidin sectioning. For further information see your AO distributor or write Dept. T4.

Since we are currently supplying both military and civilian needs, instrument deliveries cannot always be immediate.
