Algebra as a language

BEGINNING ALGEBRA FOR COLLEGE STUDENTS, Second Edition
By Lloyd L. Lowenstein, Kent State University. A refreshing text which, from the start, establishes algebra as a logical structure. It draws upon the student's experiences in arithmetic to develop his understanding of the rules of algebra. "I like the author's approach and style. His exposition is clear and logical and he provokes the student to exercise his thought processes . . ."—Professor W. H. H. Cowles, Pratt Institute. 1953. 279 pages. $3.50.

Stresses elementary physical models

INTRODUCTION TO SOLID STATE PHYSICS
By Charles Kittel, University of California. This is the only book on an introductory level to cover a large part of the field of solid state physics. It gives a basic discussion of representative areas of the physics of solids. Those areas in active research in solids which may be discussed in terms of simple physical models are emphasized. "It has the great virtue of being very accurate and yet very elementary, and shows this relatively new field to the reader in all its variety and inner structure very well indeed."—Professor E. Katz, University of Michigan. 1953. 396 pages. $7.00.

New treatment of a rapidly-growing field

GENERAL BIOCHEMISTRY
By Joseph S. Fruton and Sofia Simmonds, both at Yale University. Balancing the structural and dynamic aspects of the subject against each other, this new book gives attention to the fundamental principles of the science. "This book approaches the ideal text on biochemistry as nearly as I can imagine any book doing. . . . It is obvious that no space and no words have been wasted in presenting this material. The available facts have been completely digested."—Professor C. A. Elvehjem, University of Wisconsin. 1953. 940 pages. $10.00.

Discusses principles common to most organisms

GENERAL PHYSIOLOGY
By Bradley T. Scheer, University of Oregon. Designed as a thorough first course, this book provides an intelligible, up-to-date picture of vital functions. It offers a clear exposition of the nature and present status of the basic problems of physiology. The emphasis is placed both on those principles common to most organisms, and on those general phenomena of life which have been successfully analyzed in physicochemical terms. "All in all this is one of the finest physiology texts I have seen . . . . It is a welcome addition to my teaching library."—Professor A. G. Olsen, Brandeis University. 1953. 613 pages. $7.00.

Science comes to life

MAN AND HIS PHYSICAL UNIVERSE:
An Integrated Course in Physical Science
By Richard Wistar, Mills College. Keyed to the central problems of physical science, this book builds on a framework of familiar, common experiences. For example: it promotes an understanding of the principles of light through one of its popular applications—photography. This natural approach arouses the reader's interest in the many contributions science makes to everyday life. The book's broad units cut across chemistry, physics, geology, and astronomy. 1953. 488 pages. $4.75.

For PROOFS on display ads, copy must reach SCIENCE 4 weeks before date of issue (Friday of each week).

POSITIONS WANTED

Anatomist, Ph.D., D.D.S., Three years’ teaching experience University Dental College, Department, Research: Peripheral Circulation, Desires Assistant Professorship, Gross Anatomy; Medical Dental School, Box 184, SCIENCE.

Bacteriologist, Ph.D., experience in agricultural and medical bacteriology, wishes academic appointment. Box 186, SCIENCE.

(a) Bacteriologist: Ph.D.; three years, bacteriologist, army hospital units; three years, teaching, research. (b) Zoologist: Ph.D. (Zoology; Parasitology); four years, laboratory instructor and technical three years, parasitologist, tropical country. Science Division, Medical Bureau (Burneice Larson, Director) Palomar College, Chicago.

Ecologist—Ph.D., Major entomology; experience, entomology, mammalogy, and malacology; 3 years research assistant; 3 years in charge tropical research laboratory; desires university teaching or research. Box 183, SCIENCE.

Pharmacologist, 40, B.S., M.T., Reg. Med. Tech. (A.S.C.P.); 17 years’ experience in hospital laboratories; 6 years supervisor experience, pharmaceutical industry—2 sterility control, 2 control pharmacology, 2 research pharmacology; 3 years experience Latin America, all major cities. Desire to relocate. Box 190, SCIENCE.

POSITIONS OPEN

1954 ARCTIC RESEARCH GRANTS

The Arctic Institute of North America is offering research grants in 1954 for scientific investigations dealing with arctic and subarctic regions. Research must include field investigations or other appropriate activity in North America. Proposals in the physical sciences will receive special consideration. Application forms may be obtained from Arctic Institute of North America, 1300 P Street, N.W., Washington 9, D.C., or 3485 University Street, Montreal, Canada. Completed applications must be received by 1st November 1953.

(a) Physician or pre-medical graduate experienced abstractor and literature searcher; duties: abstracting scientific articles, routine correspondence in German, French, Spanish; pharmaceutical company. (b) Associate director of research; one of major pharmaceutical companies; preferably one qualified for medical teaching position. (c) Associate or assistant professor of pharmacology; university medical school; $6000-$7800. (d) Microbiologist, supervisor, 375-bed teaching hospital; research opportunity. East. (e) Biochemist, preferably Ph.D., qualified teaching to direct division, large teaching hospital; East. (f) Psychologist, Ph.D., for psychological testing, capable of developing training program for psychology interns; private institution, university medical center; Midwest. 30-4 Science Division, Medical Bureau (Burneice Larson, Director) Palomar College, Chicago.

Physiologist, Ph.D., or M.D., with interest in neurophysiology, special senses, cardiovascular, muscle or respiratory system. Box 187, SCIENCE.

Research Assistant, with special interest in application of mathematics, physics, electronics to biological problems. Box 188, SCIENCE.

APPLICATION FOR HOTEL RESERVATIONS
120th AAAS MEETING
Boston, Mass., December 26-31, 1953

The list of hotels and their rates and the reservation coupon below are for your convenience in making your hotel room reservation in Boston. Please send your application, not to any hotel directly, but to the AAAS Housing Bureau in Boston and thereby avoid delay and confusion. The experienced Housing Bureau will make assignments promptly; a confirmation will be sent you in two weeks or less. Share a room with a colleague if you wish to keep down expenses. Mail your application now to secure your first choice of desired accommodations. All requests for reservations must give a definite date and estimated hour of arrival, and also probable date of departure.

DUE OFF THE PRESS OCTOBER 15TH
ADMINISTRATIVE MEDICINE
TRANSACTIONS OF THE FIRST CONFERENCE
MARCH 9, 10 and 11, 1953
EDITED BY GEORGE S. STEVENSON, M.D., MEDICAL DI-
RECTOR, NATIONAL ASSOCIATION FOR MENTAL
HEALTH, NEW YORK, N. Y.
This is a report of the first of five meetings of a new Conference
Group, consisting of scientists working in the fields of medical edu-
cation and practice, sociology, psychology, hospital administration,
nursing, economics, and labor-management, who discussed general
problems in this field. These five conferences will be of interest to
those engaged in the selection and recruitment of medical and re-
lated personnel, in the administration of hospitals and group medical
practice units, in government agencies, health insurance plans, and in
the actual care of patients and the prevention of illness.
Orders accepted for the entire series of this Conference Group,
to be delivered and billed as the books come off the press.
The double-barrel benefit of a **TWIN-BEAM** record

**PHOTOGRAPHICALLY RECORDED—SEPARATELY OR SIMULTANEOUSLY**

*Phonocardiograms*

**TWIN-BEAM Phonocardiograms**
are fully detailed recordings of ALL of the heart sounds and murmurs present. The location, pitch, duration, and intensity of a murmur are reproduced with the same completeness of detail as are the auricular, first and second sounds of the normal record shown above.

**Electrocardiograms**

**TWIN-BEAM Electrocardiograms**
show ALL complexes in small animal "cardiograms (such as taken on a mouse) *clearly* and *accurately*.
This new, high deflection speed also permits *added accuracy* in research and clinical human "cardiography.

**PLUS Electrical Auscultation**
Cardiac sounds and murmurs are heard with the **TWIN-BEAM** exactly as with an acoustic stethoscope.

**TWIN-BEAM CARDIETTE**

For descriptive literature and a complete outline of these and many other advantages for the **TWIN-BEAM** user, address

**SANBORN CO.** Cambridge 39, Mass.
