OCTOBER 19, 1951

VOLUME 114
NUMBER 2964

Contents

The Stability of the World Strontium Cycle:
Howard T. Odum ........................................... 407

Technical Papers

Anomalous Thermal Behavior of Salivary Apoerythein Activity: Ernest Beerstecher, Jr., and Eleanor J. Edmonds ................. 412
The Adsorption of Manganese by Algal Polysaccharides: Arthur L. Pollard and Peter Byrd Smith .................. 413
The Recovery of Preformed Thrombin from Circulating Plasma: L. A. Sternberger and Frank Maltaner ................. 414
Reduction of Carbon Dioxide in Aqueous Solutions by Ionizing Radiation: W. M. Garrison et al. .................. 416
Fungus Fruiting in Submerged Culture: Carl W. Bretzloff .................................................. 418
The Rate of Mutation of the Gene Responsible for Retino-blastoma in Man: James V. Neel and Harold F. Falls .......... 419
Cross Resistance of Streptococci to Five Streptomyces Antibiotics: Horace M. Gezon and Dorcas M. Fasan .......... 422

Comments and Communications

Cult or Science? George A. Fink ........................................... 424
(Potentiometric) Measurements in (Some) Colloidal Systems: Karol J. Mysels ........................................... 424

Book Reviews

Propagation of Short Radio Waves; Fossil Mammals of Africa: The Miocene Hominoidea of East Africa .......... 425

News and Notes

Symposium on Nuclear Physics and Cosmic Rays: Rolf M. Steffen ........................................... 427

AAPG Research ........................................... 3

Meetings & Conferences ........................................... 16
