IN A QUANDARY?

Picking the right text for your fall classes is no easy matter! For those of you who are still in the process of selection and decision, may we recommend:

the new third edition of  
INTRODUCTION TO GEOLOGY
By E. B. Branson and W. A. Tarr. Revised by Carl G. Branson, University of Oklahoma, and W. D. Keller, University of Missouri. 492 pages, $5.50 Published in April
A revision and modernization of this well-known text, dealing with both physical and historical geology. The authors have attempted to eliminate all unnecessary technical terms and to discuss geologic processes and history in clear, understandable language. Revisions bring technical and statistical material up-to-date, and incorporate suggestions of teachers.

a very popular text in  
GENERAL ZOOLOGY
Due to its arrangement of subject matter, this text is highly adaptable to the needs of instructors whose courses differ variously in plan and content. It will serve either as a one- or two-semester course with emphasis on "principles" or a "systematic" presentation. Part I covers general animal biology; Part II is a systematic account of groups in the animal kingdom from protozoans to man.

a well balanced treatment of  
BOTANY. A Textbook for Colleges
Teachers have always liked this successful text because it gives clear, complete explanations without oversimplification. Thus it avoids a frequent tendency toward so simplifying the treatment of different subjects as to impair the effectiveness of the presentation. Another popular feature is the sequence of topics, considered by the authors to be the most suitable for classes beginning in the fall.

a recently published text, soon to become a leader  
PSYCHOLOGY
By Ross Stagner, University of Illinois; and Theodore Karwoski, Dartmouth College. 582 pages, $5.00
Psychology, an outstanding new text for first-year college students, covers the facts of psychology in its important areas (motivation, sensing, perceiving, learning, thinking, intelligence and personality) and presents these facts in such a way that the student can readily grasp both their inter-relationships and significance within the total scope of the book itself.

If you feel that one or more of these texts fill your fall requirements, send for your copy on approval.

YOUR ad here reaches over 2,000 foremost scientists in all the leading educational institutions, industrial laboratories, and research foundations in the U. S. and 75 foreign countries—at a very low cost. CLASSIFIED: 15¢ per word, minimum charge $3.00. Use of Box Number counts as 10 additional words. DISPLAY: $17.50 per inch, no charge for Box Number. Correct payment to SCIENCE must accompany all ads. Insertion usually made 2 or 3 weeks after receipt of ad.

SCIENCE  •  1515 Mass. Ave., N.W., Wash. 5, D. C.

**POSITIONS WANTED**

**Marine Biologist:** Ph.D. One year postdoctoral research experience. Training includes teaching, field studies, radioisotope technique. Desires academic or research position. Box 231, SCIENCE. X

**Microbiologist:** Ph.D., bacterial physiology and biochemistry, also proficient in medical bacteriology, interested in fundamental research. Academic position preferred. Box 236, SCIENCE. X

**Physicist,** specializing radiation protection. Experience includes radiation problems associated with radioisotopes, X-ray machines, nuclear accelerators in large research laboratory. Capable of planning, establishing, executing your radiation protection needs. Box 228, SCIENCE. X

**Plant Physiologist,** 3 years post-doctoral university teaching and research. Publications. Box 227, SCIENCE.

**Position Wanted:** Biochemist, Ph.D., seeks clinical research or professional relations position with ethical company; twelve years association, well-known company. For further information pleasure Science Division, Medical Bureau, (Burneice Larson, Director), Palmolive Building, Chicago, Illinois.

**Science Illustrator,** museum experience on foramenifera, orthoptera, and mollusca. Half tone, stipple, line. References. Box 233, SCIENCE. X

**Virologist,** M.S. Bacteriology. Three years experience neurotropic, respiratory viruses; chemical screening. One year teaching. Desires industrial or academic research. Box 226, SCIENCE. X

**Zoologist,** Ph.D., 32, training and interest largely in parasitology, desires new academic or research association after June in parasitology or invertebrate zoology, animal physiology or aquatic biology. Box 230, SCIENCE. X

**POSITIONS OPEN**

**Biologist** to assist in drug research; permanent position with small organization in New York; opportunity to learn new techniques in experimental pharmacology. Box 229, SCIENCE. 6/27

**Chemist:** For research position. Recent M.S. in organic chemistry or equivalent training in synthetic organic work. Location—Chicago area. Box 232, SCIENCE. X

---

**Persons Open**

(a) Biochemist; preferably Ph.D., trained in physiology, pharmacology or another basic medical science; strong background in organic chemistry desirable; direct research group involving development of new therapeutic agents. Midwest. (b) Medical Bacteriologist; Ph.D., to direct new laboratory, tuberculous research. East. (c) Physiologist to serve in advisory capacity to director of research and laboratory group; will be assisted by staff trained in scientific and medical literature. (d) Professor and Head, department of Physiology and Pharmacology; university medical school; $8500-$10,000. (e) Bacteriologist or Immunologist, qualified supervising production of blood typing sera; biological manufacturing company; key position; university city, Midwest; $10,000 up. (f) Pharmacologist; Ph.D. or M.D. with minimum five years' experience in pharmacological research; duties: directing and coordinating program in pharmacological research; teaching opportunity; East. 6-3 Science Division, Medical Bureau (Burneice Larson) Palmolive Building, Chicago.

“THE STORY OF THE ADAPTATION SYNDROME”

By HANS SELYE

M.D., Ph.D., D.Sc., F.R.S.C.

The intimate thoughts of a well-known scientist condensed in a different kind of book!

Based on seven informal lectures, it traces the development of STRESS from an accidental discovery to a clearly defined concept.

Written in simple, conversational style, it should prove enjoyable reading for physicians, researchers, medical students and biologists in general.

225 pages, illustrated
Price $4.50—postage .15¢

Large Capacity Centrifuges

Designed for large capacity centrifuging in the Chemical, Biological and Pharmaceutical industries, or wherever a batch type Centrifuge is required to handle large volumes of material in bottles or sealed containers. Several Models are available according to capacity requirements.

Model 13L - Spins 10 one liter bottles at 2300 r.p.m. (2280xg.) — or 10 1.3 liter spun aluminum containers at the same speed. A water-cooled enclosing guard and wind shielded head minimize heating of contents during centrifuging.

Model FS - Spins 4 one liter bottles or six half-liter bottles at 2500 r.p.m. (2000xg.). Adapters are available for smaller tubes and bottles. Perforated basket style heads are also available 14" in diameter x 6½" deep in manganese bronze and stainless steel, speed 2500 r.p.m. (1250xg.). This Centrifuge can be furnished with explosion-proof motor and mechanical speed controller for hazardous locations.

Model SR-3 - Identical in speed and capacity to Model FS listed above, but refrigerated, so that controlled temperatures to 0°C or lower may be maintained within the Centrifuge guard during the centrifuging process.

Note: A smaller capacity, higher speed Refrigerated Centrifuge, Model PR-1, is also available.

Prompt delivery on all Models. Write today for descriptive Bulletins 13L, FS and RC, containing complete details and current prices.

Makers of Fine Centrifuges for Fifty Years

INTERNATIONAL EQUIPMENT COMPANY

1284 SOLDIERS FIELD ROAD, BOSTON 35, MASS.
WITH this ideal permanent set-up you’re instantly ready for any visual or photomicrographic work. Just clamp microscope and illuminator to the AO Photomicrographic Camera base. A Special light-tight adapter and camera arm with fine adjustment positioning stop enable you to swing the camera away from the microscope and back without further adjustment. A binocular body can be used for extended observations and easily replaced by a monocular body when you take photomicrographs. The telescopic focusing eyepiece permits viewing moving specimens up to the instant the shutter is released. At a moment’s notice you can switch from the camera back for 35mm black and white or color shots to the 4” x 5” unit for sharp photomicrographs suitable for technical journal reproduction. See your AO distributor or write Dept. F3.
