Contents

Distance as a Factor in the Development of Attraction Fields between Growing Tissues in Culture:
Allan A. Katzberg ................................................................. 431

Technical Papers
A Possible Connection between Certain Metamorphic Phenomena and Anomalies in the Earth's Magnetic Field:
John D. Weaver ................................................................. 434
The Action of Thrombin on Fibrinogen: K. Laki ................................. 435
The Radiation Dose-Response Curve and Bacterial Mutations: William E. Jordan, Roy B. Mefferd, Jr., and Oville Wyss ......... 436
Electrophoretic Comparison of the Serum Proteins of Normal and Diethylstilbestrol-treated Cockerels:
R. E. Clegg et al. ................................................................. 437
Carbon Dioxide and Root Hair Development in Anacharis (Elodea): Hugh M. Dale ........................................... 438
The Inhibitory Effects of Sorbose on Fungi:
H. L. Barnett and V. G. Lüly .................................................... 439
Rapid Acclimatization of Insects to Anoxia, with Special Reference to the Housefly: F. W. Stemler and W. A. Hiestand ............. 440
The Antihypertensive Influence of Certain Sulphydryl Compounds: Henry A. Schroeder ............................................ 441
The Distillation of Lithium Metal: Leo F. Epstein and W. H. Howland ..... 443
An Instrument for Dynamic Vital Capacity Measurements:
Edward A. Gaensler ............................................................. 444

Comments and Communications
E. G. Begle, Francis Hemming, Walter C. Kraatz, David B. Tyler, and Richard H. Wiley .................................................. 447

Scientific Book Register ................................................................ 450
News and Notes ........................................................................ 451
Primary Publication .................................................................. 3
Meetings & Conferences .......................................................... 16
