Let the Technicon Fraction-Collector take over the tedious chore of fraction-collection in your laboratory... it will increase work output, give higher resolution, save staff time and labor. Completely automatic, it needs only to be set up for a given experiment, which it will then carry to completion, turning itself off when the job is done. The T/F model here will handle routine fractionation competently. Based on a simple rate-of-flow principle, it will collect any number of samples up to 200, each sample comprising any volume from a few drops up to 28 cc (or more, on special order).

For hyper-critical determinations, this Technicon Collector employs a photo-electric drop counter and totalizer, shown here. Each collection will comprise an identical number of drops, yielding samples of identical volume. Send for the detailed bulletin describing these precision Technicon instruments.
College Botany  The classification used for the higher plants in this text follows almost exactly that in the new 1950 edition of Gray’s MANUAL. Thus COLLEGE BOTANY does not confuse the beginning student by introducing a classification system which is different from that which he will encounter in advanced field work when using Gray’s MANUAL. Part I of the text discusses the individual plant and its life problems, using a woody green plant to introduce the student to the basic facts of plant morphology, histology, and cell structure and function. Part II deals with plants as groups in our large vegetation complex. 1949—$5.00

C. J. Hylander  Formerly Chairman, Botany Dept., Colgate University
O. B. Stanley  Associate Professor of Botany, Colgate University

College Zoology  6th Edition  300 new illustrations are included in this thoroughly revised and rewritten text. In rewriting, Dr. Stiles has paid particular attention to the section on physiology and genetics and has aimed to make these sections superior to the treatment of these subjects in other texts. In the chapter on the mammal, the cat has been substituted for the rabbit as a type. New material has been added on experimental embryology and there are new sections on the Rh factor, enzymes, vitamins, neurohumors, hormones, radioactive substances, chemical genetics, radiogenetics, malaria, and others. An entirely new feature of the book is the addition of selected references at the ends of chapters. Published in July—$6.00

R. Hegner  Late Professor Protozoology, Johns Hopkins University
K. Stiles  Professor of Zoology, Michigan State College

**NEW IMPROVED**

**ALOE FREEZING-DEHYDRATION APPARATUS**

for cell chemistry and pathology

Permits Direct Embedding in Dehydration Chambers

The Aloe stainless steel Freezing-Dehydration Apparatus is based on the principles of Altmann and Gersh. Important engineering improvements in the new unit include facilities for embedding tissue right in dehydration chamber . . . direct reading scales for more precise temperature and vacuum control . . . and flexible vibration proof joints.

Under accurate controls, the new Aloe Freezing-Dehydration apparatus permits tissue to be dehydrated and fixed with minimal losses and alterations. Tissue, after preliminary freezing in isopentane or liquid air, is placed in one of the vacuum chambers in the refrigerated compartment. Temperature is adjusted from $0^\circ$ C. to $-40^\circ$ C. and vacuum to 0.001 mm mercury. If desired, the specimen may be embedded directly without breaking the vacuum. Embedding may also be carried out in some inert atmosphere such as nitrogen. Sections of embedded materials may be used for morphological and cytochemical studies by numerous methods.

JL71580—Freezing-Dehydration Apparatus, with accessory equipment. For 115 volts, 60 cycles, A. C. Each . $2,675.00
AMERICAN WILDLIFE & PLANTS
Martin, Zim, and Nelson 500 pages, $7.50
Brings together for the first time all the major research of the United States Fish and Wildlife Service on American wildlife in relation to the plants upon which they depend. An exceptionally authoritative and comprehensive reference—containing the results of over 65 years of research.

ASIA’S LANDS & PEOPLES, 2/e
Cressey 597 pages, (text ed.) $7.00
Fully revised in the light of the author’s first-hand observations in Asia, this volume contains new material on Korea, Pakistan, and Indonesia; postwar production figures; new and improved illustrations and maps. Written with a sympathetic understanding of the people and their national problems.

CIVIL DEFENSE IN MODERN WAR
Prentiss 429 pages, $6.00
A survey of the powers and limitations of the various military agents and weapons which may be expected to play a part in any major war of the future. Emphasis is upon air attack on civilian populations with detailed plans for the formation of civil defense organizations at the national, state and municipal levels.

REGISTER NOW

for the Philadelphia Meeting of the AAAS

AVOID CONGESTION AND DELAY
GET YOUR GENERAL PROGRAM —
BY FIRST CLASS MAIL — EARLY IN DECEMBER

Registration in advance of arrival at the 118th Annual Meeting of the AAAS in Philadelphia, December 26-31, 1951, has several striking advantages:

1. You avoid congestion and delay at Registration Desks at time of arrival. All indications point to a large attendance since all of the Association’s eighteen sections and subsections, and more than forty societies, have excellent programs, and, in addition to paper-reading sessions, there will be the important symposia, conferences, and addresses for which an AAAS Meeting is noted.

2. You receive the General Program early in December in ample time, unhurriedly, to decide among the events and the sessions that you particularly wish to attend.

3. Your name will be in the Visible Directory the first hour of the first day of the meetings, since it will be posted in Washington as soon as received. (Hotel address can be added later, if necessary.)

4. Advance Registrants have the same privileges of receiving a map and directory of points of interest in Philadelphia, literature, radio broadcast tickets, etc. At the convenience of Advance Registrants, these will be distributed from the Main Registration in the Municipal Auditorium—the location of the full-scale Annual Exposition of Science and Industry, the Visible Directory, the AAAS Science Theatre, and the Biologists’ Smoker.

To insure its prompt receipt, the General Program will be sent by first class mail December 1-6, 1951—which last is also the closing date for Advance Registration.

--------------- THIS IS YOUR ADVANCE REGISTRATION COUPON -----------------

1. Advance Registration Fee (the extra quarter covers part of the first class postage) enclosed:
   ☐ $2.25 AAAS Member (check one)   ☐ $2.25 College Student
   ☐ $2.25 Wife (or Husband) of Registrant   ☐ $3.25 Nonmember of AAAS

2. FULL NAME (Dr., Miss, etc.) ..........................................................
   (Please print or typewrite) (Last) (First) (Initial)

3. ACADEMIC, PROFESSIONAL, OR BUSINESS CONNECTION ...................................................

4. OFFICE OR HOME ADDRESS ...........................................................
   (For receipt of Program and Badge)

5. YOUR FIELD OF INTEREST ...........................................................

6. CONVENTION ADDRESS ...........................................................
   (If not known now may be added later)

7. DATE OF ARRIVAL .................. DATE OF DEPARTURE ..................

Please mail this Coupon and your check or money order for the fee, $2.25 or $3.25, to

HOTEL RESERVATIONS

118th AAAS MEETING

Philadelphia, December 26-31, 1951

The list of hotels and the reservation coupon below are for your convenience in making your hotel room reservation in Philadelphia. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in Philadelphia and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Share a room with a colleague if you wish to keep down expenses. Mail your application now to secure your first choice of desired accommodations.

Announcing the New Line of

BAUSCH & LOMB

Dynoptic

LABROSCOPES

The World’s Finest Laboratory Microscopes

Your Bausch & Lomb Dealer or Instrument Engineer will be proud to demonstrate these fine instruments for you on appointment. Write for demonstration and literature to Bausch & Lomb Optical Company, 642-50 St. Paul Street, Rochester, N. Y.

August 31, 1951
LOW initial cost! Wider range of practical application than any other comparable instruments! Sturdy construction for years of hard, daily use! These important factors mean more Bausch & Lomb advantages for your students...within your budget.

B&L "FL" MICROSCOPE. No other student microscope offers so many advantages in teaching proper microscope technique easily and quickly at low cost. Catalog D-185.

B&L MODEL LRM BALOPTICON PROJECTOR. Projects large, clear, brilliant images of conventional or student-made slides...AND of opaque objects, printed material, photographs, large biological specimens. Catalog E-11.

A Bausch & Lomb sales engineer will be glad to help you get the most value, the most practical teaching advantages, out of your budget. No obligation, of course.

WRITE for free demonstrations and for complete information. Bausch & Lomb Optical Co., 642-11 St. Paul St., Rochester 2, N. Y.
