"active displacement" that does it

Not only does the Autotechnicon relieve the laboratory staff of the tedious task of processing tissues "by hand," but it also completes the chosen technique faster, more thoroughly, more uniformly, more dependably. The Autotechnicon is versatile . . . it fixes, dehydrates, washes, stains . . . delivers beautifully finished tissues ready for diagnosis.

And because it needs no human intervention, it knows no "working day." To-day's tissues, processed overnight by your own technique, will be waiting for you in the morning.
This Western Electric employee mounts a transmitter in the test fixture which is swung down to face an artificial mouth at 15-degree angle, just as transmitters are held in use. More than a million transmitters are tested each year.

This mouth speaks to millions

To serve the changing needs of telephone subscribers millions of telephone sets have to be moved each year. Before being put back into service most of them are returned to the Western Electric Company's Distributing Houses where they receive a thorough checkup.

Western Electric engineers needed a rapid method of testing transmitters over a range of frequencies. At Bell Telephone Laboratories, scientists had just the thing—a technique they had devised for fundamental research on transmitters. In co-operation with these scientists, Western Electric engineers developed the practical tester in the illustration.

The transmitter is removed from the handset and put in front of an artificial mouth which emits a tone that swings several times per second over a band of frequencies. A signal lamp tells if the transmitter is good. A test takes 5 seconds.

This new tester illustrates how Bell Laboratories research and Western Electric manufacturing skill team up to maintain your telephone service high in quality yet low in cost.

BELL TELEPHONE LABORATORIES

- Exploring and inventing, devising and perfecting, for continued improvements and economies in telephone service.
A FASCINATING PRESENTATION OF THE THEORY OF BIOLOGICAL RELATIVITY—ONE WHICH EVERY BIOLOGIST, PHARMACOLOGIST, BIO-CHEMIST, AND RESEARCH WORKER, REGARDLESS OF SPECIAL INTEREST, WILL WANT TO READ.

BIOLOGICAL ANTAGONISM
The Theory of Biological Relativity

by Gustav J. Martin, Sc.D.
RESEARCH DIRECTOR, THE NATIONAL DRUG COMPANY

GENERAL CONTENT—Dr. Martin reviews biological antagonism as reflected in natural and synthetic displacing agents—covers antagonism as seen in the fields of amino acids, purines, pyrimidines, vitamins, hormones, minerals, and as it forms the basis of immunology, pharmacology, and chemotherapy. Finally, he offers the concept of biological relativity based upon his extensive study of these biological antagonisms.

COMPLETE BIBLIOGRAPHY — 1,900 references based upon 100,000 entries carefully selected by the author as pertinent to the subject. A feature worth the price of the book alone. Truly a time-saver for the research worker and librarian who would spend days—even months—searching for the sources cited here.

OF INTEREST TO—Research workers in immunology, pharmacology, chemotherapy, medicine, and the entire field of biology because of its emphasis on the concept of relativity as being fundamental to the resolution of all problems in biology.

THE THEORY OF BIOLOGICAL RELATIVITY—Chapter 22 is devoted to the presentation of this concept. This is the first, thorough, complete, yet concise, statement of this “general law” which underlies all biological activity and is the basis for life. Agree with it if you will, disagree if you can—but read it, you must!

INSTRUMENT NEWS is an 8-page quarterly published in the interests of furthering research, material analysis, and production through modern optical instrumentation. Articles of technical and general interest are prepared by leading workers in the field and the Perkin-Elmer staff.

Some of the outstanding articles from the Summer '51 issue are listed below:

HARVARD METEOR CAMERA
Baker-Schmidt Optics

ULTRAVIOLET MICROSCOPES
Article by A. W. Pollister

INFRARED BOOSTS PENICILLIN PRODUCTION
Product Control Story

Among the subjects in our Fall '51 issue:

FLAME PHOTOMETER AIDS ORANGE PRODUCTION
Soil and Leaf Studies in California

ELECTROPHORESIS DETERMINES DRUG PURITY
How Lederle Controls Measles Serum Production

PERISCOPE OPTICS
Introduction to a Little-Known Field

You may receive INSTRUMENT NEWS regularly without charge by filling in the coupon below.

A good book made better!

COLLEGE ZOOLOGY

Sixth Edition

by

ROBERT HEDGER
Late Professor of Protozoology, Johns Hopkins University

and

KARL STILES
Professor of Zoology, Michigan State College

"It is conservative to say that more American zoologists received early nurture from Hegner's COLLEGE ZOOLOGY than from any other single textbook. The revising and modernizing of 'Hegner' by Karl A. Stiles is, therefore, significant news in the publishing field.

"Without changing the original plan of the book, Dr. Stiles has added certain features for which he has become well-known from his other published texts. The most notable of these is the arrangement of material so that the student is led to deduce general principles from facts, thus subjecting him to the use of the scientific method. The scientific method is stated and discussed in an early chapter and mentioned once after that, but as the student progresses in the use of the text material he receives continuous training in scientific thinking.

"COLLEGE ZOOLOGY remains a text for the study of animal life. Biological principles derived from such a study are not, however, neglected. There is a clear presentation of all principles that should be included in a beginning course on the college level. Some principles are developed as the animals that best exemplify them are described; others are given special treatment after the study of the phyla is completed. Chapters on major subjects such as heredity, evolution, ecology, nutrition, coordination, reproduction, and embryology comprise the final third of the volume.

"The physical features of the book are pleasing. The format and type delight the reader. Over three hundred new illustrations not only clarify the text material but also intrigue interest in it.

"The excellence of the revision should keep this book in the number one place among college textbooks of zoology for another forty years."

A review by F.G. Brooks, Cornell College which appeared in the October issue of BIOS.

The Macmillan Company, New York, N.Y.

Time Saver!

*MICROVIOLITE

DOUBLE-DUTY Microscope Light and ULTRA-VIOLET Examination Box

Two Views of Microviolite
Lower Shows
Light-proof
Door
Removed and
Oil Well
Sample in Place.

Where microscopic examination is necessary under both white and ultra-violet light, MICROVIOLITE saves work and hours of time. One switch activates either the white fluorescent tubes or the ultra-violet tubes, and examination can be completed under both lights without disturbing the specimen. Fits any standard binocular microscope.

Although developed originally for the petroleum geologist, the biological scientist and all others in fields requiring comparative examination under the two types of light, will find MICROVIOLITE of the greatest help. Designed by a practicing petroleum geologist, MICROVIOLITE has been thoroughly tested and proved in practical everyday use.

The case, 12½" x 5½" x 7", is of 20-gauge steel. Wiring is enclosed. The light source consists of two 8-watt white fluorescent tubes and two ultra-violet tubes with peak emission of 3650 Angstrom units. Current: 110 v. AC or DC or car battery with an inverter.

BOX ONLY, complete with tubes, list price $99.50

*Trade Mark Registered. U. S. Pat. No. 2,486,026. Other Patents Pending

Please ship________MICROVIOLITE at $99.50 each. We enclose □ check; □ money order; □ charge our account.

pH CONTROL
CHLORINE CONTROL
PHOSPHATE CONTROL

maintained with
accuracy, simplicity & low cost
by the
LaMOTTE COMPARATOR METHOD

These time-tested instruments have served Science and Industry for more than 31 years.

Consult LaMotte for a complete line of simplified Equipment & Reagents for:

pH Control, Chlorine Control, Boiler Feed Water Control, Analysis of Water, Sewage, and Industrial Wastes, Control of Electroplating Baths & Cleaning Solutions, Soil Testing, Vitamin Studies.

LaMOTTE CHEMICAL PRODUCTS CO.
Dept. H Towson, Baltimore 4, Md.

FLASK SHAKER

- Smooth operating, non-creeping and vibration free.
- Variable speed control . . . 160 to 400 oscillations per minute.
- Precision built for continuous operation.
- Versatile for experimentation, research or production.

PRICE $379.50 . . . FOB NEW BRUNSWICK, N. J.

Detailed information available upon request.

NEW BRUNSWICK SCIENTIFIC CO.
10 HIRAM STREET * NEW BRUNSWICK, N. J.
REAL RECORDING VERSATILITY

Your choice of 1-, 2-, or 4-channel systems — each with all the advantages that the famous name "Sanborn Viso" denotes

INTERCHANGEABILITY of Preamplifiers and Amplifiers permits recording of many different types of phenomena.

Any of the recording channels in the three systems at the right may include either a Strain Gage or General Purpose Amplifier, or the latter in combination (in 2-, and 4-channel systems) with either AC or DC Preamplifiers. For, any of the Amplifiers or Preamplifiers provided for in a system may be quickly removed from its place in the system and as quickly replaced with an alternate type.

VISO-CARDIETTE

While designed primarily as a direct-writing clinical electrocardiograph that can quickly record all accepted leads, this oldest member of the "Viso family" will also register many other phenomena, using suitable supplementary equipment. Its proven recording principles provide the basis for the design of the 1-, 2- and 4-channel systems below. These instruments feature standard "Viso" advantages: immediately visible, permanent records, traced by heated stylus (no ink) on plastic coated, continuous chart paper; recording in true rectangular coordinates; independent timing; and simplified control. The recording paper speed of Viso-Cardiette is 25 mm/sec. Paper width is 6 cm with a 5 cm recording area.

VISO RECORDER (SINGLE CHANNEL)

A simple and lower cost means of securing all the recording advantages of the Viso-Cardiette (described above), when electrocardiography is not a requirement, is offered in this assembly. The system comprises a single-channel recording unit, patterned closely after that of the Viso-Cardiette, and assembled in one case with either a General Purpose or Strain Gage Amplifier which are interchangeable as described at the left.

TWIN-VISO CARDIETTE (TWO-CHANNEL)

The two channels of the Twin-Viso operate independently of each other, but register simultaneously on one Permapaper record. Or, one channel may be used alone, with 1-channel recording Permapaper. A standard, "built-in" feature of the Twin-Viso is a choice of ten paper speeds which may be selected at will by the operator thru a quick and simple interchanging of sets of gears. These speeds are in pairs of 5 and 0.5, 10 and 1, 25 and 2.5, 50 and 5, and 100 and 10 mm/sec. Either speed of any pair selectable at will by panel control. Standard "Viso" recording advantages (described above) are inherent in the Twin-Viso and the Poly-Viso Cardiettes, and to them is added manually or remotely controlled code marking.

POLY-VISO CARDIETTE (FOUR-CHANNEL)

This multi-channel research recorder provides for one-, two-, three-, or four-channel registrations on one record, using Permapaper of appropriate widths. The Poly-Viso operates under the same principles as the Viso- and Twin-Viso Cardiettes described above and offers a "built-in" choice of eight paper speeds: 50, 25, 10, 5, 2.5, 1.0, 0.5, and 0.25 mm/sec., all selectable by panel control.

RECORDERS AND AMPLIFIERS ARE AVAILABLE SEPARATELY

The Recorders, Amplifiers and Preamplifiers of which the above complete systems are comprised may be obtained separately, to be combined or integrated by the user with other equipment.
