December 21, 1951
VOLUME 114       NUMBER 2973

Contents

Technical Information Activities of the Department of Defense .......... 653

Technical Papers

Does the Mangrove Really Plant Its Seedlings?           
Carl D. La Rue and Thomas J. Musik .................................. 661

Inhalation of Sulfur Hexafluoride: H. Specht and     
H. F. Brubach .......................................................... 662

Fungistatic Potencies of Some Fluorinated p-Benzquinones: 
Leo R. Tchon .............................................................. 663

A Centrifugal Device for the Preparation of Embryo Extract         
and Tissue Mince: Theodore S. Hauschka and Edmund Poppe .......... 664

A Simple Procedure for Determination of the Approximate
Lymph Space: R. H. Storey, J. Moshman, and J. Furth ............. 665

A Multirange Recording and Control System for Electrical
Measurements: J. C. Pigg ................................................. 667

An Interpretation of Bond Lengths and a Classification
of Bonds: R. T. Sanderson ................................................. 670

Comments and Communications
Jerome Alexander, Adolph Bernhard, Charles H. Blake,             
Victor A. Greulich, Francis Hemming, and Yvette Scher ............ 673

Book Reviews
The Chemistry and Action of Insecticides; Insect Control
by Chemicals ................................................................. 675

Scientific Book Register .................................................. 676

News and Notes
International Conference on Nuclear Physics and the
Physics of Elementary Particles: Ernst Bleuler ....................... 677

The History of Science ..................................................... 3

Meetings & Conferences ................................................... 10

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
