EXPERIMENTAL NUCLEAR PHYSICS, Volume II
Edited by Emilio Segré, University of California. The second book in the three-volume work which records the advances in experimental techniques, points out significant facts and data, and indicates the lines of theoretical interpretation. Volume II includes: A Survey of Nuclear Reactions by Philip Morrison of Cornell University, and The Neutron by Bernard Feld of the Massachusetts Institute of Technology. August, 1953. 600 pages. Prob. $9.00.

NOTE: Volume I of EXPERIMENTAL NUCLEAR PHYSICS also edited by Emilio Segré, was published earlier this year. 789 pages. $15.00.

RADIATIONS AND LIVING CELLS
By Frederick Gordon Spear, Strange-ways Research Laboratories, Cambridge. Here is the first attempt to give—from the experimental angle—a concise account of the effects of penetrating radiation on normal and diseased tissues in man. Spear shows how information on this kind of biological reactions is being acquired and describes a few of the experimental methods that are in use for increasing knowledge in this field. Each section begins with a short description of an unirradiated tissue for comparison with changes brought about by exposure to penetrating rays. 1953. 222 pages. $3.50.

New Methuen Monographs . . .
SOCIAL BEHAVIOR IN ANIMALS WITH SPECIAL REFERENCE TO VERTEBRATES by N. Tinbergen, University of Oxford. 1953. 150 pages. $2.50.
THE BILE PIGMENTS by C. H. Gray, University of London. 1953. 143 pages. $1.75.
PHYSICAL FORMULAE by T. S. E. Thomas, B.Sc., Ph.D. 1953. 118 pages. $2.00.

Send for copies on approval.

Extremely Accurate Temperature Control at any Point between 38°C and 260°C.

The Castle Heavy-Duty Hot-Air Sterilizer is made of lifetime stainless steel with heavy insulation. A circulating fan provides full circulation of air... eliminates "hot" and "cold" spots... insures uniformity of 4°C.

This Super-Standard Castle Sterilizer is electrically heated... is designed and built for constant, extra heavy work in the laboratory. Exceptional accuracy of control enables you to use this sterilizer also as a drying oven.

For complete information write: Wilmot Castle Co., 1212 University Ave., Rochester 7, N.Y.

Accurate dial type thermometer provided.

PHOTOVOLT Densitometer for CHROMATOGRAPHY

A photoelectric precision instrument for the rapid and convenient evaluation of strips and sheets in filter paper chromatography and paper electrophoresis.

Single Insertion $19.50 per inch
7 times in 1 year 17.50 per inch
13 times in 1 year 16.00 per inch
26 times in 1 year 14.00 per inch
52 times in 1 year 12.50 per inch

For PROOFS on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of every week).

POSIIONS WANTED

Biochemist and toxicologist; Ph.D. (Chemistry, Physiological chemistry, Toxicology); four years' university teaching; five years, biochemist and assistant laboratory director, large hospital. For further information, please write Science Division, Medical Bureau (Burneice Larson, Director) Palmolive Building, Chicago. X

Physiologist; Ph.D. Seeks responsible teaching or research position. Competent. Biophysical, mammalian and clinical experience. Substantial publications. Box 157, SCIENCE.

Zoologist; M.A. fifteen years college teaching experience (Embryology, Histology, Anatomy, Zoology and General Botany). Available September. Box 135, SCIENCE.

POSIIONS OPEN

(1) Pharmacologist, Ph.D. or M.D. for basic research in developing new drugs. Broad educational background or experience preferable. Training in pharmacodynamics essential. Experience or capacity for directing group research activities required. Send complete resume to Personnel Office, The Norwich Pharmaceutical Company, 17 Eaton Avenue, Norwich, N. Y.

(2) Microbiologist—Exceptional position for man or career woman well trained and experienced in identification of microorganisms, particularly bacteria and fungi encountered in industrial microorganism control. Write fully and send recent photograph. Box 116, SCIENCE.

of the General Program-Directory
of the Boston Meeting of the AAAS
By first class mail – early in December

The General Program-Directory of the 120th Meeting of the AAAS in Boston, December 26–31, 1953, will be available to anyone, at cost, within the first week in December—whether he can attend the Meeting or not. You will want the General Program-Directory for your reference shelf.

Advance Registration
Advance registration has these decided advantages: 1) You avoid delay at Registration Desks upon arrival; 2) You receive the General Program-Directory in ample time, unhurriedly, to decide among events and sessions you particularly wish to attend; 3) Your name is posted in the Visible Directory as the Meeting opens.

The following coupon may be used both by advance registrants and by those who wish only the advance copy of the General Program-Directory.

--- THIS IS YOUR COUPON FOR AN ADVANCE COPY OF THE GENERAL PROGRAM-DIRECTORY ---

1a. □ Enclosed is $2.50 for my advance Registration Fee which brings me the Program-Directory, Convention Badge, and all privileges of the Meeting.

1b. □ Enclosed is $1.50 for only the Program-Directory. (It is understood that, if I should attend the Meeting later, the Badge—which is necessary for all privileges of the Meeting—will be secured for $1.00 more.)

(Check one)

2. FULL NAME (Dr., Miss, etc.) .......................................................... (Last) (First) (Initial)

(Please print or typewrite)

3. ACADEMIC, PROFESSIONAL, OR BUSINESS CONNECTION ..........................................................

4. OFFICE OR HOME ADDRESS ..........................................................

(For receipt of Program-Directory)

5. YOUR FIELD OF INTEREST ..........................................................

6. CONVENTION ADDRESS .............................................................

(May be added later, after arrival)

Please mail this Coupon and your check or money order for $2.50 or $1.50 to the AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
1515 Massachusetts Avenue, N.W., Washington 5, D. C.
The New International Model PR-1 Portable Refrigerated Centrifuge embodies the many time-proven features found in previous models and, in addition, incorporates important engineering improvements. The result is superior performance in the laboratory without increase in cost.

A new type of temperature controller enables the user to pre-select the operating temperature within the Centrifuge chamber. Temperature is controlled within ±1°C and indicated on a calibrated dial.

An autotransformer speed controller is provided with alternating current models, eliminating heating associated with the rheostat type of controller, and providing uniform, stepless speed control throughout the entire range.

A new hinged panel provides easy access to all instruments and electric controls, thus facilitating maintenance.

A hermetically sealed unit is substituted for the open type compressor heretofore used. This eliminates troublesome vibration caused by the action of the compressor and minimizes the possibility of gas leakage.

Interchangeable accessories are available in wider variety, enhancing the usefulness of the Centrifuge.

Send today for new descriptive Bulletin RC-1952 containing complete details and current prices.

1784 SOLDIERS FIELD ROAD, BOSTON 35, MASS.
Beaver's THE SCIENCE OF BIOLOGY

Fourth Edition

In both his text and manual (described below) Beaver stresses the scientific method—and emphasizes the relationship of plants and animals to man. This approach has been well accepted by instructors and students and as a result both the text and the manual are being used in many schools with real satisfaction.

If you are not using the Beaver books in your biology classes, why not ask us to send you a copy of each for consideration?

"I especially appreciate the treatment of scientific terms in that their Greek or Latin origins are explained. In this age in which these languages are so sadly neglected on the secondary level your break-down of terms is a much needed aid to the student."

—W. K., Head Dept. of Biology
N. Dak. School of Forestry, Bottineau, N. D.

895 pages 375 Illustrations Price, $5.85

Beaver's BIOLOGIC SCIENCE

In Laboratory and Field—Fourth Edition

There is a wide selection of exercises of various types to meet the requirements of different kinds of courses (for one year, or one semester) even when another text is used with this manual.

"Well organized laboratory manual; designed to accompany an excellent text. It should make an excellent teaching aid."

—P. A. W., Chairman, Biology Dept.
Randolph-Macon Woman's College, Lynchburg, Va.

256 Pages Price, $3.50

Both by WILLIAM C. BEAVER, Ph.D., Head of the Department of Biology,
Wittenberg College, Springfield, Ohio

Lindsey's Principles of ORGANIC EVOLUTION

Most of the recent literature in Evolution does not offer the broad scope which Lindsey surveys which helps so much in developing the comprehensive understanding the student seeks. Lindsey writes for the student as one who understands his needs. His experience and critical insight are combined with an unusually effective writing style which accounts for the fact that many teachers have said the book is the "answer to the 'evolution' textbook problem".

"I like Lindsey's factual, unbiased treatment especially of controversial topics."

—J. A. F., S.J., Canisius College, Buffalo, N. Y.

By ARTHUR WARD LINDSEY, Professor of Biological Sciences in
Denison University, Granville, Ohio

375 Pages 216 Illustrations Price, $5.75
