Contents

Helium Liquefier: S. C. Collins ............................................. 289

News and Notes .................................................................... 295

Technical Papers

Cytochrome c Oxidase Activity During the Metamorphosis of Drosophila virilis: Dietrich Bodenstein and Bertram Sacktor ............................. 299

Thin Films of Supersaturated Solutions for Detecting, Counting, and Identifying Very Small Crystalline Particles: Bernard Vonnegut .......................................................... 300

Algebraic Relationships Between Digestion Coefficients Determined by the Conventional Method and by Indicator Methods: H. L. Lucas .............................................................. 301

Influence of pH on Phosphatase Activity of Rat Seminal Vesicles: J. C. Porter and R. M. Melampy .............................................................. 302

Differentiation of Nucleic Acids and Acid Mucopolysaccharides in Histologic Sections by Selective Extraction with Acids: William B. Atkinson ......................................................... 303

The Accuracy and Convenience of Silicone-treated Microliter Pipettes: Edward L. Duggan and Kendrie C. Smith ......................................................... 305

Propagation of a Strain of Endamoeba histolytica in Tissue-bearing Culture: James G. Shaffer and Henry S. Sienkiewicz .................................. 306

Comments and Communications

Photochemical para Rearrangement of Phenyl Ethers: M. S. Kharasch, Guido Stamp, and Walter Nudenberg ......................................................... 309

Liberal Arts Colleges and the National Academy of Sciences: John R. Sampey .............................................................. 309

Book Reviews

Factor Analysis; Hyperconjugation ........................................ 310

Recruitment Through Education and Experience ................. 3

Meetings & Conferences ..................................................... 18
