RANGE — is continuously adjustable from a minimum of $-0.1$ to $+1$ mv... up to a maximum of $-20$ to $+20$ mv.

ZERO SUPPRESSION — uncalibrated coarse and fine... is continuously adjustable from $-50$ to $+50$ mv.

range and zero suppression are continuously adjustable

Just turn a knob... twist a dial... and you have adjusted this new Speedomax Recorder to the exact specs required for the automatic data-charting job at hand.

Turning the ZERO knob varies zero suppression... pushes off-scale that portion of the range in which you are not interested... spreads the few millivolts you want to watch across full width of the 9 7/8" Speedomax chart.

Twisting the RANGE dial calibrates the recorder so that its scale represents the range span in which changes occur.

With full scale pen speed of 3, 2, even 1 second... limit of error only 0.3% of range, Speedomax proves especially useful for measuring:

- Force, weight, etc.—with load cells. Adjustable zero compensates for tare. Range is adjusted to provide desired calibration.
- Temperature or temperature-difference—with thermocouples. Minute changes can be measured with extreme sensitivity.
- Speed—with electric tachometers. Change of speed can be measured over a narrow band in detailed studies of motors, engine governors, etc.
- Voltage—from other transducers and amplifiers.
Strawberries and cream are a treat of the season for botanists—at least for those who can concentrate on the rich flavor without being preoccupied by thoughts on the general condition of the pericarp, the stolon mechanism, and similar considerations.

An equally satisfying and longer-lived treat is Palmquist & Petry's General Botany Laboratory Book. Now ready in a New (2nd) Edition, this manual has proved pleasantly surprising to a surprisingly large number of teachers. For one thing, it saves the bother of devising and attending to the production of a "home-made" manual. Further, its professional appearance and profusion of good illustrations provide an added interest bonus to the laboratory periods.

For this edition, the Keys to Common Trees have been extended to include summer as well as winter conditions. The treatments of mitosis and meiosis have been completely done over. New problems on diffusion and on genetics are included.

It might be worth half an hour of your time to examine this New (2nd) Edition carefully. See for yourself why Palmquist & Petry is being used today in so very many botany courses.

By Edward M. Palmquist, Professor of Botany, University of Missouri; and Loren C. Petry, Professor of Botany, Cornell University. 190 pages, 8½" x 11", Wire-O binding. $3.00.

August 10, 1951
The success of Dr. Kleiner's book in its former editions was due to his wise foresight in considering physiological chemistry not as a pure science—but by applying the practical, clinical aspects of the subject.

Many changes and additions have been made in every chapter of the book for this New Third Edition. The chapters on MINERAL METABOLISM AND WATER BALANCE and RESPIRATION AND ACID-BASE BALANCE have been almost rewritten.

Thorough revisions have been made in the discussions of blood-coagulation, vitamin A, vitamin B₁₂ and folic acid, and trans-methylation. The section on hydrogen ion concentration has been expanded, as has the entire chapter on PHYSICAL CHEMISTRY. The coverage of isotopes in metabolic studies, including the biosynthesis of heme and of purines has been enlarged.

Among the newly introduced or greatly expanded topics are gangliosides, cardiolipins, citrate in bones, lysozyme, chromatography, ion exchange resins, blood groups and Rh factor, niacinidtryptohan, goitrogenic foods, new antibiotics, the Warburg Apparatus, and nor-epinephrine. Many new illustrations, as well as charts and tables have been added.

Kleiner's style is smooth and facile (never ponderous)—and his book is certainly an easy, ready source of basic reference material.

By ISRAEL S. KLEINER, Ph.D., Professor of Biochemistry and Director of the Department, New York Medical College, Flower and Fifth Avenue Hospitals. Third Edition. 694 pages, 83 illustrations (5 in color). Price, $7.00

Immediately Available for Research Investigators

**GELATIN GLUTATHIONE**

- For intravenous use as a blood extender in shock burns, radiation injury, severe depletions of fluid and toxic infections.
- As a new field for investigation in rheumatic fever, arthritis and in ACTH induced diabetes.

Gelatin in hydrolysis is well known to yield a non-antigenic product. Glutathione is the tripeptide of the three amino acids glycine, cysteine and glutamine used in biologic detoxifications. Glutathione increases the osmotic pressure of gelatin 20% and inhibits syneresis (ageing of colloids) thus advancing gelatin usefulness.

Supplied in 500 cc vials, sterile, ready for use intravenously containing 6% gelatin (knox) and 0.5% glutathione S H (reduced form) or S S (oxidized form) as desired.

Hundreds of users in laboratory, field and factory now make fluorescent checks quickly and easily—in broad daylight—with the Menlo Fluorotor (blacklight).

Exclusive dark chamber holds comparison test tubes, solid samples, powders or fluids. Neoprene viewing cone excludes surrounding light for examination of large areas.

Choice of filtered 2537 or 3650-63 Angstrom frequencies; interchangeable head for alternate frequency. Transmission curve with every instrument. Standardized mercury-vapor discharge tubes. Instant-starting, troublefree. Portable—weighs less than 2 pounds, ready to use. Models for operation from either two standard flashlight batteries or 110-120 v AC. Write for brochure, data on U-V use in your field.

HIGH POWER magnifier

LOW POWER magnifier

Leitz

Binocular Prism Magnifiers

Presenting objects in their natural relief, both these Leitz instruments give you true stereoscopic vision. Either will enable you to make prolonged examinations of specimens without eyestrain. Either gives you an exceptionally large field of view, long working distance and extremely realistic images.

Important features: 3 pairs of eyepieces fit either body, allow change of magnification from 3.5x to 30x • Eyepiece tubes adjustable for interpupillary distances • Dovetail slide permits use of variety of stands for observations in incident or transmitted light.

New High Speed Accessories for HEMATOCRIT DETERMINATIONS

For the International Clinical Model Centrifuge — a new bronze shield, No. 301. This shield holds the standard Wintrobe tube and fits the regular horizontal type heads, No. 213, 4-place, and No. 214, 2-place. Smaller diameter of the shield permits higher speed, 3850 r.p.m. on alternating current. In these heads, the shields revolve at 90° to the vertical axis, resulting in a meniscus parallel to the glass tube graduations, facilitating faster, more accurate reading.

For all International Size 1 and Size 2 Centrifuges — a new high-speed disc type head and cover No. 289. Accommodates 8 Wintrobe hematocrit tubes and spins them in a flat plane at 90° to the vertical axis at 4500 r.p.m. The high centrifugal force (3190 x gravity at the tips of the whirling glass tubes) results in maximum packing of the cells, and the meniscus parallel to graduations insures faster, more accurate reading. Separate metal shields not required.

Available promptly from your Laboratory Apparatus Dealer.

INTERNATIONAL EQUIPMENT COMPANY
1284 SOLDIERS FIELD ROAD, BOSTON 35, MASS.
For MEASUREMENT of SKIN RESISTANCE

Garceau RECORDING
PSYCHOGALVANOMETER

For the study of the psychogalvanic reflex and skin resistance. The instrument is direct-reading and gives a written record of the reaction of the patient.

Price ............$775.00

Garceau
CLINICAL DERMOMETER

For clinical and experimental investigation of disorders involving sympathetic reaction, such as pain reflexes. In the psychological laboratory, this instrument is a well-known application as a so-called "lie detector". Resistance is read directly from a calibrated dial. Small variations, greatly magnified, are shown on the meter. Battery operated. Price ..........$115.00

LOW initial cost! Wider range of practical application than any other comparable instruments! Sturdy construction for years of hard, daily use! These important factors mean more Bausch & Lomb advantages for your students... within your budget.

**B&L "FL" MICROSCOPE.** No other student microscope offers so many advantages in teaching proper microscope technique easily and quickly at low cost. Catalog D-185.

**B&L MODEL LRM BALOPTICON PROJECTOR.** Projects large, clear, brilliant images of conventional or student-made slides... AND of opaque objects, printed material, photographs, large biological specimens. Catalog E-11.

A Bausch & Lomb sales engineer will be glad to help you get the most value, the most practical teaching advantages, out of your budget. No obligation, of course.
