Contents

New Developments in Potassium and Cell Physiology: 1940–50: C. W. Sheppard .......................................................... 85

Technical Papers

Natural Black Uranium Powder: Paul F. Kerr ................................................. 91

Plant Growth-regulating Activity in Certain Aryloxy-alkylcarboxylic Acids: D. J. Osborne and R. L. Wain ...................... 92

Crystalline α-Lipoic Acid: A Catalytic Agent Associated with Pyruvate Dehydrogenase: L. J. Reed et al. ......................... 93

The Green Pigment and Physiology of Guard Cells: R. O. Freeland .................................................... 94

Growth of Human Leukemia Leucocytes in Vitro and in Vivo as Measured by Uptake of P32 in Desoxyribose Nucleic Acid: Edwin E. Osgood et al. ............................................. 95

d-Catechol and Antihistaminogenesis: Saul Malkiel and Margaret D. Werle ................................................................. 98

Counting of Radioactivity in Liquid Samples: R. F. Goddu and L. B. Rogers ............................................................. 99

A Volumetric Microrespirometer for Studies of Tissue Metabolism: Reidar Wennesland ........................................... 100

A New Common Biochemical Property of Tumors Derived from Different Tissues: Christopher Carruthers and Valentina Suntzeff ................................................................. 103

Comments and Communications

Association Affairs

Gordon Research Conference; Academy Research Grants ................................. 111
