SCIENCE

OCTOBER 30, 1953
VOLUME 118
NUMBER 3070

Contents

Newer Synthetic Structures of Interest as Tuberculostatic Drugs: H. Herbert Fox ........................................... 497
Cyanopsin, A New Pigment of Cone Vision: George Wald, Paul K. Brown, and Patricia H. Smith ......................... 505

News and Notes
Meeting of the Society of American Bacteriologists; Second Gordon Research Conference on Nuclear Chemistry ...... 509

Technical Papers
Species Specificity of Fibrinogen as Revealed by End-Group Studies: L. Lorand and W. R. Middlebrook ................... 515
The Growth and Shrinkage of Aerosols: Victor K. La Mer and Sydney Cotson ............................................. 516
Evidence for X-Ray Induced Recessive Lethal Mutations in Yeast: Robert K. Mortimer and Cornelius A. Tobias .............. 517
Secondary Galls and Other Plant Growth-Modifying Effects Induced by Translocated α-Methoxyphenylacetic Acid: John W. Mitchell and William H. Preston, Jr. ............................ 518
Autoradiographic Detection of $^{35}S$ in the Membranes of the Inner Ear of the Rat: Leonard F. Bélanger .................... 520
The Existence of "Beta" Ice: Carl Berger and Charles M. Saffer, Jr. ......................................................... 521

Book Reviews
Phosphorus Metabolism; Sampling Technique .................................................. 523

Association Affairs
Symposia at the Boston Meeting: Raymond L. Taylor ...................... 524
The Cooperative Committee on the Teaching of Science and Mathematics: Bernard B. Watson .............................. 527

British Association for the Advancement of Science ............ 3

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE
