Now... High Speed Movies of Mechanical Action and Oscillograph Traces Combined on One Film!

These engineers are seeing for the first time what actually happens at the "break" of a mercury switch.

The Kodak High Speed Camera can now be supplied with a special feature which permits the recording of cathode-ray oscillograph traces through the back of the film. This makes possible high speed motion pictures of mechanical action with its electrical aspects simultaneously superimposed on the same 16mm film. When projected at normal speed, you get a complete picture of combined mechanical and electrical action slowed down as much as 200 times.

The Kodascope Sixteen-10R Projector... This moderately priced projector is equipped with a remote-control push button for reversing film direction over and over again to study critical phases of action. Its 2-inch f/1.6 lens and 750-watt lamp assure bright screen illumination, even if exposure conditions have not been optimum.

This basic improvement has countless new applications for solving design, production, and product performance problems through high speed movies, particularly those involving electrical equipment. Since an argon lamp times the film travel, extremely accurate analysis is possible. This unique tool may be the answer for which you have been looking. Further information and a copy of the booklet "Magnifying Time" will gladly be sent on request.

EASTMAN KODAK COMPANY, Industrial Photographic Division, Rochester 4, N. Y.

High Speed Movies...a function of photography
CONTINUOUS feed . . . used for vertical and horizontal recording.

While designed for 10-inch paper this Bird Kymograph will feed narrower widths.

Eight speeds are provided giving paper speeds from 2 to 450 cm/min.

Precision of paper movement is not affected by use or non-use of take-up roll because separate motors are employed.

The Bird Kymograph V-H is furnished with an attractive aluminum and cast iron stand which has a handle at top for easy carrying.

In addition a six foot rubber covered cord and plug are provided.

WRITE TO:

**Important in High Vacuum Work**

**Apiezon® Oils, Greases, Waxes**

Apiezon products have the recognition of leading scientists who accord them top preference for high vacuum work. A bulletin just off the press describes the physical characteristics of a variety of special oils, greases and waxes for oil-diffusion pumps, sealing joints, stop cocks, etc. You should have a copy to augment your store of knowledge on the subject. Mailed free; simply ask for Bulletin 43-SM.

**C& B Chemical Indicators**

Include all of the common indicators used in analytical and biological work, the hydrogen-ion indicators recommended by Sorensen and Clark & Lubs, and in addition many rare indicators suitable for special work. These indicators are available in both the dry form and in solution, ready to use.

C & B Products are distributed by Laboratory and Physician Supply Houses Throughout the World

REGISTER NOW

for the Philadelphia Meeting of the AAAS

AVOID CONGESTION AND DELAY
GET YOUR GENERAL PROGRAM –
BY FIRST CLASS MAIL – EARLY IN DECEMBER

Registration in advance of arrival at the 118th Annual Meeting of the AAAS in Philadelphia, December 26–31, 1951, has several striking advantages:

1. You avoid congestion and delay at Registration Desks at time of arrival. All indications point to a large attendance since all of the Association's eighteen sections and subsections, and more than forty societies, have excellent programs, and, in addition to paper-reading sessions, there will be the important symposia, conferences, and addresses for which an AAAS Meeting is noted.

2. You receive the General Program early in December in ample time, unhurriedly, to decide among the events and the sessions that you particularly wish to attend.

3. Your name will be in the Visible Directory the first hour of the first day of the meetings, since it will be posted in Washington as soon as received. (Hotel address can be added later, if necessary.)

4. Advance Registrants have the same privileges of receiving a map and directory of points of interest in Philadelphia, literature, radio broadcast tickets, etc. At the convenience of Advance Registrants, these will be distributed from the Main Registration in the Municipal Auditorium—the location of the full-scale Annual Exposition of Science and Industry, the Visible Directory, the AAAS Science Theatre, and the Biologists' Smoker.

To insure its prompt receipt, the General Program will be sent by first class mail December 1–6, 1951—which last is also the closing date for Advance Registration.

--------------- THIS IS YOUR ADVANCE REGISTRATION COUPON ---------------

1. Advance Registration Fee (the extra quarter covers part of the first class postage) enclosed:
   □ $2.25 AAAS Member (check one)
   □ $2.25 Wife (or Husband) of Registrant
   □ $2.25 College Student
   □ $3.25 Nonmember of AAAS

2. FULL NAME (Dr., Miss, etc.) ...........................................................
   (Please print or typewrite) (Last) (First) (Initial)

3. ACADEMIC, PROFESSIONAL, OR BUSINESS CONNECTION
   ........................................................................................................

4. OFFICE OR HOME ADDRESS ..........................................................
   (For receipt of Program and Badge)

5. YOUR FIELD OF INTEREST ..........................................................

6. CONVENTION ADDRESS ...............................................................
   (If not known now may be added later)

7. DATE OF ARRIVAL ...................... DATE OF DEPARTURE ..................

Please mail this Coupon and your check or money order for the fee, $2.25 or $3.25, to

HOTEL RESERVATIONS
118th AAAS MEETING
Philadelphia, December 26-31, 1951

The list of hotels and the reservation coupon below are for your convenience in making your hotel room reservation in Philadelphia. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in Philadelphia and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Share a room with a colleague if you wish to keep down expenses. Mail your application now to secure your first choice of desired accommodations.

September 14, 1951
It is now possible to make spectral measurements in the ultraviolet, visible and infrared regions throughout the range of 0.2 to 35 microns—WITH A SINGLE INSTRUMENT by simply interchanging prisms.

The optical system comprises a double monochromator thereby reducing scattered radiations to a negligible magnitude. Highest spectral purity—Isolation of extremely narrow wave lengths and greatest resolution are obtained in any one chosen region by selection of prism material for optimum performance.

NOW! . . . YOU CAN REFRIGERATE your CENTRIFUGE

Economically, Easily, Without Delay

It's true! . . . now you can have a refrigerated centrifuge for hundreds of dollars less than it formerly cost. Here's the procedure: You ship your centrifuge to our plant—we will refrigerate it with an efficient cooling unit and enclose it in a modern, baked-enamel finished aluminum cabinet. Your centrifuge, completely refrigerated, will be returned to you in a remarkably short time—and at a real savings. Sub-Zero refrigerated centrifuges are now in use in leading research laboratories throughout the country. We will gladly furnish additional information upon request.

SCIENCE ● 1515 Mass. Ave., N.W., Wash. 5, D. C.

POSITIONS WANTED

Bacteriologist: M.D., Ph.D., D.P.H. in charge of department of English university interested in similar position in U.S. Box 59,

BIOCHEMISTRY.

Biochemist, Organic and Physical Minors, Ph.D. 1942. Experience includes tracer techniques, animal and tissue metabolism and nutrition, medical applications. Now Assistant Professor Johns Hopkins. Box 16, SCIENCE.

Biologist: Young man, A.B., M.S., 3 years teaching experience. Desires teaching or research position. Box 8, SCIENCE.

Botanist, Ph.D. (Feb. '52), Major—Morphology, systematics, immunology; minor—plant physiology. Desires teaching plus research situation. Available immediately. Box 4, SCIENCE.

Chemist: Ph.D., presently professor university physical chemistry desires to make change. College or university appointment with rank preferred; industrial position considered. Extensive teaching experience coupled with broad training. Excellent command Russian and German. Box 9, SCIENCE.

Position Wanted:

Organic Chemist; Ph.D. (Major: Organic Chemistry; Minor: Chemistry, Mathematics); six years research department, one of leading pharmaceutical companies; interested in institutional, academic or industrial research in organic or biological chemistry with organization of established scientific reputation. For further information, please write Science Division, Medical Bureau (Burneise Larson, Director) Palmolive Building, Chicago.

POSITIONS OPEN

Bacteriologist or Biochemist—M.S. or Ph.D. Experience in the field of antibiotic fermentations, recovery, and micro-biological assay work. Capable of supervising a small group doing research and development in the field of antibiotics. Laboratory in Northern New Jersey. Company expanding fermentation facilities offers excellent opportunity. Reply giving age, full account of experience and accomplishments, education and salary requirements. Apply in confidence. Box 6, SCIENCE.

Microbiologist—opening for Ph.D. group leader familiar with bacterial growth, nutrition & physiology for research on fermentations & antibiotics. Eastern pharmaceutical company. Ideal research conditions, excellent benefit program. Please send resume including age, education, experience and salary desired to.

Y-76, P. O. BOX 3414
Phila. 22, Pa.

Pharmacologist, Ph.D. with experience; opportunity with prominent and progressive central New Jersey pharmaceutical concern. Also Assistant Pharmacologist with B.S. or equivalent qualifications. Write for details and salary interests to Box 11, SCIENCE.

The Weimann Institute of Science, Rehovoth, Israel, invites applications for the post of microanalyst and, to take charge of the Microanalytical Department. Candidates should submit their applications to the Chief, Scientific Committee. Science, technology, details of qualifications and experience, and testimonials in support of their applications.

Entries in the Fifth International Photography-in-Science Salon, sponsored annually by THE SCIENTIFIC MONTHLY and the Smithsonian Institution, should be sent (prepaid) to the Editor, The Scientific Monthly, 1515 Massachusetts Ave., N.W., Washington 5, D. C., Nov. 1—Nov. 27. All accepted photographs will be shown at the AAAS meeting in Philadelphia Dec. 26—31, and later throughout the U. S. For entry blanks and full information write to the address given below.
“CARRIER SYSTEM” telephony is economical, because many voices use the same pair of wires. But the extra equipment needed once limited it to the longer distances.

Now Bell Laboratories have developed new short-haul carrier, economical down to 25 miles, sending 12 conversations on two pairs of wires in a cable.

Keys to the new system are new circuits, miniature tubes, pocket-size wave filters and Permalloy “wedding ring” transformer cores that will barely slip over a man’s finger. New manufacturing processes were developed in co-operation with the Western Electric Company. Components are pressed into a plastic mounting strip with heat, a score at a time, instead of being mounted separately.

With this new carrier system more service can be provided without laying more cables. Tons of copper and lead can now be conserved for other uses. It’s another example of how science takes a practical turn at Bell Telephone Laboratories, to improve service and to keep its cost down.

BELL TELEPHONE LABORATORIES
WORKING CONTINUALLY TO KEEP YOUR TELEPHONE SERVICE ONE OF TODAY’S GREATEST VALUES
Science Teachers Report

A GREAT TIME SAVER IN TEACHING

THE SPENCER SCHOLAR'S MICROSCOPE

HOW THE AO NO. 78 SCHOLAR'S MICROSCOPE CUTS TEACHING TIME

1. Easy to learn to use.
2. Single focusing control—fast and precise.
3. Factory-focused built-in light source eliminates time consuming and frequently faulty substage adjustments.
4. Reversed arm position gives clearer view of specimen stage, objectives, and diaphragm openings.

Since we are currently supplying both military and civilian needs, instrument deliveries cannot always be immediate.

- The reports keep coming in—yes, the AO Scholar's Microscope does save time in teaching students microscopy.

This radically new idea in microscopes has proven a boon to science teachers. The built-in light source assures permanently aligned illumination and consequently better optical performance with much less adjustment. Low overall height increases comfort in operation. Locked-in parts reduce maintenance costs. 'Spring-loaded' focusing mechanism protects slides against damage. See your AO distributor or write Dept. S1.
