Photography sees what happens when you stretch a point

What you're looking at is a photograph of the stress patterns in a notched shaft that's being subjected to pure tension.

It's photoelastic stress analysis where polarized light is sent through plastic models of the part to be studied. Since some plastics become doubly refracting under stress, the image recorded on film reveals the character of the forces in the material. With white light and color film, the patterns of strain show variously colored striations and figures which indicate the magnitude of difference between the principal stresses.

Analysis of the photographic records of these patterns provides highly accurate data—solves problems that ordinarily might take weeks of tedious mathematical calculations. And the pictures can be filed for reference whenever needed.

Kodak makes the photographic materials for this and a host of other photorecording techniques. For the useful, detailed information you need on this practical process, your Kodak dealer has a new data booklet, "Photoelastic Stress Analysis." Eastman Kodak Company, Industrial Photographic Division, Rochester 4, N. Y.

**STRESS ANALYSIS**

...an important function of photography

INSTRUMENT NEWS is an 8-page quarterly published in the interests of furthering research, material analysis, and production through modern optical instrumentation. Articles of technical and general interest are prepared by leading workers in the field and the Perkin-Elmer staff.

Some of the outstanding articles from the Summer '52 issue are:

FLAME PHOTOMETRY SPEEDS INFANT BLOOD STUDIES
Ultramicro techniques with premature infants
REPORT ON THE SOUTHERN SKIES
Dr. Bart J. Bok's results with ADH Telescope
INFRARED ASSAYS SIMILAR DRUGS
Smith, Kline & French Case History
GAUGING WITH INFRARED
Product Control Technique

Among subjects in the Spring '52 issue are:

NEW INSTRUMENTS DESIGNED FOR FLEXIBILITY
"Building Blocks" concept
QUANTITATIVE WORK WITH THE MODEL 21
Directions and Instructions for Use
INFRARED AND THE PERFUME INDUSTRY
Article by Y. R. Naves and Picture Story

You may receive INSTRUMENT NEWS regularly without charge by filling in the coupon below.

Taxonomy of Vascular Plants

George H. M. Lawrence

Here—in one volume—is a comprehensive source of information on the theory, principles and operating procedures of plant taxonomy plus an accounting of all the families of plants known to grow (native or cultivated) in North America. A well-known taxonomist, the author presents a technical description for each family with separate paragraphs on distribution, distinguishing characteristics, phylogenic relationships, economic importance, and a bibliography of selected references. Most of the illustrations have been specially prepared for this book under the direction of the author. $7.95

100 Years of Biology

Ben Dawes

From the time of Linnaeus and Lamarck to the present day, this text surveys every one of the twenty-five odd special studies encompassed by biology, giving the student an impressively broad view of the whole range of his diverse subject. Whole chapters are devoted to such advances as antibiotics, agricultural biology, and modern team methods of biological research. $5.00
Paper Partition

CHROMATOGRAPHY EQUIPMENT

A new and more complete line of paper chromatographic equipment, carefully engineered for use in this new field of analysis.

CHROMATOGRAPHY DRYING OVEN

Also Available:
New Chromatocab Models
Strip Suspension Racks (stainless steel or glass)
Electronic densimeters
Ultraviolet Lamps (long and short wave-length)
Indicator Sprays
Disc Chambers
Solvent Troughs & Assemblies
Micro Pipets
Clips

There IS Something New in Anatomy

A STEREOSCOPIC ATLAS OF HUMAN ANATOMY

In amazing 3-dimensional Kodachrome transparencies

By DAVID L. BASSETT, M.D., Associate Professor of Anatomy, Stanford University
Photography by WILLIAM B. GRUBER

Section 1: THE CENTRAL NERVOUS SYSTEM
(Including the Brain, Spinal Cord, and Meninges)

Each transparency portrays actual human material. Each sequence of dissection is done on the same specimen.

- General relationships of the brain and meninges within the cranial vault.
- Dissection of the cerebrum, cerebellum, and brain stem.
- Series of transverse sections of the brain stem (cut surfaces shown in relation to the remainder of the brain so that the location of nuclei and tracts can be correlated with surface features).
- Spinal cord.
- Normal radiographic studies of the brain: angiograms and pneumoencephalograms.

In Section 1: 238 stereoscopic views in full color, mounted on 34 View-Master® reels. Each reel shows the sharp, clear, and beautifully illuminated details of seven consecutive dissections, in three dimensions, with every detail magnificently clear.

Reels are stored within the covers of four compact volumes: text and labeled drawings used for positive identification of structures. For each stereoscopic view there is a labeled drawing with scale of dimensions and appropriate description.

Reels are designed for three-dimensional viewing in View-Master® stereoscopes or two-dimensional projection in View-Master® projector.

Section 1 of BASSETT: STEREOSCOPIC ATLAS OF HUMAN ANATOMY

CRYS TALS AND THE POLARISING MICROSCOPE
By N. H. HARTSHORNE, University of Leeds and A. STUART, University of the South West.

ORGANIC CHEMISTRY
By I. L. FINAR, Northern Polytechnic, London.
Published 1951. 696 pages. $7.50.
Includes: Groundwork and detail in the fundamental principles of organic chemistry is provided. Stress is laid on structural formulae, properties of compounds and reaction mechanisms. Electronic theories are introduced at an early point in the book and their principles are reiterated through constant application. An abundance of references to original papers and an appendix on the literature of organic chemistry are provided. Examination questions and index.

A TEXT-BOOK OF PRACTICAL ORGANIC CHEMISTRY
By A. I. VOGEL, Woolwich Polytechnic.
Second edition. Published 1952. 1033 pages. $10.00.

LINEAR POLYMERS
By E. M. FRITH, Cambridge University and R. F. TUCKETT, Cambridge University.
Published 1951. 352 pages. $3.50.

GENES AND MUTATIONS

Cold Spring Harbor Symposia on Quantitative Biology, Volume XVI (1951), 540 quarto pages, with numerous figures.

- Authoritative reviews of the gene problem, presented in 35 papers and edited discussions. Subjects considered are: theory of the gene, cytoplasmic constituents of heredity, evolution of the gene, induction of changes in genes and chromosomes, genetic mechanisms in bacteria and bacterial viruses. Table of contents sent on request.

- Prices: Volume XVI, $9.00; other volumes, $7.00. Volumes IX and XVI, or XV and XVI, $14.00; volumes IX, XV, and XVI, $20. Postage extra; domestic, 25 cents, foreign 50 cents per volume.

Address: Biological Laboratory

PERSONNEL PLACEMENT

POSITIONS WANTED

Biochemist—Enzymologist, Ph.D., 31, Canadian, family. Seven years research experience in microbial metabolism, bacterial variation and enzyme formation. Two years teaching. Strong background in Organic Chemistry and Genetics. Languages. Available January 1953. Desires position in industrial research or development. Box 283, SCIENCE. 9/12

Editor, writer, researcher, organizer available. Specialist in medicine, related sciences. Box 277, SCIENCE. 9/5

Microbiologist—Bacteriologist, Ph.D., 35. Thirteen years responsible teaching and research experience. General microbiological knowledge. Academic or industrial position desired. Box 263, SCIENCE. 8/22; 9/5

Physiologist, Ph.D., M.D., woman, age 30, seeks research position. New York area. Box 264, SCIENCE. 9/5

Scientific Literature Worker—Ph.D. in Medical Sciences. Abstracts medical literature, make literature searches, compile clinical investigation reports, screen literature, prepare bibliographies, brochures, package inserts. Box 284, SCIENCE. X

POSITIONS OPEN

Physiologist or Pharmacologist. Instructor, Assistant Professor, and Research Assistant. Expanding institution with good academic practice devoted to productive scholarship and progressive teaching. Active research program in electrolyte and fluid balance, diuretics and somatic-autonomic reflex patterns. List training, references, and minimum salary. Applicants with biochemical background acceptable. Box 280, SCIENCE. X

SCIENTISTS—salaried positions, $3,600 to $25,000. This confidential service for outstanding men who desire a change of connection, will develop and conduct preliminary negotiations without risk to present position. Send name and address for details. TOMSETT ASSOCIATES • 335 Frick Bldg., Pittsburgh 19, Pa. 9/12, 9/19

The MARKET PLACE

BOOKS

The Market Place—as you've come to know it—combines new, used, and out of print volumes. A major source for students seeking books and for libraries, it's a must for all serious students of science. Exceptional in scope and value, it's the most complete source of its kind. Check it out today.

CLASSIFIED: $2.00 per word minimum charge $5.00. Use of Box Number counts as 10 additional words. DISPLAY: $11.50 per inch, no charge for Box Number. Correct payment to SCIENCE must accompany ad.

LANGUAGES

Listen and Learn a Language by LINGUAPHONE

At home learn to speak Spanish, French, German, Russian, Japanese—any of 29 languages, by Linguaphone World's Standard Conversational Method. Over a million Home-study students. Save time, work, money. Send for free book today. Approved for Veteran's Training.

GET YOUR ADVANCE COPY

of the General Program-Directory
of the St. Louis Meeting of the AAAS

By first class mail – early in December

The General Program-Directory of the 119th Meeting of the AAAS in St. Louis, December 26–31, 1952, will be available to anyone, at cost, within the first week in December—whether he can attend the Meeting or not. This year the General Program will be much simplified in format and the Directory content increased. You will want it for your reference shelf.

Program content
2. Programs of the 18 AAAS sections and subsections (symposia and contributed papers).
3. Programs of the more than 30 participating societies.
4. The Special Sessions: AAAS, Academy Conference, Conference on Scientific Manpower II, National Geographic Society, Phi Beta Kappa, RESA, Sigma Xi.
5. Details of the Kiel Auditorium, downtown hotels, Washington University.
6. Titles of the latest scientific films to be shown in the AAAS Science Theatre.
7. Exhibitors in the 1952 Annual Exposition of Science and Industry and descriptions of their exhibits.

Directory content
1. AAAS officers and staff for 1952.
2. Complete roll of AAAS presidents and their fields.
3. The 236 affiliated organizations.
6. AAAS Awards and Grants—including all past winners.
7. Membership figures by sections.
8. Section committees (Council members) in detail.
9. Local committees.
10. Future Meetings of the AAAS.

Advance Registration

Advance registration—if you can attend the Meeting—has these advantages: 1) You avoid delay at Registration Desks upon arrival; 2) You receive the General Program-Directory in ample time, unhurriedly, to decide among events and sessions you particularly wish to attend; 3) Your name is posted in the Visible Directory as the Meeting opens.

The coupon below may be used both by advance registrants and by those who wish only the advance copy of the General Program-Directory.

--- THIS IS YOUR COUPON FOR AN ADVANCE COPY OF THE GENERAL PROGRAM-DIRECTORY ---

1a. □ Enclosed is $2.50 for my advance Registration Fee which brings me the Program-Directory, Convention Badge, and all privileges of the Meeting.

1b. □ Enclosed is $1.50 for only the Program-Directory. (If you should attend the Meeting, later, Badge and privileges may be secured for $1.00 more.)

(Check one)

2. FULL NAME (Dr., Miss, etc.) ..........................................................
   (Please print or typewrite) (Last) (First) (Initial)

3. ACADEMIC, PROFESSIONAL, OR BUSINESS CONNECTION ........................................

4. OFFICE OR HOME ADDRESS ..........................................................
   (For receipt of Program-Directory)

5. YOUR FIELD OF INTEREST ..........................................................

6. CONVENTION ADDRESS ..........................................................
   (May be added later, after arrival)

Please mail this Coupon and your check or money order for $2.50 or $1.50 to the AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE 1515 Massachusetts Avenue, N.W., Washington 5, D. C.
PUT THESE ON YOUR BOOKLIST FOR FALL READING . . .

METHODS of STATISTICAL ANALYSIS
Second Ed. By CYRIL H. GOULDEN, Chief, Cereal Division, Experimental Farms Service, Canadian Dept. of Agriculture.

This new edition covers the general field of applied statistics with pronounced emphasis on experimental design. Detailed methods for the analysis of experiments of basic designs are given to equip the reader with a firm command of underlying principles. Modern methods of computation for partial and multiple correlation are presented as well as comprehensive treatments of the discriminant function, incomplete block experiments, and quality control. The applications and illustrations are drawn from agricultural research where the author has had extensive experience. A Wiley Publication in Statistics, Walter A. Shewhart Editor. Ready in October. 468 pages. Prob. $7.50.

An INTRODUCTION to the CHEMISTRY of the HYDRIDES
By DALLAS T. HURD, Research Associate, General Electric Research Laboratory

The first comprehensive, critical description of hydrides and related compounds of hydrogen. Here is stimulating information on new and interesting developments in the chemistry and application of hydrides, which opens up many industrial and research possibilities. The treatment includes preparation, physical and chemical properties, chemical reactions, applications, and toxicology; plus a general interpretation of the theory of chemical bonding with particular reference to hydride systems, a discussion of all the chemical elements known to form compounds with hydrogen, and a list of commercial sources of specific hydrides. 1952. 231 pages. $5.50.

PRACTICAL and EXPERIMENTAL GEOGRAPHY
By W. G. V. BALCHIN, Lecturer in Geography, University of London, and A. W. RICHARDS, Senior Geography Master, Farnborough Grammar School

Presents practical and experimental work in geography, including much original material on methods used by the authors themselves. The first section deals with earth movements; the second, with practical work in the study of landforms; in the third section experimental work which can be linked with a study of the atmosphere and oceans is outlined; the fourth section covers practical work in survey and map projections; and the last section outlines the principles involved in the construction of distribution maps and cartograms. Ready this Fall. 133 pages. Prob. $2.75.

INORGANIC CHEMISTRY: An Advanced Textbook
By THERALD MOELLER, Associate Professor of Chemistry, The University of Illinois

Here are all the essentials to a comprehensive understanding of the subject. The material presented, drawn from a variety of books and supplemented by information from widely scattered original sources, provides the reader with a well-rounded survey of the field from a modern point of view, and acquaints him with existing problems and current investigations. Among the topics treated are crystal structure, radioactivity, valency and the chemical bond, color, analytical methods, oxidation-reduction phenomena, acid-base phenomena, and measurements of a number of types. Ready this Month. Approx. 966 pages. Prob. $10.00.

Send for your on-approval copies today.

JOHN WILEY & SONS, Inc. 440 Fourth Avenue, New York 16, N. Y.
**Problem:** To prevent blood-count mistakes

**Problem:** To build a better student microscope

**Answer:** Is it serious disease or minor trouble? Often a red and white blood-cell count will tell. Hundreds of tiny cells are jumbled together in an area 3/10,000ths of a square inch. Mistakes can be dangerous. AO pioneered and developed a unique instrument—the Bright-Line Haemacytometer—which throws blood cells into bold relief under the microscope, thus making them much easier to count accurately.

**Problem:** How do babies' eyes develop?

**Answer:** What does a healthy baby see first? When should his eyes and hands start to work together? To investigate these and similar important questions, American Optical supported a specialized research project conducted by experts, who created an entirely new field... Developmental Optics.

**Answer:** "My neck gets stiff." "Microscope's too high." AO designers studied all teacher-pupil complaints and developed a new, comfortable-to-use microscope that has a built-in light. It's economical, tamper-proof, and hard to damage. Write us about your development problems. Address American Optical Company, 88 Vision Park, Southbridge, Massachusetts.
