Taxonomy of Vascular Plants

Written by a well-known taxonomist, and designed for students in the beginning or intermediate courses in systematic botany, this text is believed to be the most complete and authoritative in the English language. It provides in one volume a comprehensive source of information on the theory, principles, and operating procedures followed in plant taxonomy plus an accounting of all of the families of plants known to grow (native or cultivated) in North America.

The book provides a technical description for each family and separate paragraphs on (1) distribution, (2) distinguishing characteristics, (3) phylogenic relationships, (4) economic importance, and (5) a bibliography of selected references. Ready in September.
Demonstration Projection Meter

Lecture demonstration of AC and DC measurements becomes a pleasure for both lecturer and audience with No. 72550 Projection Meter. Projected readings can be clearly seen by a large class. This meter is usable with projection lanterns of the horizontal slide or bellows type, and optical benches. The meter scale reads from 0 to 100 in 2 unit divisions with figures at every tenth division. DC movement has 100 ohms resistance; full-scale deflection is 1 milliampere or 100 millivolts. The AC full-scale deflection is 1 milliampere or 5 volts. External shunts, voltage multipliers and current transformers are available for wide ranges of AC and DC current and voltage readings.

Dimensions, 4⅛ × 4½ × 1½ inches.

SAFETY -- ECONOMY -- CONVENIENCE

It will pay you to "Standardize" on "Pyrex Brand" Glassware

SAFE—"Pyrex Brand" Laboratory Glassware is mechanically stronger and less apt to break under ordinary usage. Its extremely low thermal expansion minimizes losses from thermal shock and permits heavy, rugged construction, increasing the resistance to mechanical breakage. The result is greater safety to laboratory workers.

ECONOMICAL—"Pyrex Brand" Laboratory Glassware is more economical because it lasts longer! The low alkali characteristics and the high chemical durability, combined with Corning's manufacturing skill and inspection control, produce a finished product unequalled in the world. "Pyrex Brand" Petri Dishes will outlast other types five to one or better.

CONVENIENT—"Pyrex Brand" Laboratory Glassware is available for an almost unlimited range of uses. You can be certain that you'll find just what you need in the "Pyrex" line.

PHARMACEUTICAL CHEMIST OR PHARMACIST

LEADING PHARM. FIRM, N. Y. AREA

Positions Open:
(a) Chemist or Chemical Engineer with industrial research experience, preferably in battery field; challenging opportunity in industry; New England. (b) Biochemist, Ph.D.; experience in bacteriology; research department, pharmaceutical company; around $6,000. (c) Pharmacologist; preferably Ph.D.; full-time teaching and research, department radiology, university medical school; research principally on new compounds for use in radiology; $7500. (d) Pharmaceutical Chemist or Biochemist; new products department; laboratories specializing in allergy products; West. (e) Biophysicist or Neuro-Physiologist; medical school research department; Midwest. (f) Biophysical or Organic Chemist with training at M.S. or Ph.D. level; straight research; radiotherapy and radiation research university medical school; East. (g) Associate Biostatistician; state mental health department; East. S8-3 Science Division, Medical Bureau (Burnice Larson, Director) Palmolive Building, Chicago.

Pharmacologist: preferably Ph.D. with practical experience; opportunity with prominent and progressive central New Jersey pharmaceutical concern. Write full details and salary interests to Box 577, SCIENCE. 8/24

Physiologist wanted, one semester only, starting September, at co-educational college, New England. Appointment rank instructor. Ph.D. or equivalent. Box 581, SCIENCE. 8/17

Radio-Activity Research, Chemist or Physicist, thoroughly grounded in both theory and practice of radio chemistry, to establish and take charge of radio-isotope laboratory. Large chemical manufacturer, located in New York area, desirous of initiating research in this field. Write resume of experience, education, usual personal information, salary requirements, to Box S 763, 220 W. 42nd St., N. Y.

Teachers Wanted: Pharmacist Ph.D. to head department, and Biochemist Ph.D. Research facilities. Write to Dean Constantine N. Meriano, New England College of Pharmacy, 70 Mt. Vernon Street, Boston, Massachusetts.

APPROACHES TO TUMOR CHEMOTHERAPY

This volume of 41 papers by leading authorities is a comprehensive summary of the progress so far made toward the chemotherapy of malignant tumors.

The plans for the volume were developed under the auspices of the National Cancer Institute and such other centers of cancer research as the Memorial Hospital of New York, the Sloan-Kettering Institute for Cancer Research, and the Lankenau Institute of Philadelphia.

Among the 93 contributors to the book are J. Engelbreth-Holm, M.D., University of Copenhagen, Denmark, and Alexander Haddow, M.D., D.Sc., University of London and the Royal Cancer Institute of London, England. Members of the staffs of all the principal cancer research institutions in the United States contributed to this volume.

APPROACHES TO TUMOR CHEMOTHERAPY was not only a deliberately planned program but the contributions were presented and discussed leisurely at two 5-day research conferences at Gibson Island, Maryland. After these presentations and discussions of the manuscripts they were reviewed and edited by both the Chairman of the Publications Committee and the Editor of the volume, and all the numerous references to the cancer literature throughout the world were carefully checked. However rapid the much hoped-for progress in the cancer problem may be, this volume promises to be an important and trustworthy reference book.

PITUITARY-ADRENAL FUNCTION

6 × 9 inches, illustrated, clothbound, 224 pages—$4.00
Price to AAAS members for prepaid orders—$3.50

PITUITARY-ADRENAL FUNCTION continues the AAAS tradition of presenting in book form the collected papers presented at symposium programs of wide interest. This volume includes 22 papers delivered at a two-day Symposium on the Adrenal Cortex at the AAAS meeting in New York City, December 1949.

PITUITARY-ADRENAL FUNCTION assembles important contributions of a score of laboratories in the United States and Canada from which many of the recent major advances in pituitary-adrenal physiology and therapeutics have come, and includes studies on the regulation of adrenal cortical activity, the role of the cortical hormones in protein, carbohydrate, and mineral metabolism, and effects of the cortical steroids and the ACTH in various disease states. A summary chapter on "Adrenol-escence" by Dr. George Perera forecasts some of the possible future trends in this active field of endocrine research.
More naturally than ever, your voice comes to the ear that listens through the latest telephone receiver developed at Bell Telephone Laboratories. The reason: a new kind of diaphragm, a stiff but light plastic. Driven from its edge by a magnetic-metal ring, the diaphragm moves like a piston, producing sound over all of its area. Effective as are earlier diaphragms of magnetic-alloy sheet, the new one is better, gives more of the higher tones which add that personal touch to your voice.

To work the new receiver, telephone lines need deliver only one-third as much power. So finer wires can do the job. This is another new and important example of the way scientists at Bell Telephone Laboratories work to keep down the cost of telephone service, while the quality goes up.

POLARIZING MICROSCOPES

with Polaroid Polarizers and Analyzers

During the past five years two Spencer Polarizing Microscopes have been regularly equipped with Polaroid polarizers and analyzers. These have proven so successful that we are now offering a complete line of instruments with polaroid elements. This means substantial savings to you, whether you buy the simplest or most elaborate. Experience has shown that performance is outstanding in every respect—durability, resistance to heat, sensitivity of extinction point, image contrast, and freedom from residual color. Spencer Polarizing Microscopes with Ahrens prisms are still available. Choose your polarizing microscope from this extensive line of American-made instruments for assurance of finest performance and readily available service. Ask your AO Spencer Distributor to show you the new microscopes with Polaroid elements, or write Dept. V3.
