SCIENCE

AUGUST 8, 1952

VOLUME 116

NUMBER 3006

Contents

The Chemical Approach to the Control of Tuberculosis:
H. Herbert Fox .......................................................... 129

News and Notes

AAAS Southwestern Division Meeting: Edna L. Johnson .... 135

Technical Papers

Low Energy Counting with a New Liquid Scintillation Solute:
F. N. Hayes, R. D. Hiebert, and R. L. Schuch .................. 140

Body Build and Body Composition: Josef Brožek and Ancel Keys 140

Specific Volumes of Proteins and the Relationship to their Amino
Acid Contents: T. L. McMeekin and Kathleen Marshall .......... 142

A Note on the Phosphorescence of Proteins: P. Debye and
John O. Edwards ..................................................... 143

The Presence of Toxins other than DDT in the Blood of DDT-
poisoned Roaches: James Sternburg and C. W. Kearns .......... 144

Differentiation between Circulins A and B and Polymyxins A and
E by Paper Chromatography: J. H. Dowling et al. ................ 147

Colloidal Graphite in the Preparation of Samples for Gas-Flow
Counting: Allen F. Reid and Margaret C. Robbins ............... 148

A Method for Quantitative Evaluation of the Effects of Ionizing
Radiations on Growth of Adenocarcinoma in vivo: T. P. Ting .... 149

The Effect of Anesthesia upon Adrenergic Blockade: W. Glen Moss 151

Comments and Communications

Jay D. Andrews, K. A. Bisset, J. W. Bratzler, R. L. Cowan,
Ralph I. Smith, and R. W. Swift .................................... 152

Book Reviews

Cold Injury: Absorption and Extraction ............................ 155

Scientific Book Register .............................................. 156

Human Hemoglobin .................................................... 3

Meetings & Conferences .............................................. 12
