MAGNETIC STIRRING APPARATUS, A.H.T. Co. Specification. A compact, quiet-running apparatus which utilizes a rotating field of magnetic force to induce variable speed stirring action within either closed or open vessels. Now offered with enclosed rheostat, which will facilitate manipulation in some assemblies, in addition to the separate rheostat model described on page 1123 of our catalogue.

Stirring is accomplished by means of a small magnetized bar, sealed either in heavy wall Pyrex brand glass or in Kel-F plastic, which is placed in the liquid to be stirred and which is rotated by magnetic force applied beneath the container. This force consists of a permanent bar magnet attached to the shaft of an electric motor and mounted in an aluminum housing with flat top 4 3/8 inches diameter and 4 1/2 inches high, on cast metal base. Can be used either on the table or on a support rod, attached by means of a clamp with swivel joints.

Suitable for any stirring operation which involves 1 ml to 1 liter of liquids with viscosities up to that of a 50% glycerol solution. Particularly convenient for use in closed systems.

9235-C. Stirring Apparatus, Magnetic, with enclosed rheostat, A.H.T. Co. Specification, as above described. Rheostat, with graduated dial, is mounted in stirrer housing. Complete with two magnetized Stirring Bars, i.e. one Kel-F coated, 7/8-inch long x 1/4-inch diameter; the other Pyrex brand glass coated, 1 3/4 inches long by 7/16-inch diameter; also 5 ft. 3-wire connecting cord and conventional 2-prong plug cap and directions for use. Power consumption 7 watts; for 115 volts, 60 cycles, a.c. only.

Without glass vessel ................. 36.80
9235-G. Ditto, but without Stirring Bars ......... 32.00

9235-R. Stirring Apparatus, Magnetic, Original Model, A.H.T. Co. Specification, similar to 9235-C but with separate rheostat for control of speed at a distance of approx. 30 inches. Complete with two Stirring Bars A and B ............... 38.50

9235-S. Ditto, but without Stirring Bars ............. 33.40

STIRRING BARS, MAGNETIZED, Kel-F Coated, Vacuum Tested, A.H.T. Co. Specification, for use with above Magnetic Stirrers. Consisting of permanent magnet sealed in durable shell of Kel-F. This nonflammable thermoplastic is suitable for use at temperatures to +200° C., and is unaffected by acids, including concentrated hydrofluoric and fuming nitric acids, aqua regia and other powerful oxidizing agents, concentrated alcalies and most organic solvents, but is swelled slightly by highly halogenated materials and some aromatics.

9235-U7. Stirring Bars, Magnetized, Kel-F Coated, as above described.

Overall length, approx. inches 7/8 1-5/8 2

ATOMIC MEDICINE
2nd edition

Edited by Admiral F. Behrens, M.D., with 20 expert contributors

A well-aligned summary of the entire field covering everything from the scope and general background, design and operation of laboratories employing radio-isotopes, tracer methods in biologic application of radio-isotopes, on through the horizons of research in atomic medicine. A must reference and source for everyone from technician to director.

632 pp., 134 figs. $11.00

PROGRESS IN THE CHEMISTRY OF ORGANIC NATURAL PRODUCTS

Just published: VOLUME X • 529 pp. bound • $19.80

Edited by Professor L. Zechmeister, California Institute of Technology. With contributions in English, French and German.

Contents: ALDER & SCHUMACHER, Dien-Synthese; MARK, Physical Chemistry of Rubbers; ASSELINEAU & LEDERER, Chimie des lipides bacteriens; ROSENKRANZ & SONDEIMER, Syntheses of Cortisone; CHATTERJEE, Rauwolfia Alkaloids; FEINSTEIN & JACOBSON, Insecticides in Higher Plants.

Again available: Volumes I–X, 1938–1953, $164.30. All volumes separately. Detailed Prospectus on Request. Journal of the American Chemical Society: "... Uniformly high quality of individual contributions... international character... broad objectives... The continuing success of this Series is very gratifying."

#S 998
Listing over 900 Research Biochemicals

TYPICAL NBCo. PRODUCTS
AMINO ACIDS
A complete selection of more than 90 amino acids of maximum purity. Including natural L - synthetic DL and resolved L and D amino acids.

NUCLEOPROTEINS - PURINES PYRIMIDINES
Adenosine Triphosphate • Adenine • Adenylic Acid • Cozymase • Cytidine • Cytidylic Acid • Cytosine • Desoxyribonucleic Acid • Fructose and Glucose Phosphates • Glutathione • Guanine and Salts • Guanylic Acid • Hypoxanthine • Icosine • Nucleates • Ribose Nucleic Acid • Desoxyribonucleic Acid • Ribose • Protamine • Thymine Uracil • Uridine • Uridylic Acid • Xanthine • Xanthosine.

"VITAMIN FREE" CASEIN
(Heat Alcohol Extracted)
A valuable source of protein nitrogen of exceptional purity for incorporation into diets to produce vitamin deficiencies.

MISCELLANEOUS BIOCHEMICALS
Alpha Keto Glutaric Acid • Cytochrome C • Glutamine • Dopa • Glycogen • Heparin • Lysozyme • Crystalline Vitamins • Crystalline Carbohydrates • Fatty Acids • Growth Factor Analogs • Enzymes • Biological Test Diets • Alkaloids

January 1, 1954
The first book on upper-air research with rockets

HIGH ALTITUDE ROCKET RESEARCH

By HOMER E. NEWELL, Jr.
Head, Rocket-Sonde Research Branch
Naval Research Laboratory
Washington, D. C.

December 1953, xiv, 298 pages, 37 tables, 93 figures, $7.50

This book describes the use of rockets for studying
- Ionosphere
- Earth’s magnetic field
- Solar radiation
- Cosmic rays
- Atmosphere

For each subject, sufficient background information is provided so that the reader can fully understand the experiments and appreciate their significance. Research and instrumentation techniques as well as experimental difficulties peculiar to rockets are surveyed.

Dr. Newell describes the WAC Corporal, V-2, Aerobee, and Viking rockets and lists all the upper-air research firings conducted by United States agencies from early 1946 to December 31, 1952.

Here are eight distinct reasons why Haemo-Sol is the preferred cleaner for laboratory glassware.
- Completely Soluble
- Leaves No Residue
- Fully Haemo-Digestive
- Lower Surface Tension
- Scientifically Formulated
- Controlled pH
- Multiple Laboratory Uses
- Greater Economy

Pioneers in the development of the

STANDARD LABORATORY RAT

Our new modern colony building just completed soon will double our present production.

The new colony building contains every device to insure continuous production and shipment of guaranteed Sprague-Dawley strain white rats.

Limited shipments of males from the new colony will be available about March 15, 1954.

Increased orders from our present customers and orders from new customers will be accepted as production builds up.

OUR PLEDGE: Our insistence on the highest possible quality will never be sacrificed to quantity.

At last! a smoke-sampling machine long awaited by laboratories over the country... released for general use only after months of intensive research and development with American Tobacco Company in their laboratories.

**THIS HIGHLY DEVELOPED SMOKING MACHINE CONSISTS OF TWO UNITS:**

1st—A draft shield (housing for cigarettes, etc.) with a vent at the top and an ash drawer at the bottom for cleaning, and a door on one end for easy access. On the back are clamps to hold suitable collection flasks and the remainder of the absorption train.

2nd—The puffing mechanism is designed to give a constant volume puff on each of four cigarettes once each minute. The actual puff is produced by a falling column of water in a burette with a ground glass float valve. By means of a control mechanism consisting of cams, timers and switches, solenoid valves and a bank of rectifiers, the puff is taken consecutively on each of the four cigarettes at fifteen second intervals. The duration of the puff may be controlled between two and four seconds and the volume is adjustable from 0 to 60 ccs.

*The size of the puffing housing is 34" high by 15" wide by 24½" long. The size of the shield is 21" long by 9" wide by 28" high. The following glassware is included: four each #36-010, 300 ml., four each #36-010, 800 ml., eight each absorption tubes and four each inlet tubes and holders, one burette with float. The apparatus is for use on 115 volts, 60 cycle A.C.*

Catalog No. 9-90 ........ $1,250.00
**PAPER PARTITION Chromatography**

- The RECO line is specially designed for one- and two-dimensional Chromatographic analysis.
- Also included are Densitometers, ultra-violet lamps, pyrex disc chambers, micro pipets, stainless steel clips, solvent troughs and other chromatographic accessories.
- Our General Catalog gives complete details of the RECO line of Paper Partition Chromatographic Equipment.

Write for your copy today.

**The RECO CHROMATOCAB**
for two-dimensional paper chromatography...using standard filter paper sheets 18¾ by 22¾ inches, or smaller.

*The RECO line is specially designed for one- and two-dimensional Chromatographic analysis.*

**The RECO Electric DESALTER**
for the removal of inorganic salts from organic and amino acid solutions to be chromatographed.

**Indicator Sprays**
for application of indicators to chromatograms.

**RACKS**
Stainless steel or glass for one-dimensional separations.
