Recording theory and research advances . . .

ION EXCHANGERS in ANALYTICAL CHEMISTRY

By Olaf Samuelson, Professor of Analytical Chemistry, Chalmers Tekniska Hogskola, Göteborg, Sweden. This is the first book to be devoted exclusively to the analytical applications of the new synthetic organic ion exchangers. This ion exchange method, which is becoming more and more important, is rapid, simple, and produces more reliable results than earlier separation methods. Dr. Samuelson, in this timely work, presents a comprehensive study of the subject, from the viewpoint of a practicing analytical chemist. Divided into three parts: general, practical, and applications, it initially explains the fundamental principles of ion exchange reaction, then describes practical applications of this method to organic, inorganic, and biochemical analysis in detail. The treatment is monographic, and it includes both procedural details and explanatory theory. In Preparation.

SOIL MICROBIOLOGY

By Selman A. Waksman, Professor and Chairman, Department of Microbiology, Rutgers University. Here is the long-awaited, up-to-date text on microorganisms and their importance in soil processes. This new book provides the reader with a basic understanding of the nature and complexity of the soil population and the conditions that influence its composition. Dr. Waksman reviews the activities of microorganisms in the soil (the decomposition of plant and animal residues and the formation of humus, etc.) and shows how these activities can be utilized to further soil improvement and soil conservation, to increase plant productivity, and to combat plant and animal pathogens. He also points out some of the more promising lines of advance in the field and suggests some likely paths for future investigation. Available now. 356 pages. $6.00.

The KINEMATICS and MECHANISM of HOMOGENOUS CHEMICAL REACTIONS

By Arthur A. Frost, Associate Professor of Chemistry, Northwestern University, and Ralph G. Pearson, Assistant Professor of Chemistry, Northwestern University. This book differs from other treatments of chemical kinetics in emphasizing the complexities of chemical reaction and the relation of kinetics to mechanism, particularly the mechanism of organic reactions. The book is profusely illustrated with examples of kinetics used to determine mechanisms of chemical reactions. The detailed mathematical treatment of complex reactions is unusually complete as is the treatment of flow methods. Emphasis is on fundamental physical principles, with theories such as the collision theory and the transition state theory used to aid in understanding. In press.

PRACTICAL and EXPERIMENTAL GEOGRAPHY

By W. G. V. Balchin, University of London, King's College and A. W. Richards, Farnborough Grammar School. This book is a first attempt at gathering together many exercises in practical and experimental work in geography, and includes much original material on methods used by the authors themselves. This experimental approach is designed to stimulate interest, facilitate understanding, and fix essential facts in the minds of students. The first section deals with earth movements; the second, with practical work in the study of landforms; in the third section, experimental work which can be linked with a study of the atmosphere and oceans is outlined; the fourth section covers practical work in survey and map projections; and the last section outlines the principles involved in the construction of distribution maps and cartograms. Available now. 135 pages. $2.75.

Send today for your on-approval copies.

BACTO CONCENTRATION DISKS

Bacto-Concentration Disks are for determination of penicillin level in milk, serum, urine and other body fluids.

The concentration disks contain measured amounts of penicillin.

The following standardized materials are recommended for this procedure:

- Bacto-Pencillin Disks
- Bacto-Penase Disks
- Bacto-Subtilis Spore Suspension
- Bacto-Whey Agar

DIFCO LABORATORIES
Detroit 1, Michigan

Complete details of this procedure available upon request.

NEW CLASSROOM MICROSCOPE
for General Biology
Sold on 10 days approval. Satisfaction Guaranteed
Model GB
Equipped with:
10x Ocular
Objectives,
16mm (10x) m.a. 0.50
4mm (44x) m.a. 0.66
Disc Diaphragm
Plano-concave mirror
Coarse adjustment
Full range fine adjustment
$118.00
Less 10% on 5 or more.

THE RICKETTSSIAI DISEASES OF MAN

This symposium volume is a comprehensive survey of the general field of Rickettsial diseases in man. Among the contributors appear the names of many of the foremost American authorities on this important and relatively new field of medicine.

The first group of papers includes discussions of the taxonomy, biology, isolation, and identification of vectors, and reservoirs of infection of the Rickettsial diseases of man.

The second group of papers is devoted to discussions of serological reactions, the Weil-Felix reaction, the complement-fixation and agglutination reactions, and the preparation and standardization of Rickettsial vaccines. The final group of papers treats of insecticides, methods of their application, and mite controls.

Many of the 27 contributors to this volume during World War II were on the battle fronts in Africa, Italy, France and Germany, protecting our troops and the local populations wherever Rickettsial diseases prevailed. Rarely, if ever, have the authors of a medical book had so wide and so successful practical experience in the very subjects on which they have written.

To: A.A.A.S. Publications
1515 Massachusetts Avenue, N.W., Washington 5, D. C.
Please accept my order for one copy of The Rickettsial Diseases of Man (7½ x 10¼, cloth bound). My check in correct payment is enclosed ($5.25 to A.A.A.S. members, $6.25 to those who are not members; including postage.)

**NAPHTHORESORCINOL**

Naphthoresorcinol Schwarz is of the highest commercially obtainable purity and is readily available at a low price. The product is virtually free of impurities. An important biological research tool for the quantitative determination of glucuronic acids, naphthoresorcinol is also useful in the preparation of dyestuffs.

Schwarz products meet the exacting requirements of biochemical and clinical research.

Morphogenesis

By JOHN TYLER BONNER. This book attacks one of the central problems of modern biology—how any living organism starts as an egg and develops into a highly elaborate animal or plant. Special effort is made to examine the development of all kinds of organisms—one-celled forms, colonial forms, all the various lower plants and animals, and finally the higher forms. "A most valuable and stimulating account of a most important branch of modern biology."—G. E. Hutchinson, Yale University.

350 pages, 99 illustrations, $5.00

Hydrogen Ion Concentration

NEW CONCEPTS IN A SYSTEMATIC TREATMENT

By JOHN E. RICCI. In a highly original approach, the author presents a general and systematic treatment of relations involving the hydrogen ion concentration of aqueous solutions. Mathematical exactness is developed as far as possible without dependence upon particular theories of ionization. Dr. Ricci is professor of chemistry at New York University.

498 pages, 78 graphs, $10.00

Enrich your library with the scientific and historic value of this unique volume

Centennial

7½ x 10½ inches, double column, clothbound, 320 pages

Symposia presented to commemorate the first hundred years of AAAS include 42 papers by leading scientists in thirteen major fields:

- Sciences of Society
- Educational Potentials
- Human Individuality
- Food and Nutrition
- Housing
- World Health Problems
- Sources of Energy
- The Upper Atmosphere
- The World's Natural Resources
- Genes and Cytoplasm
- High Polymers
- Interactions of Matter and Radiation
- Waves and Rhythms

Cash price to AAAS members $4.50
Nonmembers and institutions $5.00

PITUITARY-ADRENAL FUNCTION

PITUITARY-ADRENAL FUNCTION continues the AAAS tradition of presenting in book form the collected papers presented at symposium programs of wide interest. This volume includes 22 papers delivered at a two-day Symposium on the Adrenal Cortex at the AAAS meeting in New York City, December 1949.

This AAAS symposium volume assembles important contributions of a score of laboratories in the United States and Canada from which many of the recent major advances in pituitary-adrenal physiology and therapeutics have come, and includes studies on the regulation of adrenal cortical activity, the role of the cortical hormones in protein, carbohydrate, and mineral metabolism, and effects of the cortical steroids and the ACTH in various disease states. A summary chapter on "Adrenolescence" by Dr. George Perera forecasts some of the possible future trends in this active field of endocrine research.

6 x 9 inches, illustrated, clothbound, 224 pages—$4.00

When ACCURACY is important...

CASTLE AUTOCLAVES are ideally suited to precision laboratory work because uniform temperature is rigidly maintained throughout the chamber. This temperature is selective at any point from 212°F. to 260°F., hence adaptable for all routine and research work.

SINGLE WALL TYPE is generally suitable for laboratory procedures. It is equipped with condenser hood which prevents moisture dripping on contents.

DOUBLE WALL TYPE gives you the drying effect of a separate pressure jacket. This type can be used for general surgical purposes.

Interior equipment to meet your requirements. Write: Wilmot Castle Co., 1212 University Ave., Rochester 7, N. Y.

Here it is, the new Phipps & Bird Pipette Washer! Notice the chamber is constructed entirely of virtually unbreakable chemical-resistant plastic. This type of construction eliminates usual hazards of overflow. Rack is fabricated of chemical-resistant stainless steel.

No elaborate connections are necessary for installation. Simply connect hose from input on washer to standard laboratory faucet. Chamber dimensions 3½“ x 18”; dimensions of rack 2½” i.d. x 18” tall.

Cat. No. 71-227 $42.50

Plastic chamber accessory—same dimensions as Washer chamber. Used for pipettes during soaking period. $10.00 ea.

5001 W. BELTLINE HIGHWAY • MADISON, WISCONSIN
LABORATORIES wishing to enter the field of radioactivity with a minimum of capital outlay will find the new Tracerlab SC-19 Utility Scaler the ideal instrument.

The Utility Scaler features eight electronic scales-of-two, which give a scaling factor of up to 256, followed by a mechanical register totalizing 9999 counts. A scale selector switch makes it possible to by-pass some of the scales and thus allows the choice of scaling factors of 32, 64, 128 and 256. Predetermined counts ranging from 320 to 256,000 may be selected by means of the preset count switch which will stop the register at 10, 100 or 1,000.

With a resolving time of 10 microseconds, counting rates of up to 60,000 CPM result in less than 1% coincidence loss. The maximum counting rate of the Utility Scaler register is 1,000 CPM. The high voltage power supply is variable from 500 to 2000 volts and is so regulated that a 1% change in line voltage causes only 0.1% change in high voltage.

Uniform Serial Sectioning

with the AO no. 815 rotary microtome

For a medium size microtome with all the accuracy and mechanical advantages for which AO Spencer Microtomes have long been famous — choose the popular No. 815 Rotary Microtome. Uniform serial sections may be cut from two to forty microns in thickness. Total excursion of the feed is 22mm. Improved ball and flange object clamp holds the block rigidly and may be oriented in any desired plane. A precision-edged, highest quality steel knife is supplied complete with back and handle for sharpening. Ask your AO distributor to show you the No. 815 Microtome, or write Dept. J4.
