Everything about a Technicon Lab-aid file is designed to speed the work and improve filing efficiency. For example, the unique (patented) spring slide-spacers. Holding slides upright with plenty of air-space for quicker drying, they're still supple enough to spread like this, so you can easily file or find a slide. If you want more capacity for close-packed, permanent storage, you simply remove the spacer, which gives you room for approximately 6500 slides in a single 19" x 19" x 5" unit — up to 45% more capacity.

To find out more about this efficient system for laboratory filing, send the coupon below.
NOW NUCLEAR offers you the advantages of a complete line of radiocarbon compounds. Through agreement with the British Ministry of Supply, Nuclear has been appointed exclusive U. S. distributor for all radiocompounds produced by the Radiochemical Centre, Amersham, England. All those in the attached list are quickly available, and other chemicals can be supplied on request. Compounds previously offered by Nuclear are of course still available. Future announcements will be made as this line of standard compounds is expanded.

Most compounds listed are now available for immediate shipment from Nuclear stock, under regular A. E. C. licensing procedures. Write for the complete chemical price list.

NEW NUCLEAR CONDENSED CATALOG
Up-to-the-minute data on the complete line of NUCLEAR Instruments and Accessories is shown in the new Condensed Catalog. Your copy will be sent by return mail—free. Write for it now.

SEQUESTRENE is a powerful chelating agent for the alkaline earths and heavy metals, forming water soluble complexes of unusual stability. SEQUESTRENE will dissolve calcium oxalate and other sparingly soluble inorganic compounds, will keep iron dissolved in alkaline solution, deactivate trace metals.

SEQUESTRENE is a new chemical tool offering the research worker in the chemical and biological sciences still unexplored opportunities for investigating and controlling inorganic cation effects.

SEQUESTRENE has already proven useful as a preservative for whole blood and platelets... in treatment of renal lithiasis, metal poisoning, capillary damage, hypertension... in purification of proteins and other biological materials... in deactivating or activating enzyme systems... in formulation of plant nutrient solutions and treatment of iron deficiencies in agricultural crops... as a decontaminant for radioactive metals... as an analytical reagent for trace minerals... as a component of bacterial culture media... as a stabilizer for metal sensitive materials such as rubber latex, food products, ascorbic acid, hydrazine, peroxide, mercaptans... and in flotation, mineral separations, detergents, chemical synthesis, metallurgy and photography.

WIDE BAND LABORATORY OSCILLOSCOPE

9 NEW AND SPECIAL FEATURES

1. Full 4" vertical deflection without overload.
2. Vertical amplifier NOT overcompensated. Overshoot kept to a minimum.
3. Rectangular light shield permits viewing of the EFFECTIVE cathode ray tube area 4" vertically and 41/2" horizontally.
4. Special slotted design of above shield permits easy removal of graduated scale.
5. Continuously variable gain controls.
7. Cathode ray tube provided with Mu-Metal shield for protection against external magnetic fields.
8. Vertical gain control calibrated in peak to peak volts.
9. Unusual chassis layout for maximum wiring efficiency and lowest interconnection between H and V circuits.

VERTICAL AMPLIFIER

- SENSITIVITY—20 millivolts per inch of deflection.
- FREQUENCY RESPONSE (SINE WAVE)—20 cycles to 5 megacycles Down 3 dB at 5 mc.
- SQUARE WAVE RESPONSE—Excellent duplication of all square waves between 50 cycles and 1 megacycle. Maximum shift of 50 cycle square wave is 5%.
- MAXIMUM INPUT POTENTIAL—1000 volts peak to peak.
- INPUT ATTENUATOR—X1-X10-X100 positions. X1 position useful up to 10 volts peak to peak. Input attenuator is frequency compensated.
- CALIBRATED GAIN CONTROL—Vertical amplifier gain is continuously variable by means of calibrated vertical gain control. Gain control is calibrated on peak to peak volts. Special circuit minimizes effect of gain control setting on frequency response.
- INPUT IMPEDANCE—X1 position, 3.5 megohms—55 mmd. X10 position, 1 megohm—27 mmd. X100 position, 1 megohm—25 mmd.

HORIZONTAL AMPLIFIER

- SENSITIVITY—0.3 volts RMS per inch of deflection.
- FREQUENCY RESPONSE—(SINE WAVE)—flat to 300 KC.
- FREQUENCY RANGE—10 cycles to 150 kilocycles in 6 steps.
- LINEARITY—Excellent linearity over entire range.

"Z" AXIS MODULATION

Provision for external intensity modulation and external retrace blanking. Internal retrace blanking circuit incorporated.

CALIBRATED TEST SIGNAL

Built in 2 volt calibrated test signal source is brought out to front panel binding post.

Cat. No. 104000 The Deluxe Wide Band Laboratory Oscilloscope has a compact cabinet of steel gray hammer-tone 101/2" wide by 133/4" high by 151/2" deep and weighs approximately 35 lbs. Finely perforated parts are provided for adequate ventilation. The markings on the etched aluminum panel are in white to contrast with the dark gray background which minimizes glare.

Price Each $249.00

Obtain instrument-like scales on YOUR Kymograph charts

Trace an improved time scale on your kymograph charts with the FRANZ KYMO TIMER

Mount it on any laboratory stand—plug into any A.C. 110 volt 60 cycle circuit

Operate your kymograph at ANY speed. You will always mark a time scale of instrument quality and of the finest readable divisions with your FRANZ KYMO TIMER. Two scales are traced simultaneously, the upper recording in 1/2 second and one-second intervals, the lower recording in 10 second and one minute intervals. It automatically expands or contracts its scale to match the kymograph speed. No adjustments required over the entire range.

Price, complete in carrying case—Soot-writing type $24.00 Ink-writing type $20.00

SCIENCE, Vol. 116
Although the direct-writing Viso-Cardiette was introduced, and completely accepted, as a clinical electrocardiograph, the eyes of other fields—research, for example—were soon turned to the surplus of its clinical recording characteristics, and the wide range of its potentialities. Research had been asking also for an instrument that would record more than one phenomena simultaneously, and do so via the same basic design advantages of the then already popular Viso-Cardiette. In answer, Sanborn engineers multiplied the Viso-Cardiette by four, so to speak, and came up with the four-channel Poly-Viso Cardiette—soon to follow it, in the same manner, with the two-channel Twin-Viso Cardiette.

There were also those who wanted a less elaborate instrument than the Viso in that they had no need for 'cardiography, but desired all the recording advantages of a one-channel system. And so, the lower cost Viso-Recorder was designed.

Nor was this imposing array of Sanborn recording systems long to go unrecognized in the field of Industry where many recording problems are now being solved "the Viso way."

Taken as a common denominator of all the various Viso models in use today (both medical and industrial), one-channel Sanborn systems now total nearly 20,000.

Yes, the Viso-Cardiette really started something!

Further information and descriptive literature on the Viso-Cardiette, or Sanborn one-, two-, or four-channel recording systems will gladly be sent on request.

APPLICATION FOR HOTEL RESERVATIONS
119th AAAS MEETING
St. Louis, Mo., December 26-31, 1952

The list of hotels and their rates and the reservation coupon below are for your convenience in making your hotel room reservation in St. Louis. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in St. Louis and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Share a room with a colleague if you wish to keep down expenses. Mail your application now to secure your first choice of desired accommodations. All requests for reservations must give a definite date and estimated hour of arrival, as well as date and approximate hour of departure.

TYPICAL NBCo. PRODUCTS

AMINO ACIDS
A complete selection of more than 90 amino acids of maximum purity. Including natural L - synthetic DL and resolved L and D amino acids.

NUCLEOPROTEINS - PURINES PYRIMIDINES
Adenosine Triphosphate • Adenine • Adenylic Acid • Cozymase • Cytidine • Cytidylic Acid • Cytosine • Desoxyribonucleic Acid • Fructose and Glucose Phosphates • Glutathione • Guanine and Salts • Guanylic Acid • Hypoxanthine • Inosine • Nucleates • Ribose Nucleic Acid • Desoxyribonucleic Acid • Ribose • Protamine • Thymine Uracil • Uridine • Uridylic Acid • Xanthine • Xanthosine.

"VITAMIN FREE" CASEIN  
(Hot Alcohol Extracted)
A valuable source of protein nitrogen of exceptional purity for incorporation into diets to produce vitamin deficiencies.

MISCELLANEOUS BIOCHEMICALS
Alpha Keto Glutaric Acid • Cytochrome C • Glutamine • Dopa • Glycogen • Heparin • Lyssozyme • Crystalline Vitamins • Crystalline Carbohydrates • Fatty Acids • Growth Factor Analogs • Enzymes • Biological Test Diets • Alkaloids.
