The Need for General Laws in the Social Sciences:  
E. W. Leaver and J. J. Brown ........................................... 379
Arnold Sommerfeld: 1868–1951: Linus Pauling ....................... 383

Technical Papers

A New Class of Hypnotics: Unsaturated Carbinols:  
S. Margolin et al. .......................................................... 384
The Life Span of the Red Blood Cell in Chronic Leukemia and Polycythemia: Nathaniel I. Berlin, John H. Lawrence, and Helen C. Lee .................................................. 385
Tissue Cytochrome c and Prevention of Experimental Atherosclerosis: J. Mardones et al. ........................................... 387
A Selective Medium for the Isolation of Coccioides immitis: Lucille K. Georg, Libero Ajello, and Morris A. Gordon .................................................. 387
The Experimental Production of Lipid Deposition in Excised Arteries: Sigmund L. Wilens .......................................... 389
Mango Grafting in Eight Weeks: L. B. Singh .......................... 393
Temperature-dependent Characteristics of an Adenylpyrophosphate Preparation from Potatoes:  
Kwan-Hua Lee and John J. Eiler ........................................ 393
Nudibranch Spicules Made of Amorphous Calcium Carbonate: Howard T. Odum ............................................ 395
The Heparinoid Nature of a Serum Macoprotein:  
Ezra M. Greenspan ...................................................... 395
The Percutaneous Absorption of Water Vapour: C. W. DeLong .... 397

Comments and Communications

Robert Chambers, Knut Faegri, Israel S. Kleiner,  
K. R. Newell, and Harry A. Wilmer ..................................... 398

Book Reviews

Culture Worlds: Nutrition and Chemical Growth in Childhood; Handbook of Human Engineering Data for Design Engineers ............................................. 400

News and Notes ............................................................ 402

Lobbying for Science .................................................... 3

Meetings & Conferences ................................................. 12
