National Academy of Sciences: Abstracts of Papers Presented at the 1952 Annual Meeting .................................................. 479
William de Berniere MacNider: 1881–1951: W. C. George .... 489

News and Notes
  Seintillation Counter Symposium: G. J. Goldsmith and
  R. M. Steffen ........................................................................... 491

Technical Papers
  The Separation of Porphobilinogen and an Ehrlich Negative
  Precursor of Uroporphyrin: Violet E. Hawkinson and
  C. J. Watson ........................................................................... 496
  Ultraviolet Absorption Spectra as a Tool for Diagnosing
  Plant Virus Diseases: R. C. Lindner, H. C. Kirkpatrick,
  and T. E. Weeks ..................................................................... 496
  Formation of 2,3-Butylene Glycol in Bacterial Fermentation
  of d-Glucoasamine: Y. Matsushima and Y. Shimazu ... 499
  The Influence of Skin Temperature upon the Pain Threshold
  as Evoked by Thermal Radiation—A Confirmation:
  Michael Wertheimer and W. D. Ward ....................... 499
  Time Distortion in Hypnosis and Nonmotor Learning:
  Linn F. Cooper and David W. Rodgin ..................... 500

Comments and Communications
  Nembutal as an Anesthetic for Large Wild Mammals:
  Arthur Svikla and Akira Horita ........................................... 503
  The Peyote Cult: John Collier ............................................. 503
  Measuring Rate of Growth of Leucoeystes: Lew Cunningham, and
  Edwin E. Osgood and Harold Tivey ............................. 504

Ecological Taxonomy .............................................................. 3
Meetings & Conferences ......................................................... 12
