The lady is stripping an emulsion 5μ thick

It's the new Kodak Autoradiographic Permeable Base Stripping Film (Experimental). With an emulsion only 5 microns thick, it has the high resolution and sensitivity to radionuclides you need for microscopic study.

For support, this exceptionally thin emulsion is coated on a film of plain gelatin also 5μ thick, and mounted on a temporary film base. The emulsion is easily stripped off and floated onto a slide-mounted histological specimen. It is available 35mm wide, unperforated, and spooled in 5-foot lengths.

Processing solutions permeate the photographically inert gelatin like emulsion, but, since it takes on no density, it cannot contribute to the overlapping of densities from active sites.

Whether your interest lies in recording nuclear emanations, capturing the eruption of a nova, or in one of the hundreds of other ways in which photography is serving the world of science, Kodak makes the photographic materials you need. If you will let us know your requirements, we shall be glad to make a recommendation. Eastman Kodak Company, Industrial Photographic Division, Rochester 4, N. Y.

AUTORADIOGRAPHY
...a scientific function of photography
This year has seen progress in many branches of science and technology. Vital new links have been forged in the chain of Study—Research—Development—Production. The House of Wiley has been privileged to share in the documentation of this progress by publishing the work of outstanding scholars and scientists. For over a century Wiley technical books have enriched scientific literature.

Highlights of 1952 . . .

A STUDY of ANTIMETABOLITES by D. W. WOOLLEY. 269 pages. $5.00.

THEORETICAL PETROLOGY by TOM F. W. BARTH. 387 pages. $6.50.

UNDERSTANDING HEREDITY: An Introduction to Genetics by RICHARD B. GOLD-SCHMIDT. 228 pages. $3.75.

PRINCIPLES of GEOCHEMISTRY by BRIAN MASON. 276 pages. $5.00.

Dana's MANUAL of MINERALOGY 16th Edition revised by CORNELIUS S. HURLBUT, Jr. 530 pages. $6.00.

COLOR in BUSINESS, SCIENCE, and INDUSTRY by DEANE B. JUDD. 401 pages. $6.50.

ULTRAVIOLET RADIATION by LEWIS R. KOLLER. 270 pages. $6.50.

ELEMENTARY ANALYSIS by KENNETH O. MAY. 635 pages. $5.00.

BIOCHEMICAL PREPARATIONS, Volume 2 Editor-in-Chief, ERIC G. BALL. 109 pages. $3.00.

THEORETICAL NUCLEAR PHYSICS by JOHN M. BLATT and VICTOR F. WEISSKOPF. 864 pages. $12.50.

INSECT PHYSIOLOGY Edited by KENNETH D. ROEDER. In press.

SOIL MICROBIOLOGY by SELMAN A. WAKSMAN. 356 pages. $6.00.

INTRODUCTION to the FOUNDATIONS of MATHEMATICS by RAYMOND L. WILDER. 305 pages. $5.75.

EUROPE 2nd Edition by SAMUEL VAN VALKENBURG and COLBERT C. HELD. 826 pages. $7.50.

Announcing ten 1953 publications

CYTOCHEMISTRY: A Critical Approach
By J. F. DANIELLI, Kings College, University of London. The first full-scale attempt to apply the rigorous standards of chemistry and physics to cellular analysis. It is, in essence, a manual of principles for the development of new cytochemical techniques—a manual which examines the validity of the interpretations currently placed on cytochemical data. The latest addition to The Wiley Biological Research Series. Ready in January. 137 pages. In press.

PLANT ANATOMY
By KATHERINE ESAU, University of California. The first new book on the subject in several years, Plant Anatomy emphasizes the developmental aspects of plant study, making mature structures understandable by considering their early formation. The material presented is based on extensive original observations and critical review of the literature. Ready in January. Approx. 752 pages. Prob. $9.00.

GENERAL BIOCHEMISTRY
By JOSEPH S. FRUTON and SOFIA SIMMONDS, both at Yale University. In this modern treatment of the subject, attention is given to the fundamental principles of biochemistry. The factual material which underlies these principles is drawn from studies with plants and microorganisms, as well as animals. Emphasis is placed on the central place of proteins and enzymes in the chemical activity of living matter. The intermediate metabolism of carbohydrates, fats, and proteins is discussed in terms of recent tracer studies. Ready in April. Approx. 950 pages. Prob. $10.00.

EXPERIMENTAL NUCLEAR PHYSICS, Volumes I and II
Edited by EMILIO SEGRÈ, University of California. Written by a veritable Who’s Who in Nuclear Physics and patterned after the classic German handbooks, these first two volumes of the series are designed to present modern experimental techniques, truly significant facts and data, and the broad lines of present-day theoretical interpretation. Volume I—Ready in March. Approx. 776 pages. Prob. $14.00. Volume II—Ready in April. Approx. 470 pages. Prob. $9.00.

AFRICA: A Study in Tropical Development
By L. DUDLEY STAMP, University of London, and President, International Geographical Union. This new, lavishly illustrated book provides an excellent basis for the study of this still largely unknown continent. It attempts to survey: the natural resources and problems in their development; the people and the different political units; achievements to date; reasons for the success of such projects as the Sudan irrigation and for the failure of the East Africa peanut project; and the conflict between tribal organization and modern democratic ideals. Ready in March. Approx. 548 pages. Prob. $8.50.

Place your order for on-approval copies now

           --------------------------------------------------
JOHN WILEY & SONS, Inc.
for study, classroom and reference

The HUMAN SENSES

By FRANK A. GELDARD, University of Virginia. The first complete descriptive account, from a psychophysiological point of view, of man's senses. The book not only orients the reader with respect to the place of sensation in psychological and physiological knowledge but stresses also its importance in modern engineering psychology and recent human engineering developments. Copious illustrations and novel chapters on the cutaneous senses are special features. Ready in February. Approx. 348 pages. Prob. $5.00.

An INTRODUCTION to STATISTICS

By CHARLES E. CLARK, Emory University. Emphasizing statistical inference, this book provides a thorough, elementary exposition of essential statistics, which can be understood with little previous knowledge. The topics covered are those which are useful to a social or natural scientist who must make the statistical inferences commonly employed in science and industry. Ready in March. Approx. 270 pages. Prob. $4.25.

PRINCIPLES of COLOR PHOTOGRAPHY

By RALPH M. EVANS, W. LYLE BREWER, and WESLEY T. HANSON, JR., all with Eastman Kodak Company. Provides a substantial basis for understanding the whole problem of color photography. Among the highlights: a section on vision, stressing psychological aspects of color; a section on sensitometry; an analysis and description of methods of obtaining colorant images and combining them to obtain color processes; and a comprehensive review of photographic reproduction theory. Ready in March. Approx. 684 pages. Prob. $10.00.

Volumes III and IV of GILMAN's
ORGANIC CHEMISTRY: An Advanced Treatise

Edited by HENRY GILMAN, Iowa State College, and a Staff of Specialists. Based on a world-wide survey of those branches of organic chemistry which have not been previously covered, Volumes III and IV contain material that is entirely new. The range is from the most fundamental theoretical aspects of organic chemistry (as Bartlett's "The Study of Organic Reaction Mechanisms"), to modern aspects of chemotherapy and antibiotics. There are chapters on relatively new and active fields like Hanford and Sargent's "Reactions of Organic Gases Under Pressure". Both volumes in preparation.

ELEMENTS of CARTOGRAPHY

By ARTHUR H. ROBINSON, University of Wisconsin. This book is aimed at medium- and small-scale map making and approaches the subject from the point of view of practical application. Projections are treated for their selection and utility rather than their mathematical characteristics. Distortion is illustrated on each projection and full instructions for their construction are included. Among the important topics treated: map design; principles and practices of lettering on maps; and statistical map representation. Ready in March. Approx. 262 pages. Prob. $7.00.

December 5, 1952
AN INTRODUCTION TO Modern Thermodynamical Principles

By A. R. UBBELOHDE. The second edition of this standard work includes the newest developments in such fields as melting, rubber-like solids, molecules of high molecular weight, and the formal thermodynamics of continuous phase transitions. A new chapter illustrates applied calculations of thermodynamic functions in cases of current importance. Illustrated. $4.25

Mixtures
The Theory of Equilibrium Properties of Some Simple Classes of Mixtures, Solutions and Alloys

By E. A. GUGGENHEIM. The theory of gaseous, liquid, and solid solutions is described by simple models and approximations which lead to closed formulas by means of elementary mathematics. The models cannot conform to real solutions, but they prove useful bases of comparison with actually existing solutions. Illustrated. $8.50

Modern Cosmology and the Christian Idea of God

By EDWARD A. MILNE. "... a handsome exposition, well argued, fresh from the pen (Milne died within a few days of writing it) and full of good ideas."—Scientific American. $4.25

Announcing...
The Revised and Enlarged Edition of THE RIDDLE OF CANCER

by Dr. Charles Oberling translated by Dr. William Woglom

ONE-THIRD NEW MATERIAL on hormones, nutrition, and viruses has been added to this outstanding book by one of the world's leading authorities on cancer and cancer research. THE RIDDLE OF CANCER was first published in 1944 and in this new and up-to-date edition is of increased importance to doctors and laymen.

</table>
The publication of the first edition of this book inaugurated a new era in polarography. Numerous new fields of application were introduced, and a deeper understanding of the theoretical fundamentals led to a more critical approach to experimental results. The literary output of this “polarographic movement” resulted in a tripling of the published literature—the current rate of growth exceeds 200 journal articles per year. It needed the superior guidance of I. M. Kolthoff and James J. Lingane, aided by Stanley Wawzonek in the field of organic polarography, to present again the wealth of material in a well-organized and integrated unit.

Polarography will thus remain the definitive treatise for every one who must use this type of measurement in scientific and industrial investigations.
Encyclopedia of Chemical Technology
Complete in 14 volumes. Edited by Raymond E. Kirk and Donald F. Othmer.
Volume VIII: Ion Exchange to Metal Plating
Volume IX: Metal Surface Treatment to Penicillin
Subscription price $30.00 per volume.

Pulp and Paper: Chemistry and Chemical Technology
Complete in two volumes. By James P. Casey.
Volume I: Pulping and Papermaking
1952. 819 pages, 100 illus., 89 tables. $16.00
Volume II: Properties of Paper and Converting
1952. 622 pages, 86 illus., 76 tables. $15.00

Ink and Paper in the Printing Process
By Andries Voet. 1952. 220 pages, 79 illus., 19 tables. $5.90

Treatise on Powder Metallurgy
By Claus G. Goetzel.
Volume III: Classified and Annotated Bibliography
1952. 925 pages. $22.00
Also Available:
Volume I: Technology of Metal Powders and Their Products
1949. 6 x 9. 806 pages, 300 illus., 82 tables. $18.00
Volume II: Applied and Physical Powder Metallurgy
1950. 6 x 9. 328 pages, 327 illus., 200 tables. $18.00

Copolymerization
By Turner Alfrey, Jr., John J. Bohrer, and H. Mark. 1952. 279 pages, 77 illus., 41 tables. $6.80

The Yeasts: A Taxonomic Study
By J. Lodder and N. W. J. Kreger-Van Rij. 1952. 6 x 9. 670 pages, 270 illus. $19.80

Molecular Theory of Fluids
By H. S. Green. 1953. 6 x 9. 250 pages, 12 illus. $5.75

Deformation and Flow in Biological Systems
Edited by A. Frey-Wyssling. 1952. 6 x 9. 560 pages, 100 illus. $11.50

Crime Investigation
By Paul L. Kirk, Professor of Biochemistry and Criminalistics, University of California, Berkeley, California. Ready February 1953.

Thiophene and Its Derivatives
By H. D. Hartough. With special chapters by F. P. Hochgesang and F. F. Blicke. 1952. 6 x 9. 630 pages, 27 illus., 107 tables. $16.50 (subscription price $15.00)

Five-Membered Heterocyclic Compounds with Nitrogen and Sulfur or Nitrogen, Sulfur, and Oxygen (except Thiazole)
By L. L. Bambas. 1952. 6 x 9. 415 pages, 4 illus., 72 tables. $14.00 (subscription price $12.60)

Synthetic Methods of Organic Chemistry
Volume VI. By W. Theilheimer. 1952. 6 x 9. 412 pages, over 900 reactions. $12.90

Kartothen der Thiazolverbindungen
A File of All Thiazole Compounds
By Bernhard Prijs. 1951. 1,532 pages, in 4 ring binders. $42.40

Medicinal Chemistry—Chemistry, Biochemistry, Therapeutic and Pharmacological Action of Natural and Synthetic Drugs. By Alfred Burger. Volume I: 1951. 595 pages, 15 illus., 58 tables. $10.00
Volume II: 1952. 522 pages, 26 illus., 60 tables. $10.00

Progress in Allergy—Volume III
Edited by Paul Kallos. 1952. 6 x 9. 572 pages, 89 illus., 64 tables. $16.50

Progress in Cosmic Ray Physics
Edited by J. G. Wilson. 1952. 6 x 9. 560 pages, 200 illus., 20 plates. $18.00

Statistical Methods for Chemical Experimentation
(First volume in the new series, INTERSCIENCE MANUALS) By W. L. Gore, E. I. du Pont de Nemours & Company, Wilmington, Delaware. 1953. 4½ x 7. 224 pages, 20 illus., 47 tables. $3.50

Chemical Analysis of Industrial Solvents
By Morris B. Jacobs and Leopold Schefflan. 1953. 6 x 9. 454 pages, 46 illus., 43 tables. Approx. $10.00

two delightful albums of bird voices make a Xmas gift for year-long pleasure

American Bird Songs

RECORDED FOR THE ALBERT R. BRAND BIRD SONG FOUNDATION, LABORATORY OF ORNITHOLOGY AT CORNELL UNIVERSITY, BY DR. A. A. ALLEN AND DR. P. P. KELLOGG.

VOLUME ONE
The most familiar bird songs of America's woods, sea coasts, and prairies brought into your living room. Six 10-inch records on ruby vinylite, twelve sides. 78 r.p.m. only. Postpaid $8.50

VOLUME TWO
Fifty-one more bird songs are recorded in this album. Announcer identifies each songster. Five 12-inch records, ten sides, on ruby vinylite. 78 r.p.m. only. Postpaid $10.50

Also Florida Bird Songs
Ten southern birds recorded on a ten-inch vinylite record. 78 r.p.m. $2.50

To: COMSTOCK PUBLISHING ASSOCIATES
A division of Cornell University Press
124 Roberts Place, Ithaca, New York
Please send me the albums checked. ☐ American Bird Songs, Volume I ($8.50). ☐ American Bird Songs, Volume II ($10.50). My check or money order is enclosed.

MODEL SC-2L
MODEL SC-1M

Scintillation Counters

A NEW SCINTILLATION COUNTER, designed for stability, reliability and simplicity of operation, has a three hundred volt flat plate, can be connected by means of a single cable to commercial-type scalers and operated without re-adjustment or attention.

MODEL SC-2L has a 1½” x 2” permanently canned well-type NaI(Tl) crystal with 5/8 x 1½” well into which samples may be inserted for excellent geometry. A separate lead shield provides 2” of lead shielding extending 2” above and below the crystal.

MODEL SC-1M has a 1 x ½” permanently canned NaI(Tl) crystal with built-in lead shield and detachable lead collimator and is used for brain tumor location and other clinical applications.

SECOND ANNUAL REPORT ON STRESS-1952

by HANS SELYE
M.D., Ph.D. (Prague), D.Sc. (McGill), F.R.S.C.

Numerous Illustrations
Over 4,000 References

Price: $10.00
Plus 34¢ Postage

This latest supplement to Dr. Selye’s original monograph “Stress” reviews current world developments in ACTH, cortisone, 5TH, adaptation syndrome and allied fields.

An extensive classified index of pertinent facts on stress is combined with a textbook-like evaluation of the principal findings.

Other works by the same author:

“Stress” $14.00 + 48¢ Postage
“First Annual Report on Stress—1951” $10.00 + 34¢ Postage
“The Story of the Adaptation Syndrome” $4.50 + 15¢ Postage
“Textbook of Endocrinology” $13.50 + 44¢ Postage
“Ovarian Tumors” (2 Vols.) $22.75 + 86¢ Postage

5465 Decarie, Montreal
METHODS AND PRINCIPLES OF SYSTEMATIC ZOOLOGY

The purpose of this new text is to give concise presentation of the principles and methods of systematics, both in its purely practical aspects and in relation to evolutionary studies. The first part of the book deals with the subject according to historical development of taxonomic concepts. The second part is devoted to taxonomic procedure, and a final section discusses nomenclature under the headings: historical and philosophical basis, the principle of priority, the type method, etc.

THE PSYCHOLOGY OF LEARNING

A broad treatment of the psychology of learning, written from the point of view of the experimental psychologist and covering both human and animal learning. Emphasis is on experimental evidence rather than upon current theoretical "schools." Recent experimental literature is stressed, and post-war experimental work on such topics as punishment, retroactive inhibition, etc. is highlighted.

WEED CONTROL. New 3rd Edition

A thorough revision of this leading text, the third edition assembles and reviews critically the various methods of weed control. In addition the text treats the reproduction and dissemination of weeds, competition between crop plants and weeds, and association of weeds with soils and crops. Main emphasis is on practical weed-control methods, their uses and limitations. Recent advances are included.

SPANISH-ENGLISH CHEMICAL AND MEDICAL DICTIONARY. Comprising Terms Employed in Medicine, Biochemistry, Surgery, Dentistry, Veterinary, Biology, Pharmacy, Allied Sciences and Related Scientific Equipment
By Morris Goldberg. 609 pages, $17.50

Companion volume to the English-Spanish Chemical and Medical Dictionary published in 1947, this new dictionary includes thousands of hitherto unrecorded Spanish terms, English equivalents, and brief definitions. The successful condensation of highly technical matter and the defining of its terminology for correct and ready interpretation will be useful not only to students but to laymen in commercial fields as well.

McGRAW-HILL BOOK COMPANY, INC.
330 WEST 42 ND STREET, NEW YORK 36, N. Y.
For Your Reference Shelf

Diseases of Cereals and Grasses in North America
Roderick Sprague, The State College of Washington

Summarizes all basic facts on the morphology of fungi causing leafspot, blights, ergots, scalds, and root rots in members of the grass family, including cereals and sugar cane. Presents data on 384 species and sub-categories; numerous associated saprophytes. 81 illus., 528 pages. $8.00

THE SMUT FUNGI
A Guide to the Literature, with Bibliography
George W. Fischer, The State College of Washington

Time-saving reference book providing an accurate guide and introduction to the literature on the biology and control of 330 species of smut fungi and the diseases they cause. 117-page bibliography represents over 3000 scientific papers, bulletins, and books. 387 pages. $8.50

EMBRYOLOGY OF THE VIVIPAROUS INSECTS
Harold R. Hagan, The College of the City of New York

A pioneer monograph designed for professional workers. Presents a comprehensive bibliography of earlier papers on viviparity; historical introductions to each species or group. Contains previously unpublished research on maternal and fetal adjustments. Awarded an A. C. Cressy Morrison Prize. 160 illus., 472 pages. $6.50

FOREST INVENTORY
Stephen H. Spurr, University of Minnesota

Detailed analysis of modern theory and methods of forest mensuration. Discusses simpler, more accurate ways to correlate forest volume and growth with measurements made on aerial photographs and on the ground. Guidance on estimation of volume of individual trees, stand volume, stand growth, etc. 12 tables, 36 illus., 476 pages. $8.50

FOREST MANAGEMENT
Arthur B. Recknagel, St. Regis Paper Company
Donald D. Stevenson, U. S. Dept. of Agriculture

Up-to-date information on successful forest management plans and practices. Stressing American techniques, it thoroughly covers organization for management; problems of regulation; business considerations, etc. Includes typical management plans for various sized forests. 37 tables, 19 illus. $6.00

IMPORTANT TEXTBOOKS

ZOONOLOGY
By Alfred M. Elliott. Fashioned around the central theme of organic evolution, to which all lesser principles are related, this clearly written text traces the evolutionary sequence from one-celled animals to the complexity of man, concentrating on the broad biological concepts and avoiding encyclopedic listing of minor details. Illustrated. $6.00

FOUNDATIONS of BIOLOGY: A LABORATORY HANDBOOK
By G. W. Rollins and Helen V. Crouse. Although primarily written for use with Moment's General Biology, the flexibility of this handbook's 40 independent units makes it adaptable for any other standard biology text. Experiments range from famous classics to newer areas in 20th Century advancements. Illustrated, 288 pages.

GEOGRAPHY of EUROPE

LABORATORY MANUAL for GEOLOGY
By Kirtley F. Mather, Chalmer J. Roy and Lincoln R. Thiesmeyer
Part I: Physical Geology
Part II: Historical Geology
Illustrated 252 pages Price, $2.75

PSYCHOLOGICAL STUDIES of HUMAN DEVELOPMENT
By Raymond G. Kuhlen and George G. Thompson
Illustrated paper bound Price, $3.50

PERSONS and PERSONALITY
By sisters Annette Walters and Kevin O'Hara
Large 8vo about 729 pp. Illustrated.

Appleton · Century · Crofts
35 West 32nd St. New York 1
INTRODUCTION TO THE PHILOSOPHY OF SCIENCE
By Stephen Toulmin, Oxford University. The place of logic in scientific description, hypotheses, theories, and laws, and the help logic can give in achieving clearer statements and more rigorous thinking. Hutchinson's University Library. About 175 pages. 9 figures. Ready, Jan. 1953. $1.80 (Trade, $2.25).

THE HIGHER ARITHMETIC
By H. Davenport, University of London and formerly Visiting Professor in Stanford University. An introduction to the theory of numbers, covering factorization and the primes, congruences, quadratic residues, continued fractions, sums of squares, quadratic forms, and diophantine equations. Hutchinson's University Library. 172 pages. Nov. 1952. $1.80 (Trade, $2.25).

CARTESIAN AND PROJECTIVE GEOMETRY
By R. Walker. A pure and analytical treatment which seeks to make the subject a natural development from the student's knowledge of Euclidean geometry. About 320 pages. 164 figures. Ready, Dec. 1952. $4.00.

PHYSICAL SIMILARITY AND DIMENSIONAL ANALYSIS
By W. J. Duncan, University of Glasgow. The principles governing the general quantitative, geometrical and other relations between two similar physical systems. About 170 pages. 8 figures. Ready, Jan. 1953. About $5.75.

APPLICATION FOR HOTEL RESERVATIONS

119th AAAS MEETING

St. Louis, Mo., December 26-31, 1952

The list of hotels and their rates and the reservation coupon below are for your convenience in making your hotel room reservation in St. Louis. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in St. Louis and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Share a room with a colleague if you wish to keep down expenses. Mail your application now to secure your first choice of desired accommodations. All requests for reservations must give a definite date and estimated hour of arrival, as well as date and approximate hour of departure.

Mail this now to the Housing Bureau. Rooms will be assigned and confirmed in order of receipt of reservation.
Ferroelectricity
By EDWIN T. JAYNES

Ferroelectricity, a relatively new subject in physics, is treated here with special emphasis on theories of BaTiO₃. As the first book on the subject, this introduction includes a useful guide to the literature. The study inaugurates a new series entitled “Investigations in Physics.” Mr. Jaynes is at the Microwave Laboratory of Stanford University.
144 pages, planographed, paper, $2.00

Symmetry
By HERMANN WEYL

author of Philosophy of Mathematics and Natural Science.

Displaying the great variety of applications of the principle of symmetry in the arts and in nature, this book demonstrates its philosophic and mathematical significance. Numerous illustrations, making this a handsome book, are taken from many fields of art and science.

$3.75

“This short book on a vast subject is the work of a master.”—Science.

SCHOTT-JENA
Bacteria Fritted Glass Filters and Slit-Sieve Funnels
(Buechner Type)

Filters are made of Schott G-20 glass, highly resistant to acid and alkali. Filter discs are tested by a new and improved method, assuring uniform pore measurement. Are free from antigenic substances. Do not alter pH of solution filtered. Loss of solution filtered is very small. In crucible and funnel form. Available in 3 groups: G(3 to 1.7 microns), M(1.7 to 1 micron), F(under 1 micron). Slit-sieve funnels have narrow elongated slit holes. Made of Schott G-20 glass, having high thermal durability and extreme resistance to acids and alkalis. Being transparent, any residue within funnel can readily be seen. Permits quick filtration. Plain surface prevents tearing of filter paper. Easily cleaned.

At laboratory suppliers, or from us.

Advances in GEOPHYSICS

Edited by H. E. Landsberg
Geophysics Research Directorate, Air Force Cambridge Research Center

VOLUME I, November 1952, xii, 362 pages, illustrated, $7.80

RAPIDLY accumulating new knowledge in the geophysical sciences has prompted the organization of this series. Advances in Geophysics will consist of monographic treatises that summarize, from time to time, progress made in recent years. In the first volume, particular attention is given to problems evaluating geophysical data; special knowledge is summarized and the way is pointed to new phases which need to be investigated. Subsequent volumes of the series will deal with investigations in hydrology, seismology, volcanology, and tectonophysics.

Primarily, the volumes are designed to serve geophysicists and meteorologists who desire to keep abreast of research results on all topics and who wish to familiarize themselves with specialized aspects in the various subfields.

CONTENTS:

Automatic Processing of Geophysical Data
By John C. Bellamy, Cook Research Laboratories, Chicago, Illinois

Some New Statistical Techniques in Geophysics
By Arnold Court, University of California, Berkeley

Studies of the General Circulation of the Atmosphere
By Bert Bolin, University of Stockholm, Sweden

Exploration of the Upper Atmosphere by Meteoritic Techniques
By Fred L. Whipple, Harvard University, Cambridge, Massachusetts

Unsolved Problems in Physics of the High Atmosphere
By N. C. Gerson, Geophysics Research Directorate, Air Force Cambridge Research Center, Cambridge, Massachusetts

Estuarine Hydrography
By D. W. Pritchard, Johns Hopkins University, Baltimore, Maryland

The Earth's Gravitational Field and Its Exploitation
By George Prior Woollard, University of Wisconsin, Madison

Aeromagnetic Surveying

PERSONNEL PLACEMENT

YOUR ad here reaches over 32,000 foremost scientists in the leading educational institutions, industrial laboratories, and research foundations in the U. S. and 76 foreign countries—at a very low cost

CLASSIFIED: $5 per word, minimum charge $3.60. Use of Box Number counts as 10 additional words.

DISPLAY: Rates listed below—no charge for Box Number. Monthly invoices will be sent on a charge account basis—providing satisfactory credit is established.

Single Insertion $19.50 per inch
7 times in 1 year 17.50 per inch
13 times in 1 year 16.00 per inch
26 times in 1 year 14.00 per inch
52 times in 1 year 12.50 per inch

For PROOFS on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of every week).

POSITIONS WANTED

Bacteriologist—Ph.D. 38. Medical teaching, industrial, antibiotic, administrative experience. Desires academic or commercial research. Box 333, SCIENCE.

Immunologist—bacteriologist. Ph.D., 15 years research experience, 8 years in charge of RH center for wide area, many publications, international reputation, desires research or teaching-research position. Box 344, SCIENCE.

Position Wanted: Biochemist; B.S. (Major: Chemistry; Minor: Physics); M.S. (Major: Food Technology; Minor: Bacteriology); three years' university teaching (Food Technology); five years' industrial research. For further information, please write Science Division, Medical Bureau (Burnice Larson, Director) Palmolive Building, Chicago.

AVOID DELAY . . . . Cash in Advance payment Must be enclosed with ALL classified ads. See "Charges and Requirements"

POSITIONS OPEN

Graduate research assistantships available in physics. Study for advanced degrees. Stipend $1,500 per year. Write to Chairman, Physics Department, Florida State University, Tallahassee, Florida. 12/5, 12, 19.

Bacteriologist—B.S. or M.S. To participate in research on new fungicides and bactericides in well-established industrial organization in metropolitan New Jersey. Salary $3,600 to $5,000. Send complete resume and photograph. Box 335, SCIENCE.

Position Open: Analytical and Physical Chemist. Male, M.A. or Ph.D. to teach beginning Fall 1953. Write the President, Hampden-Sydney College, Hampden-Sydney, Virginia.

Positions Open: (a) Director of Research: Physician with administrative ability, background in pharmacology; one of major pharmaceutical companies. (b) Biochemist interested cancer research, teaching; medical school; South. (c) Pharmacologist; full-time teaching; research; graduate school program; rank dependent qualifications; $6-$8000. (d) Biochemist—Physiologist; preferably Ph.D.; research involving study new organic chemicals; duties include serving as consultant in biochemistry, physiology, pharmacology; large teaching hospital; East: $4,700-$7,500. (e) Technologist with specific training in nucleonic instrumentation; research appointment in industry. (f) Biochemist M.S. or Ph.D.; general 300-bed hospital; university center, Midwest: $6,000. S1-1 Science Division, Medical Bureau (Burnice Larson, Director) Palmolive Building, Chicago.

LOOK AROUND . . . notice the increasing number of satisfied advertisers using small-space ads regularly in practically every issue of SCIENCE—proof that these small ads get results! If you have a product or service of interest to scientists, why not take advantage of this low-cost means of increasing your cresting your profits!

TABLES OF ELECTRIC DIPOLE MOMENTS

Compiled by L. G. Wesson
Laboratory for Insulation Research
Massachusetts Institute of Technology

The electric dipole moments of more than 2,500 compounds are here assembled in compact form, having been collected from the physical and chemical literature of many countries through early 1948. Since the postulation of its existence by Debye in 1912, this molecular constant has become of great importance to all fields of science.

The Rickettsial Diseases of Man

This symposium volume is a comprehensive survey of the general field of Rickettsial diseases in man. Among the contributors appear the names of many of the foremost American authorities on this important and relatively new field of medicine.

The first group of papers includes discussions of the taxonomy, biology, isolation, and identification of vectors and reservoirs of infection of the Rickettsial diseases of man. The second group of papers is devoted to discussions of serological reactions, the Weil-Felix reaction, the complement-fixation and agglutination reactions, and the preparation and standardization of Rickettsial vaccines. The final group of papers treats of insecticides, methods of their application, and mite controls.

Many of the 27 contributors to this volume during World War II were on the battle fronts in Africa, Italy, France and Germany, protecting our troops and the local populations wherever Rickettsial diseases prevailed. Rarely, if ever, have the authors of a medical book had so wide and so successful practical experience in the very subjects on which they have written.

To: A.A.A.S. Publications
1515 Massachusetts Avenue, N.W., Washington 5, D. C.

Please accept my order for one copy of The Rickettsial Diseases of Man (7½ x 10½, cloth bound). My check in correct payment is enclosed ($5.25 to A.A.A.S. members, $6.25 to those who are not members; including postage.)

54  SCIENCE, Vol. 116
The value of the Papanicolaou technique lies not only in early diagnosis of cervical and uterine cancer, but as a criterion against which newer experimental methods may be tested. Mellors, Keane and Papanicolaou, selecting their material according to Papanicolaou's staining method and morphological analysis found a significant increase in the nucleic acid content of squamous cancer cell nuclei over normal nuclei.

Ortho's Papanicolaou staining preparations give the sharp nuclear and cytoplasmic definition required for accurate cytologic diagnosis.

ORTHO® offers the following Papanicolaou stains:
- EA 50, 100 cc. and 450 cc. bottles
- EA 65, 100 cc. bottles
- OG 6, 100 cc. and 450 cc. bottles
- Harris Hematoxylin (Ortho modification) 100 cc. and 473 cc. bottles
- Vaginal Pipettes and Aspirator Bulbs.

Ortho Pharmaceutical Corporation • Raritan, New Jersey
PROBLEM: When is water safe to drink?

PROBLEM: Why some bright children fail in school

ANSWER: When is water safe to drink?

ANSWER: Why some bright children fail in school

ANSWER: Are there harmful bacteria in the water you drink? Local health authorities have to know. Most cities give their water supply daily microscope tests. A microscope specially designed for the job by AO helps determine the exact nature and quantity of the bacteria or other organisms in a sample of drinking water...assists in keeping impurities under control.

ANSWER: To shoot at an enemy you can't see

ANSWER: Most youngsters who fail are poor readers. To enable doctors and educators to study eye movements and how they affect reading skills, AO scientists developed the Ophthalmograph. It provides a permanent record of eye movements so rapid they can't ordinarily be measured. Such information is used to diagnose and treat people who need visual training and reading instruction.
